FLEXIBLE FLYER

The Sled That Steers

Improved Construction (All Steel Front). More Effective and Easier Steering.
High Grade Steel Runners—Grooved. Safer—Attractive—Stronger

SAFE

The steering is easy and the grooved runners prevent skidding. The special shape of the goose-neck runner gives a longer and therefore better steering surface and the steel-front acts as a shock absorber and prevents breakage.

FAST

The grooved runners are straight and true which makes for speed; yet in steering no dragging of the toes is necessary, thus saving shoes and preventing wet feet.

The reason for the ever-increasing demand for "Flexible Flyers" is because they are the highest type of sled made and will give years of joy and service to every boy or girl who receives and uses one.

STRONG

All wood used is selected straight-grained second growth ash. The steel supports are scientifically designed and shaped to give extra strength.

"Flexible Flyers" are light and therefore easy to carry or pull up hill.

THEY LAST

The steel parts are japanned—not merely painted and varnished; so the paint sticks.

The wood parts are handsomely decorated and finished with the best varnish.

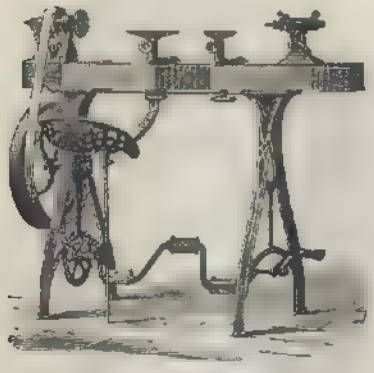
LATHES.

WOOD TURNING.



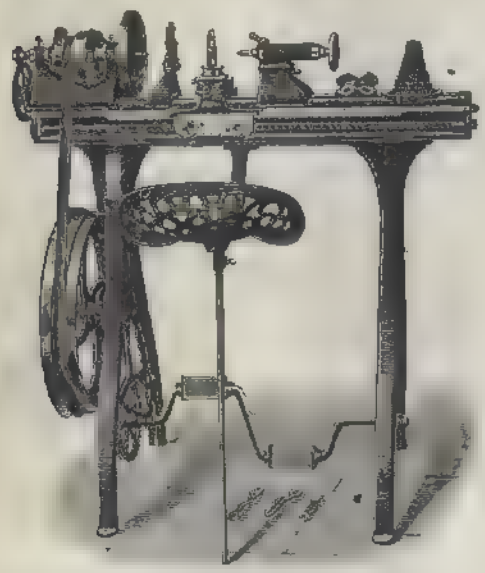
Net each

No. 3C—Complete, with 3 centers (1 a spur,) 2 tool rests and sockets, and 1 turned face plate, weight 280 lbs., boxed 320 lbs. . . . . Market Price

No. 3W—Without lower portion, but with short bench legs . . . . . .

Will take wood 12 in in diameter and 3 ft. long. Has velocipede foot power and improved seat. Speed can be varied from 1,000 to 2,000 revolutions per minute, and the motion can be started, stopped and reversed instantly. Adjustable sliding seat can be readily moved along to any part of the bed that the work requires. This lathe is made entirely of iron and steel except the bed which is of wood. The spindle is of steel, fitted up in the best manner. All the bearings are of steel, making them strong, durable and light-running. The centers are accurately fitted to taper holes. No wrench is required to adjust tail stock or tool rests and sockets, hand wheels being used instead.

SCREW CUTTING.



9 in. Swing.

This is the smallest back geared and screw cutting lathe our factory makes, and they claim confidently that it is far and away the best lathe of its size on the market. It feeds right or left, and cuts screws right or left without change of gearing. The carriage is thoroughly gibbed for taking up wear.

They do not make this lathe with automatic cross feed. Our twenty-five years' experience as lathe users and builders convinces us that on a small lathe, say less than 13 inches swing, automatic cross feed is of no particular advantage. The tool carriage on our lathe swivels so that the tool can be set to work at any desired angle, and it also adapts the lathe for taper boring. These features, they are confident, are of greater value than automatic cross feed.

The tail stock has side movement to adjust centers for turning tapers. The head stock has hollow spindle for rods up to ⅝ inch. All the gearing is cut from solid metal. All parts are made of steel, where this would best serve the purpose.

It is indexed for threads 5 to 40, and the change gears furnished can be combined for many other threads. It swings 9 inches and takes 25 inches between centers. It swings 4½ inches over the tool carriage.

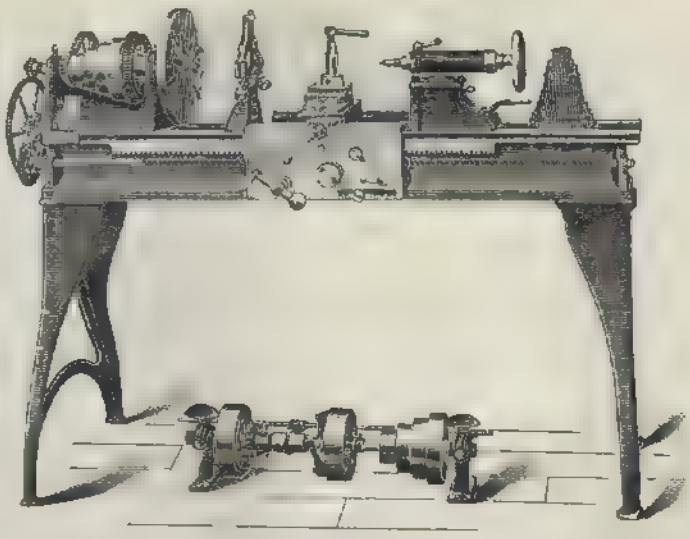
The small pulley on cone is 2½ inches; the large pulley 4¼ inches.

Net each

No. 4½ Weight 270 lbs., boxed 340 lbs. . . . . Market Price

Compound Rest, extra . . . . . .

SCREW CUTTING.



With the patent velocipede foot power, motion can be started, stopped or reversed instantly, and greater power can be applied on the work than with any old style foot power, and with greater ease. Head stock has a hollow steel spindle that will take a ⅜ in. rod through its entire length. Boxes are accurately fitted to the spindle, with provisions to keep them true and take up wear. Tail stock can be readily set at any desired point, or taken altogether from the lathe bed, without removing nuts and bolts. It can also be set over for turning tapers. Spindles for both head and tail stocks are of steel, with positively true taper holes for the reception of the centers. Tail stock center is self-discharging. Tool carriage is gibbed to the bed. All the works are securely protected from chips and dirt, insuring long wear and durability to the most costly and vital parts of the lathe. It is indexed for threads 4 to 32 and the change gears furnished can be combined for many other threads. Swings 13 in. on face plate; over tool carriage, 8 in. Has a splined screw, giving rod feed for turning reserving the screw for thread cutting only. By a lever in the apron of the tool carriage the feed can be graduated instantly from coarse to fine, and vice versa.

Automatic Cross-Feed and Compound Rest.

NO.	Length of Bed, Feet	Distance Between Centers, Inches	Weight of Lathe Pounds	Weight Boxes Pounds	Net Each

BRAZING SPELTER.

The composition of this brazing spelter is identical with that specified by the Government and other large consumers. The grain is fine and round; the spelter fuses at low heat, and gives permanent results.

1 Lb. Cans.....Each $1 00

BRAZING COMPOUND.

SUPERIOR.

Brazing can be made a simple operation provided a good flux like Superior is used to clean and protect the work. Superior fuses easily at low heat and enables the spelter to take hold without danger of burning. Because of its effectiveness, only a small quantity is required on a job, leaving but little scale, and that can be readily cleaned off.

1 Lb. Cans.....Each $1 00

BRAZING WIRE.

For heavy work, brazing metal in wire form is most economical and convenient; flows at moderate heat, producing a clean, smooth, strong, solid job. Furnished in 10-gauge—about ⅛ inch diameter—in rolls weighing approximately 40 pounds.

10 Gauge. ... .Pound $1 00

AIR AND WATER STANDS.

CURTIS.

No. 20.

No. 21.

Curtis air stand is furnished in either the column or low type. The hose is automatically stored on a drum protected from sun and rain. No oil checks, no counter weights, no clock springs, no swaying trolley poles, no hose to whip or blow where it is dangerous to the glass, paint or windshield of a car.

No. 20. With hose complete. Height, 6 ft. 3 ins. Wt. 210 lbs..Each **$100 00**

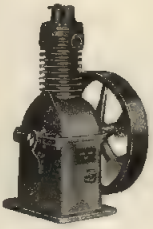
No. 20. With water connection .....Each **$105 00**

No. 21. With hose complete. Height, 3 ft. 3 ins.....Each **$100 00**

No. 21. With water connection .....Each **$105 00**

AIR COMPRESSORS.

CURTIS.



OIL FREE AIR. PLATE VALVES. INCLOSED CRANKCASE.

We suggest that compressors with the centrifugal unloaders be used on all automatic installations, the centrifugal unloaders insure easy starting and protection in case of low voltage or a loose belt. The No. 4 compressor is the most popular when used with gas engine. Use single stage compressors for pressures up to 125 pounds, two stages for higher pressures. We can also supply water cooled machines of any capacity.

GIBBS *New Wooden* TOYS

These New Wooden Toys are designed so as to outlast all other playthings, and the reproduction of details and proportions is perfect.

They are handsomely ornamented in brilliant hard enamel colors and very attractive, but must be seen to appreciate their beautiful design and coloring.

A special unbreakable mechanism to imitate the noise of a motor is a distinctive feature in these new Toys.

The Toys have Pull Cords attached and are packed set up complete, ready to sell, one Toy in a box. Gibbs Toys sell the year round.

No. 70 Auto Truck and Trailer

This Toy will stand any amount of hard knocks and is a great favorite with the youngsters.

A noise to imitate a motor is a unique feature.

Beautifully ornamented in eight bright enamel colors.

Imitation Balloon Tire Wheels.

Length 17 inches. Height 5 inches.

No. 79 Aeroplane

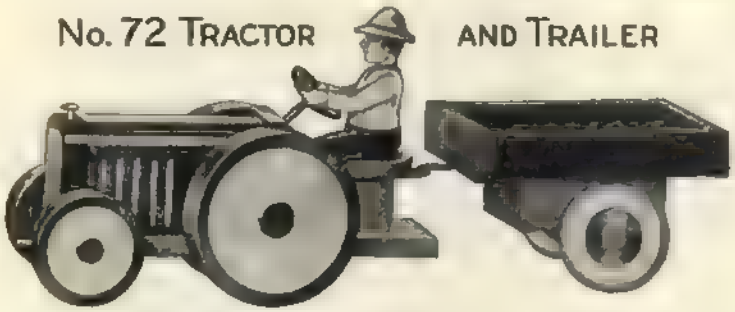
As the Toy is drawn along the Aluminum Propeller revolves and a noise is made to imitate the motor, thus giving the semblance of a real Aeroplane about to enter the air.

Made almost entirely of wood, is practically unbreakable, thereby, eliminating the frail construction usually found in Aeroplane Toys.

The Propeller is solid Aluminum and highly polished.

Length 12 inches, width 7¾ inches. Height 6 inches.

No. 72 Tractor and Trailer



An exceedingly good imitation of a real Tractor.

Made of wood and will stand rough handling.

A noise to imitate a motor is a distinctive feature.

The combination of eight bright enamel colors is unusually attractive and makes it an outstanding Toy.

Length 13½ inches. Height 5 inches.

Write today for our 1927 Catalog showing 41 Gibbs Toys in natural colors.

ONE IN A CASE

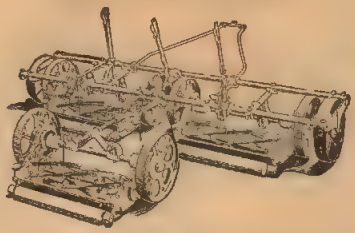
PENNSYLVANIA TRIO MOWERS



CAN BE DRAWN BY HORSE OR TRACTOR

In ordering advise if wanted with tractor hitch, or draft pole for double team, or single shafts.

A three-unit type mower; made especially for golf courses, public parks, cemeteries and all grounds where large areas of undulating surface present difficult problems of lawn mowing.

Consists of three specially constructed 30 in. 4 blade mower units, high geared, so yoked to a frame or sulky that a cutting swath of 86 in. is attained.

Each mower unit acts independently of others, being pivoted to frame, enabling them to ride over even surfaces and to closely follow undulation of ground.

Frame supported on two separate ground wheels, thereby relieving cutting units of any extra weight, overcoming objection of wheel marks on turf and also giving mowers greater flexibility and greater efficiency.

SPECIFICATIONS

Automatic Clutch—Each mower unit may be raised separately by means of three levers, and when lifted to highest point the cutting cylinders are automatically disengaged or idled. When lowered, the cylinders are again automatically engaged.

Wheels—17 in. in diam., tread of 2½ in., fitted with automobile type ball bearings.

Cylinders—4 knife, 30 in., 6½ in. diam. Knives are of crucible steel, oil hardened and water tempered.

Cylinder Bearings—Cylinder carrying knives revolves in universally adjustable, bronze bearing. These bearings can be adjusted for wear and cannot get out of alignment.

Bottom Knife—To insure great rigidity, bottom knife castback is bolted solidly to side plates. This eliminates all chances of the mower becoming twisted or strained. Blade is crucible steel, oil hardened and water tempered.

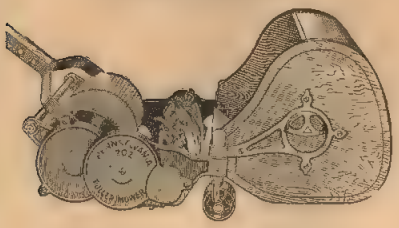
Adjustment of Knives—Instead of usual method of raising bottom knife for wear, all adjustments quickly made by tightening two regulating screws and bringing cylinder closer to bottom knife.

Assembling—Mowers are absolutely interchangeable, will fit in any position. The "sulky" style steel frame may be used for pulling other equipments, such as rollers, seeders and other cultivator tools.

No. F86—Cutting width 86 in., width over all, including sulky or ground wheels 109 in., w't 930 lbs., each★ $899.90

★Items Thus Marked ★ Are Shipped from Factory Only

PUTTING GREEN ROLLER MOWERS
WITHOUT GRASS BOX



Made with cut gears and roller bearings. This greatly improves the ease in running.

7 in. rollers, 6 in. six-blade cylinder, crucible steel blades; self sharpening raised edge dead knife; triple gears. The hardwood roller in front can be removed and mower supportd on caster wheels if preferred. Cuts 3-16 to 1¼ in. This mower is unexcelled for cutting undulating or wavy greens, also tennis courts, cricket creases and other lawns requiring an exceptionally close and smooth cut.

ONE IN A CASE

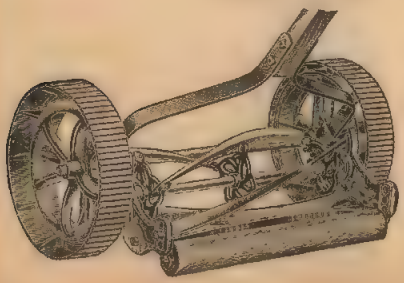
FLORIDA SPECIAL BALL BEARING LAWN MOWERS



The special feature of this mower is the 2¾ in. wide tread of the wheel. It is especially adapted for loose sandy soil, new lawns or other ground where the regular narrow tread will not easily grip the ground. Will also give more traction in heavy grass. It has a high carriage and can be adjusted to cut 1½ in. from the ground.

Four blade cylinder of high grade crucible steel, tempered in oil. Reel bearings have patented automatic self adjusting ball bearings which automatically take up the wear in the cones. Screw adjustment on lower cutter bar.

Decoration—Gold bronze and Blue. Attractively striped. 10½ in. Drive Wheel, 2¾ in. tread. Hardwood roller and handle.

Reel bearings are fitted with oil cups.

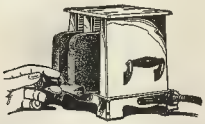
"There is a Difference in Toast"



Easy to Use — Easy to Sell
The "DOUBLE ACTION" Toaster

The wedding bells will soon be ringing. Make your cash register ring by filling that gift want with "DOUBLE ACTION" Toasters.

Here is a toaster that is easy to sell because it is *easy to use*. It produces two slices of toast, evenly browned on both sides, *without turning* No turning mechanism to go wrong, is an important sales argument that means rapid turnover for the dealer.

Built solidly, attractive, and guaranteed, the "DOUBLE ACTION" meets the demand for a better toaster, and sells itself. Ask your jobber or write for information.

WAFFLE IRONS.

Interior arrangement is of such a nature that the waffle is of uniform thickness throughout, making waffles evenly baked.

Each plate can be lifted from base independent of the other. This is a great convenience especially for washing.

These irons also have black enameled wood handles with metal ferrule which prevents the wood from splitting. There is a large groove on bottom of base of ring which catches any grease or batter that flows from the plates.

Ball and Socket Pattern.

Japanned Rim, Wood Handles. Net per doz.

TIMERS
(STOP WATCHES)

TRACK MEETS, BASKETBALL, FOOTBALL, AND TECHNICAL REQUIREMENTS

GUARANTEED HIGH GRADE, IMPORTED MOVEMENTS.

Special price quoted on quantity orders

GALLET PLAIN TIMER

This is the most popular Timer. It is used by civil engineers, chemists and other technical people for various experiments. Sportsmen find it invaluable in the many forms of competition to which accurate timing is indispensable. Fifth-second, thirty-minute register; start, stop and fly back from crown; six-jewelled lever movement.

W2548. Nickel Case $15.40

GALLET TIME STUDY
PRODUCTION TIMER

Every factory needs one or more of these timers. They are essential in figuring costs, and are invaluable in ascertaining the production of a machine, a workman or an operation of any kind.

This timer is used to determine the number of operations performed in an hour by timing a single operation.

Thirty-minute register; fly back from crown, side slide for starting and stopping; six jeweled, lever movement.

W2551. Nickel Case $18.90

GALLET DECIMAL TIMER

Used extensively in factories and laboratories where production and experiments demand accurate, dependable timing, the Gallet Decimal Timer has always proven its merit.

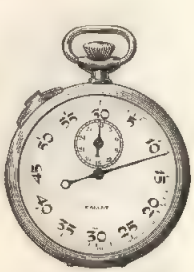
Fifth-second, thirty-minute register; fly back from crown, side slide for starting and stopping; six jeweled, lever movement.

W2554. Nickel Case $17.50

PASTOR CHRONOGRAPH

Inexpensive, but sturdy and reliable. Fifth-second or Tenth-second reading. Nickel case. Unbreakable crystal. Does not register minutes.

W 2549. ..... $11.20

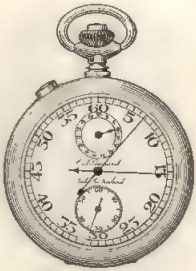


GALLET FOOTBALL AND BASKETBALL TIMER

Correct timing is assured by using this model which is especially useful for sports such as FOOTBALL and BASKETBALL where it is necessary to deduct time when play is interrupted.

Fifth second, thirty-minute register; fly back from crown, side slide for starting and stopping; six jeweled, lever movement.

W2552. Nickel Case $17.50



C. L. GUINAND'S SPLIT TIMER

Fifth-second, thirty-minute register; start, stop and fly back from crown, side push for the split-second hand; fine, jeweled, nickel, lever movement.

W 2553. Nickel Case—7 Jewels, Guinand $49.70
W 2553L Nickel Case—6 Jewels, Gallet without second hand. Dial like W2552 37.10

GALLET 100-SECOND TIMER
FOR DIRECT READING IN SECONDS

This model is used largely by oil refiners when making Viscosity tests.

Registers up to 3,600 seconds, start, stop and fly back from crown six jeweled, lever movement.

W2550. Nickel Case $16.10

GALLET 1/10-SECOND PLAIN TIMER

This watch is particularly useful where extremely precise timing is necessary.

The keenest competition exists in our athletic events today, and many of the leading athletic associations and colleges throughout the country have decided to time races in tenths of seconds instead of fifths of seconds.

Tenth-second, fifteen-minute register; start, stop and fly back from crown; six jeweled, lever movement.

W2555. Nickel Case $16.10

C. L. GUINAND'S CHRONOGRAPH MINUTE REGISTER

Fifth-second start, stop and fly back from crown, fine, jeweled, lever movement.

W 2557. Nickel Case—17 Jewels $83.00

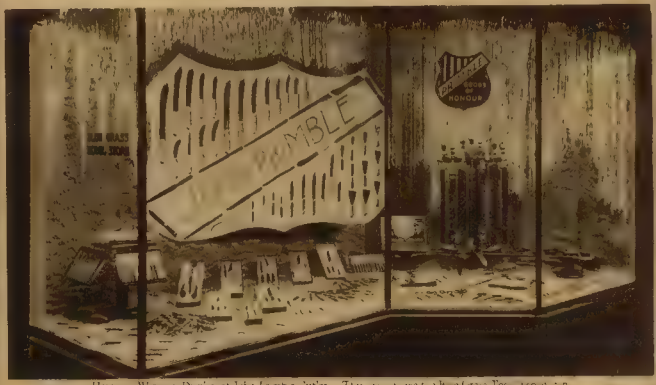
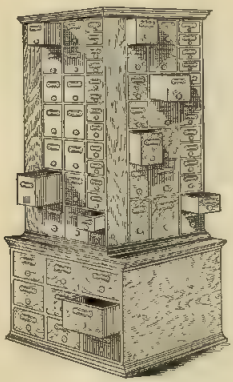
Above illustrates a splendid display of Blue Grass Tools. A similar display can easily be made in your window with the use of a few rolls of Crepe Paper. You will be surprised at the immediate results a display of this kind creates with every man in your town. Men are always interested in Tools. It will help your Tool Business wonderfully.



Here is a Window Display of John Bramble Cutlery. This display, like the Blue Grass Tools Display, can be made with little effort. A few rolls of Crepe Paper is all that is necessary. A display of this kind immediately attracts the attention of every person in your neighborhood and will result in greater sales in these profitable lines, which are almost invariably sold for "Cash."

By all means place in a prominent place in your store a good display of Stoves, Ranges, Oil Stoves and Heaters. Such displays as this, instantly command the attention of women. There is hardly a week passes but that some one in your community is interested in these household necessities, which means that an attractive display will help you secure this profitable business

The above illustrates Household Goods and should be one of the most important lines in your store. Keep constantly pushing the sales of Household Goods by displaying various articles in the most effective manner. A good Window Display now and then will let every woman in your community know that you can meet her requirements with everything needed in Household Goods.



No. 130

BOLT AND SCREW CASE COMBINED

The plan of No 130 is the same as No. 40, except the corners are left square and filled in with small drawers for screws

All No. 130 Cases leave the factory labeled as follows:

Washers
¼, 5 16, ⅜, ½, ⅝, ¾.

Bolts
¼x1, 1¼, 1½, 1¾, 2, 2¼, 2½, 2¾, 3, 3½, 4, 4½, 5
5-16x1¼, 1½, 1¾, 2, 2¼, 2½, 2¾, 3, 3½, 4, 4½, 5, 6
⅜x1½, 1¾, 2, 2½, 3, 3½, 4, 4½, 5, 5½, 6, 7, 8.
½x2½, 3, 3½, 4, 4½, 5, 6, 7, 8, 9, 10, 11, 12.
⅝x5, 6, 7, 8, 9, 10, 11, 12
¾x7, 8, 9, 10, 11, 12, 14, 16.

Screws
⅜ 3, 4, 5, (in one drawer)
½ 3, 4, 5 6
⅝ 4, 5, 6, 7
¾ 5, 6, 7, 8, 9
⅞—6, 7, 8, 9
7, 8, 9, 10, 11
1¼ 8, 9, 10, 11, 12
1½—9, 10, 11, 12, 13, 14
1¾—11, 12, 13, 14
2—11, 12, 13, 14

This leaves 14 small drawers with blank labels which can be used for Tire Bolts or Stove Bolts, etc.

No. 130 is mounted on a base 30 inches square, 20 inches high, and is made of oak with hard oil finish.

No. 130.....List $67.00

Shipped from Factory in East Tennessee.

Remember, labels can be easily changed to any size desired

PERFECTION BOLT AND SCREW CASE

No. 40

The No. 40 Bolt Case is the most practical Bolt Case ever made for general stores.

It has 40 drawers and is 22 inches in diameter and is 37 inches high.

List.....$ 27.00

It will hold more bolts than other cases of same size, because the drawers are square (not triangular).

No. 40 cases leave the factory labeled as follows

¼x1½, 1¾, 2, 2¼, 2½, 3, 3½, 4, 4½, 5
5-16x1½, 1¾, 2, 2½, 3, 3½, 4, 4½, 5, 6
⅜x2, 2½, 3, 3½, 4, 4½, 5, 6, 7, 8.
½x3, 3½, 4, 4½, 5, 6, 7, 8, 9, 10.

The labels can be easily changed to suit your own selection of bolts.

Case made of oak, with hard oil finish shipped from factory in East Tennessee.

F. O. B. Factory

Boys' Wagons, Velocipedes and other Wheel Goods are constantly becoming a bigger and more profitable line for Merchants to carry. Keep well assorted stocks of Toys and Wheel Goods constantly before the children in your town and many sales will naturally result in these lines. In addition the children will bring their parents to your store giving the opportunity for the sales of other lines

Dolls, Electric Trains, Erector Sets, Structo Outfits, Fire Engines, Hook-and-Ladders, Derricks and other similar Toys should be carried in stock by every alert merchant. They are profitable items to sell Display these in your store in the most effective manner throughout the entire year. Make frequent window displays and you will find these goods to be one of your most satisfactory lines from the standpoint of sales, profits and consumer-interest.

The demand for Silverware is large and constantly growing. Every woman in your community is anxious to possess a complete service of attractive Silverware. Make an attention-attracting Window Display at proper seasons of the year for the purpose of letting every woman in your community know you are headquarters for Silverware. Display cards, etc., such as used in this window will be furnished upon request.

Automobile Tires, Tubes and Accessories are today one of the most profitable lines to carry. You should be ready and fully equipped to supply the demand of every motorist. Keep a liberal stock of Tires, Tubes, Pumps, Jacks and other accessories on hand to promptly serve the needs of your customers. A tremendous sum of money is being spent daily for these goods. You can get your share of this large and growing business if you will only go after it

Builders Hardware is an important and profitable line to carry. Keep an attractive display before your trade for the purpose of letting them see that you have what they need. With many new homes being erected there is a great demand for Builders Hardware of all kinds. The development of the decorative idea in the modern home, as well as its increased conveniences has largely increased the demand for Builders Hardware other than the staple low-priced grade.

Here is an attractive Window Display of Base Ball Goods which can easily be reproduced in your store. It goes without saying that no line is more appealing to the boys and young men in your neighborhood than Base Ball Goods. Sporting goods of all kinds sell freely in good times and bad. Most people forget economy when purchasing things with which to play.

Make your store headquarters for Harness, Collars and Strap Work. Carry in stock those items as are in constant demand by every user of teams in your community. There are as many horses in the country now as before the advent of the Automobile. The important thing is to have these lines in stock when your customers need them.

Trunks, Bags and Suit Cases. The development of transportation facilities and the consequent increase of travel, have enlarged many times the market for these goods. Most people are no longer satisfied with cheap traveling equipment. They know the most economical goods to buy are the better grades. You should occasionally make an attractive display to let your customers know you can furnish a complete line of Hand Bags, Suit Cases and Trunks.

FISHING REELS

HEDDON'S LEVEL WINDING

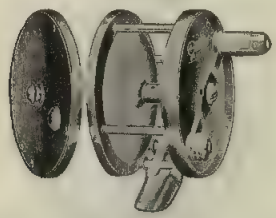
Quadruple Multiplying With Click and Double Handle

Made of best tested hard drawn watch nickel, durable bright satin finish. Stud, shaft, pivots and pinion made of Stubbs drill rod hardened, oil tempered, ground and polished to size. Has improved helixical spiral gears made from special hard drawn phosphor bronze, insuring strength, power and smoothness of action. A steady bar stabilizes the line carriage, preventing all undue friction on the level winding mechanism. The entire level winding device is made of non-rusting material. Equipped with Heddon design crank with white ivory handle. Reel can be completely oiled without taking apart.

No. 3-35L.W. Capacity, 100 yards; length of spool, 1⅝ inches; diameter of spool, 1⅛ inches; diameter of end plates, 2 inches..... Each, $35.00

One in a Leather Case in a Box

DELITE TROUT



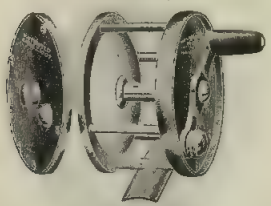
Single Action With Adjustable Back Sliding Click

Made of brass, polished nickel finish; hard rubber discs, reverse metal bound. Bushed for bearings; fancy oil cup on back; balanced flush crank with black celluloid handle; solid metal cross plate or reel seat.

No. 113 Capacity, 60 yards; length of spool, 1 inch; diameter of spool, 2¼ inches .....Each, $2.25

One in a Box

HAWKEYE TROUT



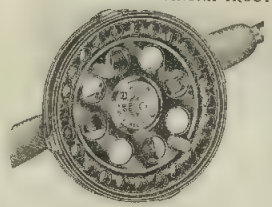
Single Action With Adjustable Back Sliding Click

Made of nickel silver, satin finish treated to prevent rust. Hard rubber discs, reverse metal bound. Bushed for bearings; line shedding adjustable back sliding click and oil cup on back plate; steel pivots. Balanced flush crank with black celluloid handle; solid metal cross plate or reel seat.

No. 263 Capacity, 60 yards; length of spool, ⅞ inches; diameter of spool, 2⅛ inches. .....Each, $4.00

One in a Box

WINONA TROUT



Single Action

Made of one piece cast aluminum, machined all over for perfect balance and true running. It is finished two coats rubber enamel baked on, with polished rims and band. Guard and trimmings are highly nickel plated. The bearing is bronze, the shaft tool steel, the rod plate hard brass. Line is self spooling, backlash reduced to about zero. The adjustable drag makes them practically self thumbing, and what thumbing is required is done on the large polished hub. Their smooth, silent action is a relief to the user. They take apart without tools, have only one place to oil and well holds enough to last several days use. Drag may be set heavy for trolling. Casts and winds perfectly with either right or left hand. Capacity, 100 yards; diameter of spool, 4¾ inches

No.	105	108
Style	Without Line Guard	With Line Guard
Each	$6.00	$7.50

One in a Box

RAINBOW TROUT

Single Action With Permanent Click

Made of cast aluminum and black nickeled. Spindle made of everlasting phosphor bronze. Seat stamped from brass and heavily nickel plated, tapered correctly to fit standard fly poles. White celluloid handle. The rigid frame, the fine hardened and tempered steel click, together with the trueness of the bearings and the perfect mechanical workmanship give perfect balance and beautiful running qualities. Easily taken apart in two pieces by removing one screw.

No.	627	631
Capacity, Yards	35	50
Diameter, Inches	2¼	3¼
Width, Inches	¾	¾
Each	$5.00	5.50

One in a Box

MARTIN AUTOMATIC

Most of the reel is made of aluminum and duraluminum. All parts requiring strength are of brass or nickel silver. Strong, compact and neatly joined together, cannot become loose or shaky. There are no projections on which the line may catch and a nicely fitted line spool prevents all possibility of an entangled line. The direct connection between the main spring and the line spool, makes the "Martin" the most responsive. Equipped with brake lock and brake release operated by one finger or one hand and hook hole in brake release lever for holding hook when not in use.

No.	1	2	3	4
Capacity, Yards	25	30	50	75

One in a Box

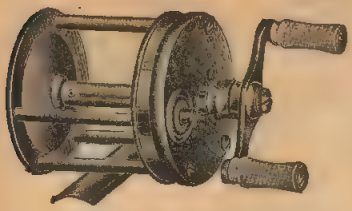
FISHING REEL CASES

Made of genuine sole leather with strap and snap button fastener. Will hold any South Bend reel or reels of similar size having double grip handles.

No. 10 Width, 2½ inches; depth, 4 inches; height, 2¾ inches .....Per Dozen, $18.00

One-Half Dozen in a Box

FISHING REELS



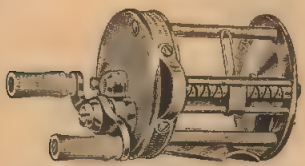
HEDDON'S CASTING

Designed with the front bar left out to facilitate removing back lashes.

The handle is also of new design which fits fingers properly, throwing the hand into the correct, natural position, and contributing against slipping.

No. C3-15—Made of the best, tested, hard-drawn, watch nickel stud, shaft, pivots, and pinion made of Stubbs drill rod, hardened, oil tempered, ground and polished to size; gears made from our special, hard-drawn phosphor bronze; has improved helical spiral gears, insuring strength, power, and smoothness of action otherwise unobtainable; quadruple multiplier, outside diameter, 2 in., length of spool 1⅛ in., diam. of spool head 17-16 in., w't 8 oz., capacity 100 yards, 15 lb. Heddon line; equipped with Heddon design double handle with one in. radius, 2⅜ in. long, which completely overcomes crank vibration and insures better grasp in playing fish; single handle substituted if specially desired, very durable smooth velvet finish.....each $33.35

ONE IN A BOX

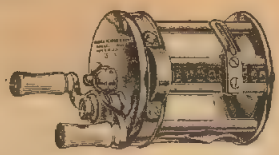


HEDDON'S LEVEL WINDING

Full quadruple multiplying, with exactly the correct ratio of speed between the spool and line carriage to produce that criss-cross or "kite winding" of the line which so effectually presents back-lashing Spiral gears, of a special hard drawn phosphor bronze are so novelly arranged that they are much stronger than are ordinarily used, and also make it possible to avoid the objectionable construction of placing the spool off the center of the reel. Smaller in size, lighter in weight, it nevertheless has a spool capacity of 100 yards of 15 pound test line. Smooth velvet finish that is practically indestructible. Equipped with Heddon designed double handle. Heddon's oiling system, completely oiling the reel without taking it down.

No. C3-35LW—Made of the best, tested, hard drawn, watch nickel; stud, shaft, pivots and pinion made of Stubbs drill rod, hardened, oil tempered, ground and polished to size.....each $51.10

ONE IN A LEATHER CASE WITH OIL CAN, BOTTLE REEL OIL AND TUBE OF VASALINE



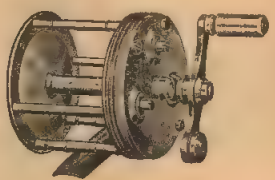
HEDDON'S NEW DOUBLE STEADY BAR REEL NON-RUSTING LEVEL WINDING

This new reel is of the same general construction and same fine material as the No. 3-35 Level Winding Reel. Made of nickel silver, circle finished. Also No. 8 size spool, with full line capacity of 100 yards of 15-lb. test line.

The Double steady bar construction adds long life to the level winding mechanism. Note how sturdy its construction and the unique way in which the line carriage is held in place. This eliminates all friction of the line carriage and transversly threaded shaft.

Also, of vast importance, especially to the Salt-Water fisherman, the entire Level Winding device is made of non-rusting materials.

No. C325—Each $35.55



GENUINE MEEKS

A size very popular in lake regions and in gulf and seacoast fishing.

Spiral gearing, gives strength, power and smoothness of action.

Pinions are of a solid bar of steel drill rod which runs entirely through spool, making pivots and pinions one solid piece and spool perfectly rigid. All pivots and studs tempered, ground and polished to highest degree.

Capacity 160 yds., diam. end plate 2¼ in., length spool 1⅞ in., diam. spool head 1 $^{29}/_{32}$ in., watch nickel silver, balance handle forward, click or click and drag, screw-off oil caps, w't each 8 oz.

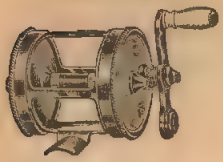
No. C4M—Metal pivot bearings.....each *$32.00*

No. C4MJ—Jeweled pivot bearings.....each *$38.00*

ONE IN A BOX

FISHING REELS

MEISSELBACH

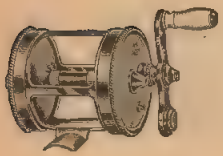


Has take apart feature for cleaning and oiling.

80 yds., 1¼ in. pillar, 2 in. diam., quadruple multiplying, nickel plated, w't 6¼ oz.

No. C3580—Tri-part ...each $ 8.90
No. C3680—Freespool ..each 11.85

ONE IN A BOX



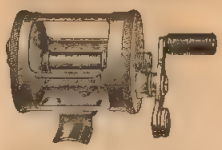
100 yds., 1⅝ in. pillar, 2 in. in dam., quadruple multiplying, tubular frame, made off solid piece of tubing, with flat cross bars, no screws or rivets to work loose, steel pivots and gears, solid steel shaft, rear sliding click, highly nickeled finish with German silver spool, w't 7⅞ oz.

No. C3780—Take-a-part, each $10.35

No. C3980—Free-spool Take-a-part, each $13.35

ONE IN A BOX

BLUE GRASS SIMPLEX

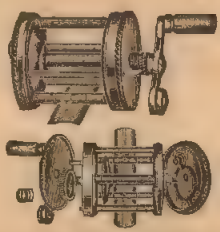


SIMPLEX, 100 yds., 1⅝ in. spool, triple multiplying, with thumb rest, easily taken apart by unscrewing cap on back end and thumb nut on front end, back sliding click off oil tempered steel, brass and German silver, all brass parts finely nickel plated, w't 7 oz.

No C34 Reel is the Free Spool Model for easy casting. The Free Spool Mechanism is the Clutch Principle and Automatic in its Action. The Act of Casting Automatically Disconnects the Gearing from the Spool. The Gearing is Automatically Reconnected to the Spool by the Act of Winding in the Line.

No. C33—Each *$12.00*
No. C34—Free spool ...each *13.00*

ONE IN A BOX



No. C25—Blue Grass Simplex improved, 85 yards, quadruple multiplying, German silver. This reel can easily be taken apart for cleaning, and oiling by unscrewing cap on back end thumb nut on front end of reel. Back Cap has left hand thread to prevent unscrewing when casting. Outside diam. 1¾ in., diam. of spool 1⅜ in., length of spool 1¼ in....each *$15.00*

CREEK CHUB WOODEN MINNOWS

FAMOUS PIKIE MINNOW

Is a near-surface wiggler, or by reversing the mouthpiece makes it a surface splatter. Closely imitates the pike minnow. Equipped with nickel plated mouthpiece, eyes and three bronzed, ringed spear point treble hooks securely set in sockets. Length of body, 4½ inches; weight, ⅝ ounces.

No. 700 Natural Pikie scale finish.....Per Dozen, **$12.00**
No. 701 Natural Perch scale finish.....Per Dozen, **12.00**
No. 702 White with red head.....Per Dozen, **12.00**
No. 703 Silver shiner .....Per Dozen, **12.00**
No. 704 Golden shiner scale finish.....Per Dozen, **12.00**
No. 708 Rainbow color .....Per Dozen, **12.00**
No. 710 White with blue head.....Per Dozen, **12.00**

BABY PIKIE MINNOW

Same construction as the Famous Pikie Minnow, only in smaller size for anglers who desire a smaller bait. Length of body, 3¼ inches; weight, ½ ounce

No. 900 Pikie scale finish.....Per Dozen, **$11.40**
No. 901 Natural scale finish.....Per Dozen, **11.40**
No. 902 White red head.....Per Dozen, **11.40**
No. 904 Golden shiner .....Per Dozen, **11.40**
No. 908 Rainbow color .....Per Dozen, **11.40**

NEW JOINTED PIKIE MINNOW

Is a near surface wiggler, with a smooth, snaky glide, just like the living, breathing minnow. The new jointed Pikie is even more graceful, more life-like, and more deadly. Equipped with jointed body and three bronzed, ringed spear point treble hooks securely set in sockets. Length of body, 4½ inches; weight, ⅝ ounce.

No. 2600 Natural Pike, scale finish.....Per Dozen, **$15.00**
No. 2618 New silver flash .....Per Dozen, **15.00**

FLOATING INJURED MINNOW

Represents an injured minnow—laying on its side—about all in but still able to make a little fuss on the surface. Should be pulled in a series of short jerks to properly imitate a struggling minnow. Bass instantly take it, believing it to be a minnow in trouble and easy to catch Equipped with two nickel plated spinners, and three bronzed, ringed spear point treble hooks securely set in sockets. Length of body, 3⅝ inches, weight, ⅝ ounce.

No. 1505 Red side, scale finish.....Per Dozen, **$15.00**
No. 1518 New silver flash .....Per Dozen, **15.00**

CREEK CHUB WEED BUGS

Takes the place of the Pork Chunk and live frog. It is superior to the pork chunk because it floats when cast, and the hooks are presented in a better position to receive the strike. The head is so shaped to go through the reeds and lily pads and has planes to take the bait up over the moss and weeds. These planes also make a ripple and throw a spray when the bait is retrieved. It has a hook at the rear for attaching the pork rind, and the wave-like motion of the rind makes the lure still more attractive. Length of body, 2 inches; weight, ⅝ ounce.

No. 2800 Weed bug, yellow body, green wings..Per Dozen, **$12.00**
No. 2802 Weed chunk, white body, red eyes....Per Dozen, **12.00**
No. 2819 Weed frog, meadow frog colors.....Per Dozen, **12.00**

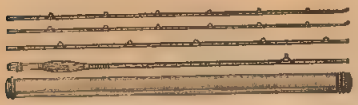
All the Above, One-Twelfth Dozen in a Box; One Dozen in a Carton

HEDDON SPLIT BAMBOO FLY RODS



Made of the finest Chinese Bamboo and only the best selection of strictly butt-cut stock is used. The brown tone or color of this bamboo contrasts beautifully with the yellow and black silk windings.

Built in the regular three-piece construction with extra tip; guides and tip-tops are tungsten steel except the first or butt guide which is genuine agate. All other metal fittings are solid Nickel Silver. The tapered split ferrules are hand fitted to insure a velvet smoothness, and the grip is solid cork. The entire Rod is put up in a beautiful, tan-colored velvet partition bag and the hole contained in an aluminum case with nickel screw-off cap.

No. C35T—Fly Rod for Trout, 9 ft., w't each 4¾ to 5 oz. ..... each $51.10

No. C35B—Fly Rod for Bass, 9½ ft., w't each 5¼ to 5½ oz. ..... each $51.10

SPLIT BAMBOO FLY RODS

No. C202—3-piece Colorado Special split bamboo, one extra tip, 10 in. solid cork grip, made from selected cane, full bronzed mountings serrated and hand welted ferrules, hand made reel plate below the hand, silk wound bronze steel snake guides, and fly tips, closely wrapped with jasper and scarlet silk, finely finished, lengths 9 and 9½ ft., is a velvet covered form and canvas bag, per dozen $355 50

SUNDAY BAIT ROD

No. C72V Hibbard—3-piece, six-strip bamboo, 13 in. joints, nickel plated trimming, making a 6 ft. rod; cluster ring tip fits in 5th joint and one 3 ring tip, 3 snake guides, 1 ring tip, cork grip, nickel plated solid metal reel seat below handle, improved ferrules, trimmed with red, also extra winding between, making rod very strong; put up in a partitioned cloth bag, length 7 ft., per dozen $124.45

SPLIT BAMBOO TRUNK RODS

No. C180 Hibbard—4-piece, bait, six strip split bamboo, shoulder ferrules, solid metal reel seat above fancy polished cork handle, spiral wire guides, ring tip nickel plated trimmings, red and black silk winding, length 7 ft., in a partitioned cloth bag, length in bag 23 in., per dozen $35.55

No. C186—4-piece split bamboo trunk, one extra tip, cork grip, nickel plated mountings, metal reel plate below the hand, plain shouldered ferrules, silk wound snake guides, silk wound at intervals with red and green silk, varnished, length 7 ft., in a partitioned cloth bag, per dozen $53.30

SPLIT BAMBOO COMBINATION ROD

No. C0—Four pieces and extra stout tip, a detachable reversible cork grip, and a metal shortner; four different rods can be made from this combination, a 4-piece 9½ ft., 3-piece 7 ft., fly, a 3-piece 7 ft. bass or bait rod and a 2-piece casting or trolling rod, made from selected cane, full nickel plated mountings, solid metal reel plate, improved ferrules, silk wound nickel silver snake guides, and closely wrapped with scarlet and yellow silk; finely varnished and put up in a canvas partitioned bag, per dozen $195.55

Hibbard SPLIT BAMBOO FLY RODS

3 piece, six strip split bamboo, nickel plated trimmings, shoulder ferrules, solid metal reel seat below cork grip, ring tie guides, fly tip, red and green silk wound, w't about 6¾ oz., in cloth bag.

No. C165 Hibbard—With extra tip, length 9¼ ft., per dozen $39.10

No. C155 Hibbard—Without extra tip, length 9 and 9¼ ft. .....per dozen $26.65

No. C167 Hibbard—3-piece and extra tip, six strip high grade split bamboo, nickel plated shoulder ferrules, solid metal reel seat below cork grip, snake guides, fly tips, closely wound with red and green silk, length 9¼ ft., w't about 7¼ oz., in a cloth bag.....per dozen $71.10

No. C169 Hibbard—3-piece and extra tip, fine quality six-strip split bamboo, nickel plated mountings, welted shoulder ferrules, snake guides, fly tips, solid metal reel seat below cork grip, very closely wound with red and green silk, cluster winding on butt, length 9¼ and 10 ft., w't about 7 oz., on cloth covered form in cloth bag, per dozen $71.10

4-piece, fly, shoulder ferrules, solid metal reel seat below fancy polished cork handle, ring tie guides, ring tip, nickel plated trimmings, red and black silk winding, length 7 ft., in a partitioned cloth bag.

No. C185 Hibbard—Six strip split bamboo, length in bag 23 in. .....per dozen $35.55

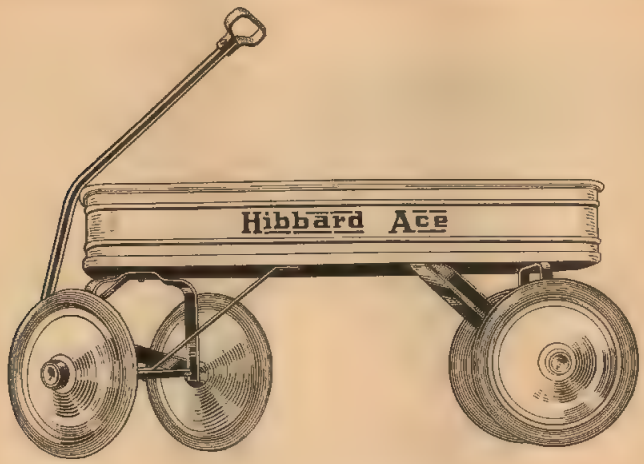
SIXTH DOZEN IN A CRATE. WE DO NOT BREAK CRATES

Hibbard ACE

ALL STEEL COASTER WAGON

Here is a quality wagon at a popular price. This wagon will withstand the most severe tests or hardest usage



Box—The wagon is built of high grade 20 gauge steel. The top edge has pleasing roll as illustrated. The sides of the box are beaded for strength and appearance. Bottom of box is beaded and reinforced with heavy steel plates in all places subject to strain.

Undergear—The undergear is of heavy channel steel construction, with large axles—easy to assemble—and so formed and designed as to stand up under most excessive strains.

Wheels—The wheels are heavy double disc type—with contained roller bearings. The hub caps for these wheels, are exceedingly attractive—easy to put on, and when on, stay on.

No. M810—Size 14×34 in., 10 in. double disc wheels with self contained roller bearings and 1¾ in. rubber tires, shipping w't 88 lbs. ..... each $8.00

ONE IN A CARTON

Hibbard All Steel Racers

STRONG - STURDY - SPEEDY

Body—Extra heavy steel with ¾ in. roll around top and wide panel around bottom of removable box. Two iron cleats across bottom with hook attachments on sides makes this the simplest and best device used for detaching box from bottom. This is a distinctive and exclusive **Hibbard** Feature.

Gear—Arched Channel Steel, supported by strong iron braces, making this a very rigid construction. Cold rolled steel axles.

Wheels—10 in. Double Disc, Roller Bearing, with Corrugated rubber tires.

Handle—Tubular Steel, curved and equipped with loop grip.

Finish—Box in bright red enamel, stenciled in gold. Bottom in baked black enamel. Gear in black enamel. Wheels red and striped in yellow.

SPECIAL FEATURES—THREE PLY STEEL — no riveting — no welding. SELF-CONTAINED roller bearings - double spacer. TIRES held securely in deep groove. SMOOTH SURFACE avoids rim cutting of tires. EXTRA LARGE HUB. HEAVY METAL DISCS. HEAVY PANEL around bottom. SLIDING CLEATS to detach box from bottom. LARGE ROLL around top. CATCHES RETAIN cleats and reinforce inside of box. STEEL CLEATS reinforce bottom.

Extra Wide and Deep Removable Body.

No. M500—Body 14½x33½ in., 10 in. wheel, black enamel handle, 1 in. balloon tires, shipping w't 38 lbs..... each **$10.55**

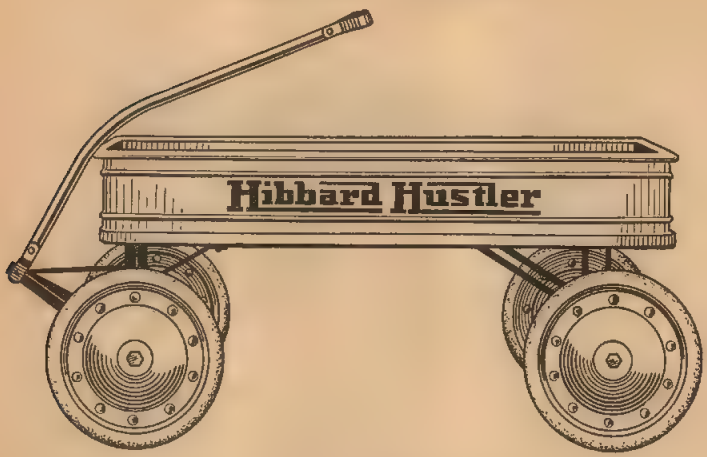
Hibbard Hustler

ALL STEEL COASTER WAGON



This All Steel Coaster Wagon Is:

The first choice of discriminating people, because they recognize in it a maintenance of the same high quality of design, material and workmanship that characterize the other products in our line of juvenile wheel goods.

Hibbard Hustler Coaster Wagons are built entirely of stamped steel. They are so engineered that by means of stiffening and beading an unusually staunch and sturdy wagon is produced without excessive weight. Their trim and pleasing design makes an instant appeal to all children.

Some of the features in design and construction which make these Wagons a product for service are: **WAGON BOX**—Heavy stamped steel beaded to obtain maximum stiffness. **ROUNDED CORNERS AND LOCK SEAM BOTTOMS**—Cannot come apart and will stand excessive hard usage. **WHEELS**—Double disc. Heavy steel type discs rigidly riveted together **ROLLER BEARINGS**—Self-contained hardened roller bearings, free of friction and a guarantee of service and easy running. **RUBBER TIRES**—Of highest grade rubber wired on the wheel in a deep channel to prevent thm from rolling off at sharp turns. **HUB CAPS**—Automobile style put on with special hub cap wrench which is furnished with each wagon. **HOUND**—The hound is stamped of heavy steel and is placed to withstand severe jolts. It extends sufficiently in front of the wagon to enable a comfortable position for the rider to steer with the handle when coasting. **FINISH**—All parts are of an attractive enamel finish and are baked at a temperature to procure the best results. **PACKING**—Each coaster is packed in a certified dustproof carton keeping wagon clean and fresh looking at all times

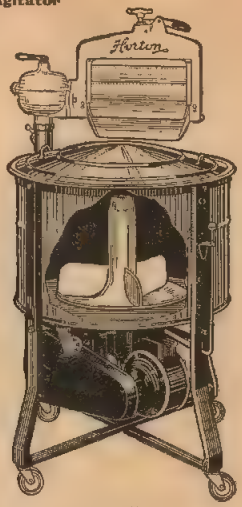
HORTON ELECTRIC WASHER

With Three-Wing Submerged Agitator

Closed View.



Phantom View.

Finest washer of the agitator type which can be manufactured. Made of very best quality materials and workmanship shows ability of skilled designers and mechanics.

Guaranteed for one year. Guarantee is backed by the pioneer in the washing machine industry.

Mechanical features give exactly what is wanted in an electric washer.

The Agitator—Special, three-wing, cast aluminum one piece construction provides a new standard of swift, gentle, and efficient washing action which thoroughly cleans the clothes in a remarkably short time.

Agitator scientifically correct, permitting the washing of a few garments as easily and quickly as the recommended load. Design of agitator is result of careful research and many years of practical experience with all types of washing machine agitators. The agitator is at the bottom of the tub.

The Chassis—Frame-work, or chassis, of great strength and rigidity without excess weight. Four channel steel legs are an integral part of the chassis and give perfect balance.

The Mechanism—Suspended on the chassis beneath the tub. Mechanism is self-lubricating. Machine cut gears insure long life, makes washer run quietly and absolutely without vibration.

Metal Frame Wringer—Equipped with the famous Horton, metal swinging wringer with reversible drain board. A safety lever instantly separates the large, full size rolls. The start, stop, and reverse lever is readily accessible.

Wringer Rolls—Made of semi-soft rubber, full size. Made especially for Horton and their construction is such that the clothes are wrung extraordinarily dry without injury to buttons or other fastenings.

Heavy Duty Motor—Made to Horton quality manufacturing standards, and at all times delivers ample power to wash and wring at the same time.

Compact Design—Perfectly balanced and proportioned, requires very little floor space. Four large roller-bearing casters used making it easy to move the machine when desired.

Sturdy Construction—Compare the sturdy construction with that of any other washer.

Copper Tub—Heavy copper tub rests securely on the chassis. Inside of the tub is nickeled, and the burnished outside is protected with a beautiful Horton finish. Tub is 23 inches in diameter—14 inches deep, made of 18-ounce copper. Tub, when filled to water line, holds 15 gallons of water. The submerged agitator makes it possible to wash a single piece or a full load as required. Water should be used in proportion to load Where only a few pieces are to be washed, water should never be lower than an inch above the blade of agitator.

No. W340—Shipping w't crated, 262 lbs. .....each $202.20

THE Hibbard SPOTLESS ELECTRIC WASHER

DOLLY TYPE

WOOD TUB. STAVE LEG

All parts entering into its construction are of the highest quality material and workmanship. Accurately cut gears completely enclosed and encased in hard oil. Tub is made of selected Southern Cypress, "the wood everlasting." All power mechanism under the frame out of the way.

Simple in operation. The agitator operates at good speed, and forces boiling suds through the clothes, washing them clean without injuring them.

Frame, stave leg fitted with easy rolling casters.

Motor is splash-proof type of excess power to take care of heavy load on both washer and wringer. 110 volts, 60 cycles.

Swinging wringer with special 12 in. power electric rolls. Equipped with lever that permits swinging and locking of wringer in three positions. Shifting lever starts and reverses rolls.

No. W44 Hibbard—Spotless Stave Leg, shipping w't 125 lbs. ..... each **$105.00**

THE HOHNER-SAX

A New Creation For the Nation

The Hohner-Sax, a product of the world famous M. Hohner factories, is a practical musical instrument of an extremely novel character which will afford fun, education and music for millions. It is an instrument distinctly unique and promises to become popular throughout the country.

In appearance, the Hohner-Sax closely resembles the saxophone. In a very few moments and without knowledge of music, anyone can learn to play this ideal instrument. The popular price, the exceptionally pleasing music which it affords, its unique shape, all are features that will go to make this instrument the choice of millions of people. The dealer who is ready to meet this demand will be the one to enjoy the profits.

No. C22B—Hohner-Sax, length 17½ in., constructed throughout of heavy brass, highly polished; has 10 treble keys with 2 sets of blow and draw reeds accurately tuned, 2 bass keys, regular saxophone bell and goose-neck mouth piece.....each $7.35

ONE IN A CARDBOARD BOX

HOHNERS ORGANETTE OR BLOW ACCORDION

A real popular musical instrument. A novel and attractive musical instrument which affords an abundance of real, good music. This ideal instrument promises a world of amusement, and as a gift, it is sure to prove most acceptable.

No. C14B—Organette, length 14¾ in., constructed throughout of heavy brass highly polished, has 10 keys, 2 bass keys, metal mouth piece and bell, all finely nickel plated .....each $3.35

OIL PUMPS.

Glass Cylinder. Self-Measuring.

Made for attachment to any 15, 30, 55 or 60 gallon steel drum with 1½ inch bung opening; bushing for 2 inch bung provided if ordered; pump is self-measuring, exactly 1 quart at each revolution; no stop setting; a pure glass cylinder; bottle filler nozzle and drip pan for holding can or measure, also returns drip to barrel.

No. 8. Wt. each, 29 lbs...Each **$15 00**

Made of very best material; heavy cast iron cylinder ends; brass cylinder; valve ground to seat; will pump four gallons of medium oil per minute.

Rothweiler. Fits in the small ¾ in. hole in head of drum. Wt. ea., 8 lbs. Ea. **$8 00**

JACKS.

RELIABLE. HYDRAULIC.

Operates with great simplicity; to raise the jack, the operator need only pump the handle; he can use a full stroke of 50 inches, or he can use a stroke of 1 inch, being limited only by circumstances. No complicated ratchets, dogs, foot levers, chains or toggles. The jack works on the well known hydraulic principle; the release valve is controlled by the lever down on the side of the handle; opening the valve, lowers the load—at once or by degrees as the operator prefers. The saddle swivels and the jack will swing under the wheels, to the right or left, front or rear. Roller bearings on the wheels, roll the jack to position with minimum effort; has ample clearance for use on uneven floors. To place in position, pivot the jack on the rear wheels and push down on the handle.

FOR ALL PASSENGER CARS.

No. 50. Low point, 4½ inches; high point, 15½ inches—eleven inch raise; length of jack, 4 ft.; length of handle, 44 inches; overall length of jack and handle, 7½ ft. Wt each, 133 lbs. .....Each **$50 00**

FOR TRUCKS. CAPACITY, 7 TONS.

No. 70. Built on the same proven principle as No. 50, but is heavier and larger throughout. The pump is bigger and the frame move massive, while every part has been reinforced to give the added strength a jack of this capacity requires. Low point, 7 inches; high point, 17 inches; length of jack, 52 inches; length of handle, 44 inches; length overall 8 ft.; capacity, 7 tons. Wt. each, 235 lbs...Each **$100 00**

HOLMES CANTILEVER.

Capacity, 5000 Lbs.

Combines the well-known and efficient cantilever principle with specially designed lifting rockers mounted on roller bearings, permitting an extremely high and an extremely low position with maximum efficiency and rigidity; reversing just as simple as the raising; handle is pushed down to raise and pulled up to lower; no pawls or levers to operate while raising or lowering, yet an eight-inch or a whole stroke of handle can be taken. The weight of car is not transmitted to handle when lowering; maximum load can be easily lowered with one hand; can adjust load to 1/100 part of an inch; will go under the axle of any car with flat balloons; starts at 6 inches from the ground; platform post is adjustable in ¾ in. steps to 9 inches; this adjustment plus lever lift of 8 inches gives a total height of 17 inches; operating lever locked by slight push on small button mounted in handle. The large wheels and lifting rocking roller are mounted on roller bearings. Frame members, solid steel from end to end ⅜x2¾ in.; lift, full 8 in.; minimum height, 6 in.; maximum height, 17 in.; post adjustment, 3 in.; clearance under frame, 1¼ in.; diameter of wheels, 6 in.; length with operating lever extended, 7 ft.; length with operating lever folded, 4 ft.; length of operating lever, 3 ft. 6 in.; overall width at rear wheels, 14 in.

Holmes Cantilever. Capacity, 5000 lbs.; steel wheels. Wt., 131 lbs. Ea. **$38 00**

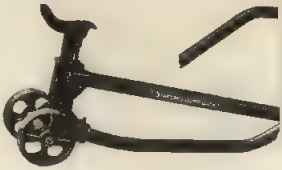
BARREL TRUCKS.

Front casting has two deep grooves in which the chime of steel or wooden barrel fits snugly; front groove is for 50, 55 or 60 gallon drums; second groove is for 15, 30 or 35 gallon size. Slide the barrel over back of frame, setting chime in grooves on front casting, tighten up two rear clamps and you have a real solid unit. Tested for 1000 lbs.; handle is well made; wheels are large and broad.

Handy Ben. Wt., 30 lbs....Each **$8 50**

JACKS.

GARAGE.



Quick Lift.

Wheels and rack bar made of malleable iron; the top lifting cap is so designed that it can be placed under axles with truss rods.

No. 60. Wheels, 5 inches diameter; bar rack lowered, 10½ inches; bar rack extended, 17 inches; width overall, 9½ inches. Wt., 34 lbs...Each **$10 00**

AUTO JACKS.

3-Ton Truck.

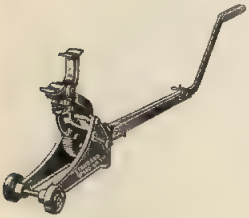
Malleable.

Designed particularly for use with the smaller type of truck. Simple of construction of large capacity, and very easy to operate, self-locking at any point. Quickly adjusted, has extension handle.

No. 34. Capacity, 6000 lbs.; height, lowered, 10¼ inches, raised, 16 inches; diameter screw, 1 inch. Wt. each, 8½ lbs. .....Each **$3 20**

JACKS.

GARAGE.

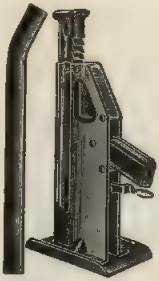


SPEED LIFT.

For tire stations and garages. Short stroke handle; wide range of lift; especially suitable for unloading automobiles; short stroke handle for the lowest and deepest overhung cars with tire carriers and bumpers.

No. 61. Low lift from 3⅛ to 17 inches. Wt. each, 60 lbs..Each **$17 50**

AUTO JACKS.



All Steel.

No. 202. Sturdy, neat and light. Capacity, one ton; lifting range 8⅛ to 14½ inches; handles of round edge planished steel; finished in black enamel. Wt. each, without handle, 3 lbs. .....Each **$1 50**

5-Ton Truck.

Malleable.

Absolutely the most durable jack made for a five ton truck.

No. 38. Capacity, 5 tons; height, lowered, 11 inches; raised, 16 inches; diameter screw, 1¾ inches. Wt. each, 12 lbs. .....Each **$4 70**

Meccano Transformer

No. G5722—(Meccano Transformer)—For operating electric motors direct from house current. For 110 volts 60 cycles A C only. . . . Each **$3.34**

HORNBY MECHANICAL TRAINS

With the introduction of Hornby Trains commences a new era in mechanical trains. Distinctive in design and perfect in workmanship, Hornby Trains possess those qualities for which both dealers and public have waited so long. They represent the most advanced type of train and have locomotives of pressed steel instead of cast iron. These are beautifully lithographed in colors like the new colored locomotives on the B. & O. and Great Western Railroads. The spring motor that operates them is the most efficient ever produced, powerful and speedy, and it has accurately cut gears that ensure smooth running. Hornby Trains will put new life into your mechanical train business and it will not be long before any goods of lower standard than the Hornby Trains will be unacceptable.

No. N74045—(Set No. 1) Consists of locomotive, tender and two cars, all beautifully lithographed in colors, with ten sections of track (2 straights and 8 curves) and the necessary track connections. Colors: Locomotive, red and black with gold trimming. Cars, green and gold, as illustrated. Packed in an attractive carton with beautifully lithographed label.
Each **$5.00**

No. N74045—(Set No. 2)
Contents are the same as Set No. 1, but differently colored. Colors: Locomotive, green and black with gold trimmings. Cars, yellow and black.
Each **$5.00**

Feature Hornby Trains in Your Store and Watch Your Sales Grow!

The New

MULTICOLOR MECCANO

Windmill

The Pioneer 25 Years Ago
The Leader Today

The introduction of colored parts last year proved to be a most popular move, and sales increased very substantially. Dealer after dealer reported sold out entirely and the only limit to sales was the available stock.

This year further attractive features have been added. New parts have been introduced, the presentation of the sets has been improved and a special feature has been made of the popular $1.00 commencing outfit. This outfit is now much larger, shows special value and will make many new customers. Outfits No. 3x and upwards are packed in handsome wooden boxes well finished.

This will be a Meccano Year!

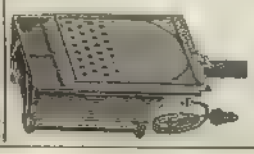
CORN POPPER

A new item that is bound to be a winner. Note the reasonable price



1H1207 [illegible] with cord and plug, in box Each **$1.38**

Hubley

Indian Motor Cycle

with side car and cop

There's no argument about it! The New Hubley Indian Motor Cycle toy is a winner! Every child who sees it wants one of these realistic motor cycle cops.

The color combination is striking—red, black and shiny nickel. As the Motor Cycle is pulled by the string, it makes an exhaust noise that helps to sell the toy.

The Hubley Indian Motor Cycle is 9 inches long, 5 inches wide and 5½ inches high. The tires are real rubber and the cop is detachable.

Retails at $1.75—a popular toy at a popular price.

Breaking All Records!

Hubley Red Devil Racer

Here is a fascinating new toy that is setting the pace in the iron toy field. Such realistic design and such attractive color that you simply can't resist its clever appeal. It is one of the outstanding successes of the year.

The Red Devil Racer is pulled by a string and as it rolls it makes a real exhaust sound. Children are fascinated by it. The size is 10 inches long, 4 inches wide and 4 inches high. The body is bright red, black and nickel and it has honest-to-goodness rubber tires.

The Red Devil Racer retails for $2.00 and there's a good profit in it for you.

Write your jobber for prices. If he cannot supply you, write us.

JUVENILE AUTOMOBILES

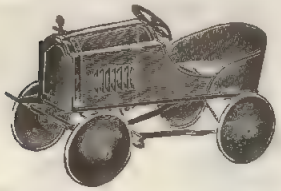
A NEW DRIVE GEAR ON OUR AUTOMOBILES

This gear makes it possible for a child to speed along in his automobile, up-hill and down, as easily as on a velocipede. It makes the auto a real toy.

The new gear is on the rear axle and operates on the ratchet and pawl principle. A full stroke of either pedal turns the axle three-quarters around. There is no dead center. It starts from any position with either foot or with both feet together. It is automatically adjustable to any length stroke that suits the child best.

This gear and special suspension springs are regular equipment on all our autos, beginning at No. 270, at no extra charge. This is going to be a great selling point, and easy to demonstrate to your customers.

Moon



Construction—All steel body, frame and gears. Front selected hard wood. Frame reinforced with steel cross members, supporting body and gears. Body 12½ x 24½ inches.

Ives' 59th Anniversary Announcement

Sweeping Price Reductions

Finer quality—added features make the 1927 Ives line the world's greatest train buy!

Ives celebrates its 59th anniversary with important price reductions, reflecting the aggressive spirit of this Corporation. The savings on mechanical trains are from 33 1/3% to 40%. And no let-down in quality! The same high grade construction and workmanship that has made this line famous throughout the toy world for over 40 years will be strictly maintained.

Super-Value Electric Trains

Typical examples of superior value in Ives 0 Gauge Electric Trains are a three car, reversible locomotive outfit retailing at $8.00 and a big, three, 9¼"-car, reversible, electrically lighted outfit retailing at $10.00.

In addition to the brand new train numbers being shown, *every* Ives electric train incorporates new features for 1927. These improvements include an entirely new series of cars — new all-steel locomotives—completely new compound geared, heavy duty motors — improved automatic and hand reversing devices — new accessories and novel color combinations.

Get the complete Ives proposition before placing your 1927 train order.

GOODY ART COMPANIONS

This is the JEFFERSON Midget

5 Models to operate Every Electrical Toy train

LEADING TOY BUYERS specify Jeffersons for *all* their electrical toys. *Some of the reasons*

Jeffersons are the best known, easiest to sell. Deliver full power at maximum voltage. Stand 25% overload. Oversize core and windings. Moisture-proof case—ventilated

Separate rheostats eliminated by small, uniform voltage steps. Built to Underwriters' specifications. Cartons marked, showing trains, etc., each model operates.

Complete line — 5 models. Guaranteed by pioneers and largest makers of toy transformers.

Lower in price despite their superiority. Investigate! Compare!—and you, too, will insist on Jeffersons. Ask your Jobber for Jeffersons — or write us.

UNIVERSAL TOY TRANSFORMERS

Announcing

Improved Jaxon Doll Stand

Flat Tubular Upright

(Patent Applied For)

Base and upright sprayed with light taupe enamel. New type flattened drawn steel tube absolutely prevents doll from swinging. Easily adjusted for height.

Stands are made with removable top to save space in shipping. This appeals to the jobber, as he can carry a good sized stock in small space. Shipped at third class freight rate.

Upright being made crank shape it quickly screws into base without any tools.

Jobbers: Write at once for attractive proposition. Dealers should get orders in early, specifying future shipping date.

Keystone Heavy Duty Toys Equipped With Rubber Tires

MOVING VAN

(Mfr's No. 58). **Covered Body Truck** in very elaborate red color made to appear like real Moving Vans. A real substantial look with key for full paneled doors in the rear. Plenty of room for doll house furniture, etc. Van is 26½ inches long, 11½ inches high, 7½ inches wide. Packed each in carton.

No. 82N53. Each..... 4.20

U. S. MAIL TRUCK

(Mfr's No. 45). **Covered body with heavy grill work** that enables you to see the load contained therein. Rear doors fit tightly and can be fastened with substantial lock and key that is provided. Each truck is equipped with mail bags and has an enameled olive drab green body as is used by the United States Government. 26 inches long, 10½ inches high and 7½ inches wide. Packed each in carton

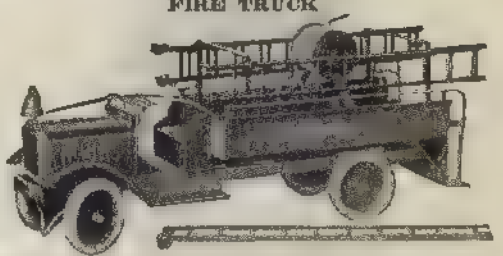
No. 82N52. Each 4.50

SPRINKLER TANK

(Mfr's No. 53). **The tank on the Keystone Chassis** is extra large, measuring 5½ inches by 12 inches. The water actually sprays and does not just drip down. The tank will hold 4 quarts of water and has a large brass valve faucet. The improved sprinkling arrangement hooks on to the back of the chassis in a very simple manner. Tank is made of heavy perforated curved brass tube with enameled green steel hangers and machine is 25½ inches long, 10½ inches high. Packed each in carton.

No. 82N56. Each..... 4.80

FIRE TRUCK



(Mfr's No. 48). **Equipped with 4 extension ladders,** extra large hose reel with 20 feet of non-curling hose cord with a heavy brass screw machined nozzle and coupling. Has brass railing in front and sides. Bracket on rear foot step allows extending of the ladders 5 feet, 6 inches high. Swinging brass bell on front. The truck has red enameled finish. Is 27½ inches long, 11 inches high and 8½ inches wide. Packed each in carton

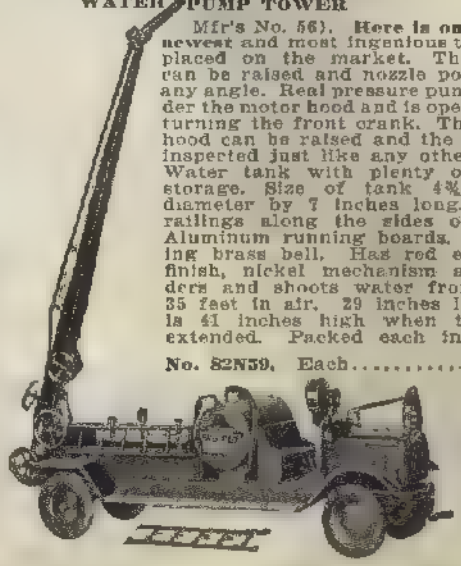
No. 82N54. Each 5.40

CHEMICAL PUMP ENGINE

(Mfr's No. 57) **Real pressure pump** is under the motor hood which can be raised and is operated by turning the crank and will shoot water from 20 to 35 feet in air. Real rubber hose with brass nozzle. Extension ladders that will attain a height of 5½ feet. Brass railings along the sides of truck to the back step. Water tank with brass connection. Size of tank 4¾ inches diameter by 7 inches long. Swinging brass bell on front. Engine is 27½ inches long, 10¾ inches high and 8½ inches wide. Has red enameled finish. Packed each in carton.

No. 82N60. Each..... 7.20

WATER PUMP TOWER



Mfr's No. 56). **Here is one of the newest** and most ingenious toys ever placed on the market. The tower can be raised and nozzle pointed at any angle. Real pressure pump is under the motor hood and is operated by turning the front crank. The motor hood can be raised and the "motor" inspected just like any other truck. Water tank with plenty of water storage. Size of tank 4¾ inches diameter by 7 inches long. Brass railings along the sides of truck. Aluminum running boards. Swinging brass bell. Has red enameled finish, nickel mechanism and ladders and shoots water from 20 to 35 feet in air. 29 inches long and is 41 inches high when tower is extended. Packed each in carton.

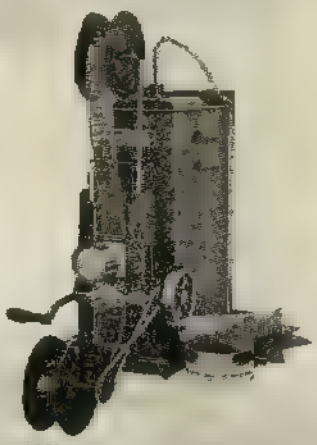
No. 82N59. Each..... 9.00

Keystone Moviegraph

Equipped with a reel of Tom Mix standard gauge non-inflammable movie film. This is a combination machine. Simple to operate. Every machine guaranteed. Just ordinary electric house current and ordinary bulbs are required. Catalog of additional films with every machine together with compartment slides, advertising slide, a supply of tickets, bill posters, usher's arm bands, and a sheet of simple instructions. The machine of steel construction, crystallized leather finish, wooden base with rubber tips on the bottom so that it will not scratch the furniture.

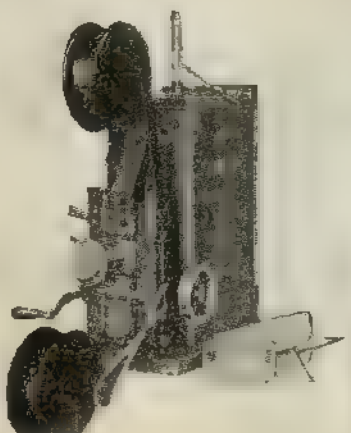
(Mfr's No. 575) **Size 5¾x8¾x10 inches** (exclusive of film spool illustrated). Equipped with 4 ft. new Tom Mix film. Adjustable lens, fixed electric socket, six feet of cord with plug, also play equipment. Packed in carton.

No. 82N80. Each..... 3.35



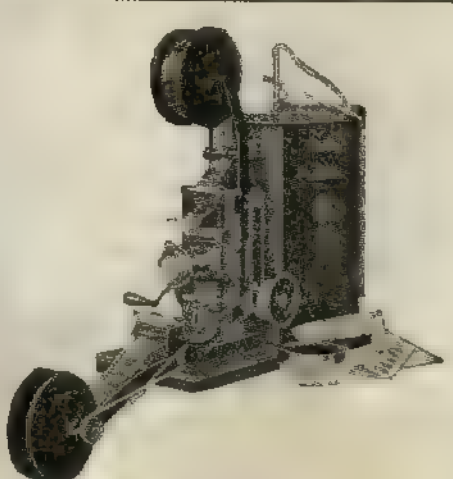
(Mfr's No. 195). **Size 6¾x14¾x19 inches.** Equipped with 10 ft. new Tom Mix film. Adjustable electric light socket. 6 feet of cord with plug, large adjustable lens, nickeled film guide. Each in carton.

No. 82N81. Each..... 6.67



(Mfr's No. 261) **Size 6¾x14¾x19 inches.** Equipped with 37 feet of new Tom Mix film. This reward arrangement will accommodate 200 feet of film. Electric socket adjustable to any size bulbs, geared adjuster on fancy powerful set of lenses, nickeled polished fly wheel, highly polished reflector. Each in carton.

No. 82N82. Each..... 10.00



(Mfr's No. 154). **Size 6¾x14¾x19 inches.** Equipped with 50 feet of new Tom Mix film. This is the best model made by the manufacturer. While this is a toy it is very often purchased by adults for practical use. Has three sprocket barrels, an advance sprocket, a driving sprocket and a take-up sprocket, releasing all tension of the film. The reel arms are a stationary part of the machine and do not need to be assembled. Three high power french lenses, double convex. Highly polished reflector. Nickeled brass pulleys, chains, etc. Will show life size pictures. Each in carton.

No. 82N83. Each..... 16.67

The "Little Brother" Pool Table

Here is something more than a toy—it is a real pool table—a little brother of the table grown-ups play on—it appeals to every youngster who sees it

Dad gets a real kick out of playing with the youngsters on a Little Brother because he can place his shots and make the balls behave just like he does on the big tables.

Keep the balls and cues on a Little Brother table and watch the grown-ups play on it, and they will be quick to buy when you name the low price it sells for.

You'll find that the Little Brother will be the best seller in your toy department.

The Little Brother Pool Table is 19 inches long, 13 inches wide and 4½ inches high It is made of heavy steel—full-finish, coated stock with gold finish lacquer back. It stands on six sturdy legs that will support a weight of more than 75 pounds. The entire top is pressed from a single piece of steel—it has no notched corners to weaken it

A Real Pool Table NOT a Flimsy Toy

Quick Sales Good Profits

The LITTLE BROTHER is an all year round seller. Display creates instant desire to purchase and its low price is within reach of all.

A trial order will convince you.

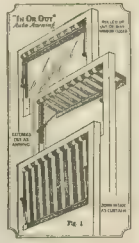
WAYNE PAPER GOODS CO., Manufacturers, Ft. Wayne, Ind.

Dunn In or Out Auto Awning and Window Shades

Dunn Mfg. Co.
Clarinda, Iowa

THE above company announces a combination awning and window shade which can be used inside or outside the glass. It is mounted on the inside of the window frame with a black enameled metal fitting. The upper end supports the shade roller, while the lower end carries the offset curtain rod. The shades are made from a heavy striped awning duck in various color combinations with a fringed edge to match. The automatic tension control prevents the awnings from flapping in the wind, yet does not interfere with instantly winding it on the roller. It holds the drawn shade snug against the glass. It lists at $2.50 a curtain



Safe-Turn Signal

Safe Turn Signal Co., Buffalo, N. Y.

THE above company announces the Safe-Turn Signal for signalling the driver's intention of turning, stopping, etc. The signal is fastened to the frame of the windshield under the sun

visor. A touch on a lever in front of the driver causes the arm of the signal to shoot out a sufficient distance to the left so that it can be plainly seen by cars coming from both directions. When it shoots out, it flashes three times and stays lit. The light flashes can be seen clearly in the daytime

Gas Soldering Furnace

Yost Mfg Co., Meadville Pa.

THIS company announces its gas soldering furnace for the garage and battery service station. The inner lining is made of fire brick covered with sheet metal. The adjustable mixers can be regulated so that with the usual

pressure it will consume 92 per cent air and only eight feet of gas per hour. It is made in two sizes, single and double burner. The furnace can be supplied for either natural or manufactured gas and with pipe or hose connection

Porter-Cable Kwicksaw

Porter-Cable Machine Co.
Syracuse, N. Y.

THE product announced by the above company is a light electrically driven hand saw for wood cutting which operates at high speed. It is mounted directly on a special motor armature which runs in two precision ball bearings,

packed in grease. The outfit weighs ten pounds and can be operated with one hand. Standard equipment consists of 10 ft. of rubber covered conductor cable with duplex plug and one 7 in. combination saw which may be used for both ripping and cross cutting.

Ever-Easy Cushion

Motor City Spring Co.
Detroit, Mich.

THE Ever-Easy cushion, manufactured by the above company, is made in a variety of leather and upholstery fabrics and can be had to match the car interior. High grade Marshall springs are used, each spring wrapped in a fabric cell and heavy felt padding on both sides gives remarkable softness. The design and construction prevents packing.

Manley Inside Water Station

Manley Mfg. Co.
York, Pa.

ANNOUNCEMENT is made by the above company of the inside water station which may be attached to a post, a wall or any desirable place in the garage. It does not require special support to bolt it. It provides a clean and practical method of supplying water for radiators. It is equipped with an automatic faucet. Special pulleys take care of the water hose and keep it up out of the way when not in use. Price is $2.50.

De Luxe Radiator Ornaments

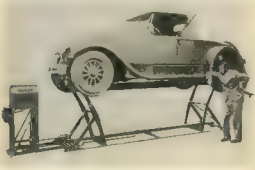
Kingsley - Miller Co., Chicago, Ill.

THE above company announces its new series of de luxe radiator ornaments. They can be used equally well with or without the Moto Meter. The ornaments are in five designs, one being illustrated.

Manley Auto Elevator

Manley Mfg. Co., York, Pa

THIS is an electrically operated, mechanically driven elevator that is said to require a space of only 3 ft. by 17 ft. It raises the car in a vertical plane, the lifting being done at the front and rear axles which rest on two longitudinal rails. The elevator is self-locking in any position even when the electricity is turned off, the operating chain disconnected, or the driveshaft unloosened. The elevator is built throughout of steel. The capacity is 6000 lbs. with a margin of safety. Height in lowest position is 7½ in. and at full height the car is raised to 48 in. Weight approximately 1500 lbs. The open work construction and quick centering of car enable the elevator to be used as a wash rack, and for changing tires, greasing, etc. The drive assembly is completely enclosed and includes a 5 hp. motor available in any voltage. Prices range from $445 for the 60 cycle, 3 or 3 phase A.C., to $560 for the 115, 230 volt D.C. outfit



Williams Start-O-Matic

Williams Bros. Aircraft Corp.
San Francisco, Cal.

THE above company announces its Start-O-Matic which automatically takes care of automatic cranking. The re-cranking feature is under the influence of a feeble current from the generator which releases a small armature allowing a spring to close a circuit to the main switch only when the engine comes to a dead stop, at which point the main switch of the Start-O-Matic comes into action,cranking or re-cranking the engine. If the engine fails to continue its rotation, the operation of cranking is repeated and continues until the engine is running on its own power. The device requires about thirty minutes to install and lists at $9.50.

Jumbo Kleenaire Heater and Ventilator

Price-Hollister Co., Rockford, Ill.

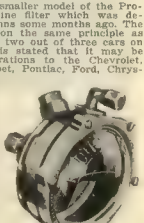
THIS is a combination heater and ventilator and is claimed to be the only air draft type heater that operates successfully on cars equipped with radiator shutters. The heating element is of close grained cast iron guaranteed against cracking and leaking. The control valve is patented and of the duplex type with all moving parts made of bronze. The register unit is cast aluminum and is featured by the cam control, which at the half open position is for heat and full open for ventilation. It is claimed that the heater will not fog windows. Three models fit all cars. The No. 60 fits cars with exhaust pipes of 1¼, 1⅝ and 1½ in. and No. 61 fits cars with pipes up to and including 2¼ in. Both of the models are priced at $10. The No. 65 is a de luxe model with oversize heating element and is priced at $20. The No. 100 is a Twin register sedan type providing one register for front and one for rear compartment and is priced at $20.

Junior Model Protex-A-Motor

Protex-A-Motor Mfg. Co.
Pittston, Penna

THIS is a new and smaller model of the Protex-A-Motor gasoline filter which was described in these columns some months ago. The new model operates on the same principle as the standard and fits two out of three cars on the road today. It is stated that it may be applied without alterations to the Chevrolet, Dodge, Essex, Whippet, Pontiac, Ford, Chrysler "50," Erskine, Flint, Falcon, Maxwell, Oakland, Oldsmobile and Star cars

In the first operation of the filtering circuit the fuel comes in contact with a deflector which breaks up the heavier-than-gas water particles which drop into the sump by the force of gravity. The gas then passes on into the separating chamber. Here it is strained through a fine screen which is set at an angle, after which it is filtered through a chamois and allowed to enter the vacuum tank.



Jumbo Tow Cable

Price-Hollister Co.
Rockford, Ill.

THE above firm announce a tow cable guaranteed to pull 5 tons. The cable has a double line at each end for fastening and is provided with patented non-slip malleable iron cable hooks. A rubber chafing guard or covering at each end protects the car and three wire clips keep the cable in a neat coil when not in use. The over-all length of the tow cable is 15 ft and the material used in construction is a high grade steel. List price is $3.50.

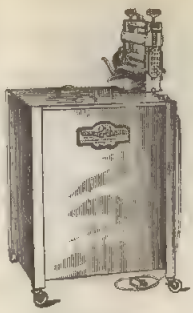
WASHING MACHINES

O. K. ELECTRIC

Cabinet Washer



CYLINDER—Eight-sheet capacity; made entirely of hard maple. The clothes are contained in the cylinder, and do not come in contact with any metal parts; therefore no danger from rust or corrosion.
CYLINDER ACTION—Cylinder reverses itself at each complete revolution, which gives the best washing action known to the cylinder type washer. Keeps the clothes constantly in motion, without wadding or twisting.
WRINGER—May be adjusted to any desired position; has twelve-inch rolls.
MOTOR—One-quarter H. P., which supplies abundance of power to operate both wringer and washer at the same time.
DRIVING MECHANISM—Gears machine cut, which insures long service without noise; tooled bearings, which insure perfect fit. Entire driving mechanism is mounted on a solid metal base which is set into the frame. There is no possibility of the mechanism getting out of alignment should machine be set on an uneven floor.
BELT DRIVE—Drives direct from motor to driving pulley, with adjustment on motor base for belt tension.
SPECIAL SAFETY DEVICE—This machine cannot be started until the door of the cabinet is closed. When door is opened machine will stop.

No. OK9	Heavy Galvanized Tub	
No. OK10	Heavy Copper Tub, Tinned	

High Speed Vacuum

Tub Made of Louisiana Red Cypress, Grooved, Dovetailed and Glued Bottoms. Double Reinforced Lid. All Natural Finish.

Rotary Movement, occasioned by the practically Frictionless Application of the Ball and Socket Swivel Joint attached to the Gear Drive Centering Direct on Vacuum Cup Driving Shaft which by means of Attachment, Simultaneously gives the Vertical, as well as the Spiral Rotary Movement to the Vacuum Cup.

The Automatic Action of the Air Valve, produces the greatest Cleansing Force, which reaches to the Bottom of the Tub, as well as the Extreme Outer Edges. The Direct Drive Power Applied by Operating Lever to Vacuum Cup Driving Shaft Works with Ease. Handle is Adjustable to suit convenience of Operator.

All gears and Working Parts protected.

Flat Fly Wheel Surface Permits Hand Machine Convertible to Belt Power Drive.

Each

No. H.S.V. . . . . .

Rotarex Electric Clothes Washers

The ROTAREX Quickly Does a Washing, and Does it Beautifully, Carefully and without the Slightest Wear or Harm to Even the Most Dainty Things. The ROTAREX Cylinder (patented) is All-Aluminum, Light in Weight, and Full Eight-sheet Capacity.

The Washing is Done on a Smooth, One-piece, Silvery Surface. There are no Holes Upon Which the Clothes Fumble and Wear. There are No Wooden Ribs to Splinter and Warp. There is Only an Aluminum Surface Upon which the Clothes are Lifted, Dipped and Turned Without the Slightest Wear or Injury to Even the Finest Fabrics.

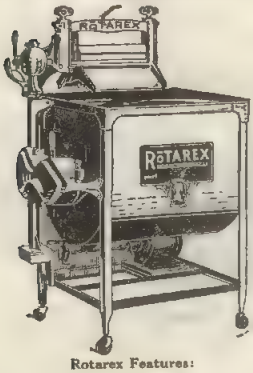
Most Washing Machines Depend Entirely on the Action of the Water to Wash the Clothes In the ROTAREX there is an Unexcelled Water Action, and in Addition, the Clothes are Lifted, Dipped and Turned, the Same as by Hand Washing. This Principle Does Beautiful Washings and is the Easiest Method on Clothes. Dainty and Fragile Laces, Curtains and Other Like Materials are as Safely Washed in the Rotarex as When Carefully Done by Hand.

Both Ends of the Cylinder are Made of Cast Aluminum, light and Durable. The Ends are Perforated to Give an Advantage Found Only in the ROTAREX. The Holes in the Ends of the Cylinder Permit the Dirt that is Washed Out of the Clothes to be Washed Out of the Cylinder That is Why the ROTAREX is the Only Washer that Does Not Wash the Dirt Back and Forth Through the Clothes.

Speed! Capacity! Speed Depends on Capacity The Big Capacity of the ROTAREX Cylinder Makes it Safe and Thorough and Fast Because it Washes a Big Tubful of Clothes Carefully in a Very Short Time It Must be Remembered that what is a Comfortable 15 Minute Cylinder Load to the ROTAREX is Two or Three Loads to the Small Capacity Washer. No Hurry, No Flurry, No Worry, and No Wear on Either the Clothes or the Machine. Just a Delightful, Easy to Get Along with, Everlasting Electrical Servant, that Finishes the Washing Early Every Monday Morning—that is the ROTAREX.

ROTAREX WASHER

COPPER TUB



All Aluminum Cylinder 8 Sheet Capacity

Rotarex Features:

TUB—The Tub is Made of Heavy Copper Nickel-Plated on the Inside. No Bolts or Rivets on Inside Every Drop of Water Can be Drained Through the Non-Rusting Liberty Silver Drain Faucet Brass Water Line.

Dainty Luncheons

Milani's

Remember that name. It is the trade name of a most wonderful French Dressing and one spoonful of Kraft Milani has more of that exclusive, elusive, piquant French dressing-ness, that smooth, ever-almost creamy consistency that is most appetizing. No vegetable salad or cold meat is quite delicious enough if served without you well-known means, Milani's. Your dealer has it

Almost an endless variety of luncheons, both delicate and agreeable to the taste, can be prepared by the efficient use of Kraft Cheese.

Besides being simple, economical, and easily prepared, each dish will possess that singular deliciousness of ripe, mellow cheese that true, unvarying flavor made possible by Kraft.

Kraft Cheese has won such great favor because it is *always* good—its quality is staple.

Not only is it good, but its protein, butterfat, vitamines and mineral salts are good for you.

And when you see the Kraft Label just remember it is our guarantee of this supreme excellence

How

will you Merchandise Wheel Toys this Summer?

8 different models for wheel toys of all kinds.

Will you give wheel toys every opportunity to sell—without giving up to them more display space than they should have?

When the season swings into its stride on golf, tennis, baseball, swimming, camping—all the summer sports—and you need plenty of room to feature seasonable merchandise—you can still give your wheel toys a good chance to swell your profit—if you display them on Lamson Display Racks.

Then, you save two-thirds the floor space ordinarily devoted to them—and display them *better*—get them up where people can *see* them—protect them from damage—make them look *inviting*.

Lamson Display Racks are strong, durable, handsome. Moderate in cost, they will earn good profit over their cost of hire.

Send in the coupon for descriptive booklet and prices.

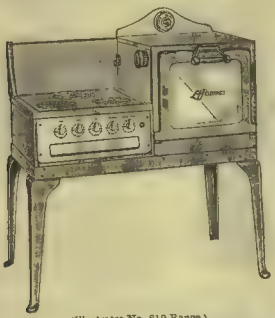
ELECTRIC RANGES

LINDEMANN & HOVERSON

"See Dept. 6, Page 1540."

The rapid development of hydro-electric power with the corresponding reduction in the cost of current has created a universal interest in electric ranges wherever this power is available. The wholesomeness, convenience and safety of electric ranges have an appeal that we feel safe in predicting will make them the most popular of cooking appliances in the near future.



(Illustrates No. 819 Range.)

TRIM—Full white and gray porcelain enamel finish.

OVEN—One piece rounded corners, seamless lining, full porcelain enameled inside, boltless type construction. Oven element made to insure even, steady heat, insulated with highest grade refractory porcelain; heavy steel bridge work frame, removable.

COOKING ELEMENTS—Double spiral coil type.

SWITCHES—All of the three-heat reciprocating type, can be turned either to the right or left to the heat desired.

CONSTRUCTION—Cast iron cooking top, oven door frame and legs.
Convenient outlet on back of range will take either rigid or flexible 1 inch conduit.
Operates on 110-125 volts, alternating or direct current; 7500 watts.

MEASUREMENTS—
Floor space 42x21 inches
Cooking surface 22¼x20¼ inches
Cooking height 33 inches
Height over all 43 inches

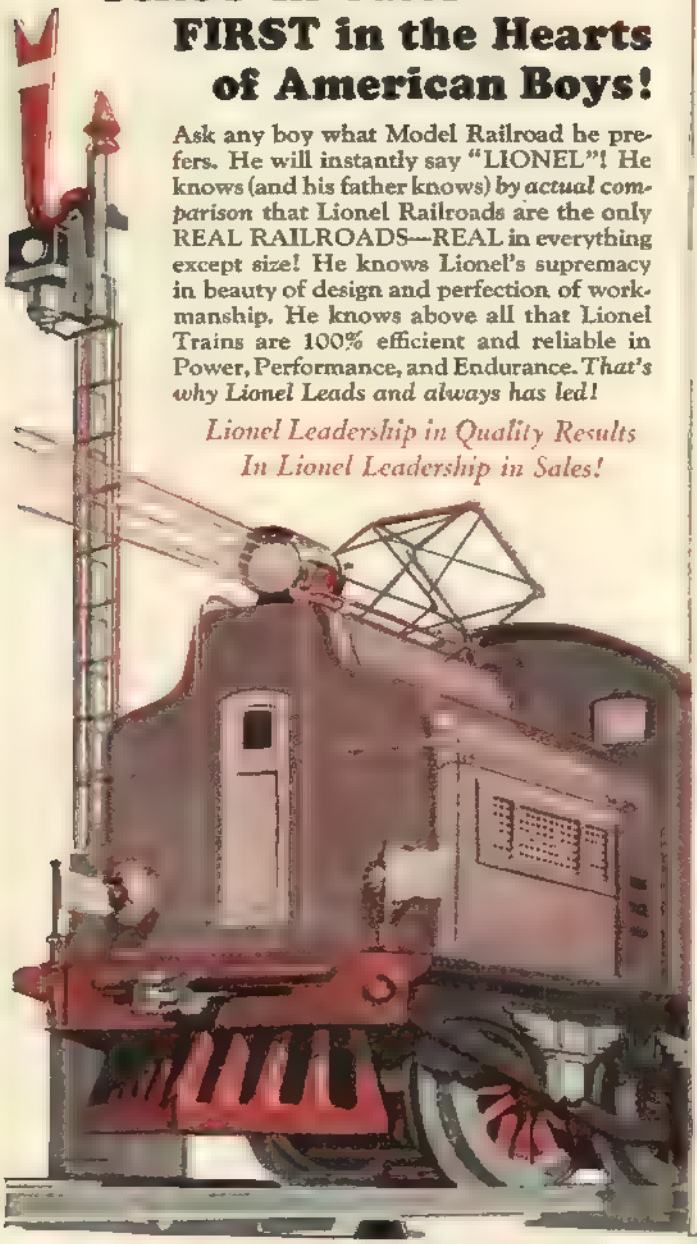
LIONEL 1927

FIRST in Quality—
FIRST in Sales—
FIRST in the Hearts of American Boys!



Ask any boy what Model Railroad he prefers. He will instantly say "LIONEL"! He knows (and his father knows) *by actual comparison* that Lionel Railroads are the only REAL RAILROADS—REAL in everything except size! He knows Lionel's supremacy in beauty of design and perfection of workmanship. He knows above all that Lionel Trains are 100% efficient and reliable in Power, Performance, and Endurance. *That's why Lionel Leads and always has led!*

Lionel Leadership in Quality Results In Lionel Leadership in Sales!

Season of 1927

THE LIONEL LINES

BIG SALES ROUTE

Just a few of Lionel's outstanding achievements for this year:—

TRACK "O" (1¼" Gauge)—Lionel offers the only efficient 100% Electrically controlled Railroads both for "O" Gauge and "Lionel Standard" Track. Lionel's new "O" Gauge Super-Motor Locomotives haul twice as many cars as any other make.

TRACK "LIONEL STANDARD" (2¼" Gauge)—New Powerful Super-Motor Locomotives, new Passenger and Freight Trains, in many different models and sizes, incorporating numerous new and exclusive Lionel features.

FREIGHT TRAFFIC DIVISION—29 new types of Freight Cars, both for "O" Gauge and "Lionel Standard" Track,—real rolling stock in miniature.

ACCESSORY SPECIALS—New Traffic and Crossing Signals with "Banker" Light—New Accessory Sets attractively boxed—And the marvelous new Lionel Semaphore-Train-Control. They will make model railroads more thrillingly real.

DE LUXE FINISH—The finest automobiles have no better finish than Lionel Products, all hand-enameled in gorgeous, lasting colors by Lionel's exclusive process.

LIONEL TERMINAL—Visit Lionel's New York showroom, "Model Train Headquarters of the World". A real Railroad Terminal, alive with useful merchandising and display suggestions for dealers.

Place Your Lionel Order NOW!

Wilson Baseball Uniforms

Wilson-Western baseball uniforms are famous wherever baseball is played. They are preferred and worn by many of the leading American and National league teams as well as by scores of minor and semi-pro leagues and hundreds of scholastic teams throughout the country.

Complete Baseball Uniforms

Wilson baseball uniforms are made over large and roomy patterns from an improved specially constructed uniform flannel. Double stitched throughout, and reinforced at all points where the greatest strain comes. The comfort, fit and workmanship are unexcelled. Uniform consists of shirt, pants, cap, hose and short stationary adjustable belt of same material as uniform.

SHIRT—Made in V neck style, with two rows of silk cordage trimming around neck, down front and on sleeves. Ventilated under arms.

PANTS—Made roomy to allow for freedom of action. Finished with plain tunnel belt loops.

CAP—Brooklyn style. Unbreakable buckram visor, green underneath.

HOSE—Cotton ribbed.

COLOR—Gray with green stripe. Trimmed in green. Green button on cap.

SIZES—Chest 36, 38, 40, 42, and 44. Each set in box.

MAH-JONG SETS.

A PIROXLOID PRODUCT.

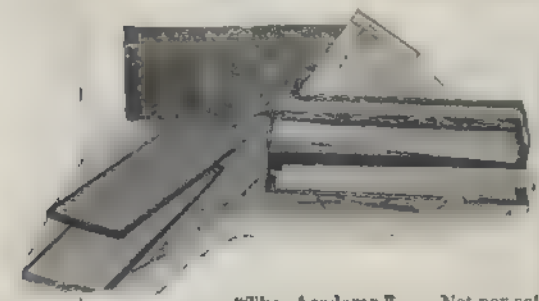
"THE ANCIENT GAME OF THE MANDARINS."

The famous "Ancient Game of the Mandarins" Sets, manufactured of Piroxloid, give you an exclusiveness, in display of the Chinese Game, which is not obtainable under any other method of manufacture

The tiles are all hand painted, guaranteed to retain their brilliancy and not fade, and can be kept clean by washing with any ordinary soap and water.

"The Educator." Net per set

NO. 2000X/1 Set—Though listed as inexpensive, this set is really of exceptional merit, comprising highly varnished wood tiles of uniform size, embossed in three vivid Chinese shades. Size of tiles 1⅞ inches x ⅞ inch, and ⅜ inch in thickness. Packed in a Skytogen box with four drawers and four individual money trays, complete with celluloid counters, celluloid wind box, dice and book of instructions.....
.List per set $4.40 $5.90



"The Academy." Net per set

NO. 2000 R Set—As an added feature to the regular Educator Set is a tapestry finished "Oblong Carry All Box" with two trays, containing a set of four racks and four individual counter holders. All wood tiles highly varnished, size 1⅞ inches x ⅞ inch and ⅜ inch in thickness. Complete with racks, celluloid counters, celluloid wind box and book of instructions
..List per set $5.50 $7.40

"The Pullman." Net per set

NO. 6001 29 Set—The novel combination of **Grained Ivory Piroxloid Top and Black Base** makes this set rather unusual in appearance. The contrast of colors gives it the advantage of quick appeal when displayed on the counters. Highly finished. Size of tile, one inch x ¾ inch and ½ inch in thickness. **Packed in genuine leather traveling case**, complete with folding racks and separate compartment, containing celluloid counters, celluloid wind box, dice and book of instructions.....List per set $44.00 $58.70

TILE RACKS.

Each Set Contains Four Pieces.

Net per set

NO. 200—Double rack, 3 black and 1 red to set.....List per set $3.30 $4.40

NO. 250—Heavier wood, double rack, 3 black and 1 red ...List per set $3.85 5.90

TILE COUNTER RACKS.

H. & H. Net per set

MANLEY MFG. CO., YORK, PA.

AN ASSOCIATE COMPANY OF AMERICAN CHAIN COMPANY, Inc.
STANDARDS for your safety

TO THIS HOSTESS ENTERTAINING IS A DELIGHT

Her dinners or informal parties are at once the envy and admiration of her friends. Gracious, unhurried, without effort, she anticipates her guests' every want. For this excellent hostess has at instant command a corps of efficient, silent, dependable servants — her Manning-Bowman electrical appliances.

At her house, Sunday supper is a real occasion. Before her, in a stunning Manning-Bowman urn, the coffee bubbles cheerfully, intriguing the appetite with its inviting aroma. On her Manning-Bowman table stove, some unusual dish reaches a magic perfection, while by her side the waffles attain a golden delicacy that earns the praise of the most jaded epicure.

The Manning-Bowman Company have designed and manufactured electrical appliances from the viewpoint of the women who will use them. They embody the most modern elements that make for efficiency, dependability, long life and convenient use. And each one has such exquisite beauty of line, finish and workmanship that it is a most graceful addition to any table service.

Each

No. A-22—22 caliber; shoots 22 shorts; 22 longs and 22 long rifle; wt each 4 lbs.....$15 45

One in carton; 10 in wood case.

HAMILTON, SINGLE SHOT

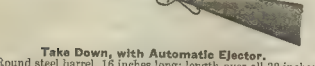
Take Down. 16 Inch Barrel.

Round steel barrel, 16 inches long; length over all 30 inches; fitted with front knife blade sight and adjustable open rear sight; plain stained stock and fore-end; blued steel butt plate. Weight 2¾ lbs.

Each

No. H2722—22 caliber; shoots **22 Shorts,** Nos. 22SL, 22SB, 22SSU, 22SSG, 22SSHP, 22SLHP; **22 Longs,** Nos. 22LL, 22LB, 22LSU, 22LSG, 22LSUHP, 22LLHP $6 60

Ten in a wood case.



Take Down, with Automatic Ejector.

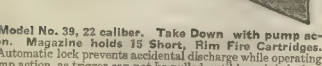
Round steel barrel, 16 inches long; length over all 30 inches; fitted with front knife blade sight and adjustable open rear sight; walnut stock and fore-end; rifle butt stock with steel plate.

Each

No. H02722—22 caliber; shoots **22 Shorts,** Nos. 22SL, 22SB, 22SSU, 22SSG, 22SSHP, 22SLHP; **22 Longs,** Nos. 22LL, 22LB, 22LSU, 22LSG, 22LSUHP, 22LLHP $7 56

Ten in wood case.

HAMILTON, REPEATING



Model No. 39, 22 caliber. Take Down with pump action. Magazine holds 15 Short, Rim Fire Cartridges.

Automatic lock prevents accidental discharge while operating pump action, as trigger can not be pulled until breech is locked in firing position. Pump action is automatically locked when rifle is loaded and ready to fire. A trigger lock in the gun just back of trigger may be used to prevent accidental discharge when rifle is loaded. This lock is not automatic. Barrel is bronze lined, accurately rifled, with solid steel breech. Front sight knife pattern, rear sight open and adjustable; stock and forearm genuine walnut turned. Length over all 35 inches. Length of barrel assembly when taken down, 21¼ inches. Weight about 4 lbs. each.

Each

No. H3922—22 caliber; shoots 22 short rim fire cartridges.....$25 20

One in cardboard box; 10 in wood case.

GAME GETTER GUNS.

MARBLE'S.

Two Guns in One—One Gun for All Game.

A more accurate .22 cannot be found. The shot cartridges for small furred and feathered game almost equal 28 gauge. The .44 ball is very accurate and powerful at medium range. Smokeless powder may be used with perfect safety and slight recoil.

Two combinations, with barrels 12, 15 or 18 inches.

1. Upper barrel .22 caliber, rifled; chambered for Short, Long and Long Rifle cartridges. Lower barrel, smooth for .44 caliber and .410 gauge (12 m/m) 2 inch brass or paper shot shells, also .44 and .410 ball cartridges (not conical bullet).

2. Upper barrel .22 caliber. Lower barrel for .410 gauge 2½ inch (only) paper shot or ball cartridges.

Important Features: Single trigger—striker is adjustable to either barrel instantly; hammer—rebounds to safety notch after firing; receiver lock—trigger guard is pulled back to open breech; ejector—partially ejects from both barrels at same time; folding stock—is held rigidly in position by sliding lock; sights—rear sight has stationary Buckhorn with large U notch, also Leaf with small U notch, and folding peep with 3/32 inch aperture; front sight has 1/16 inch gold bead.

Specifications: Frame, drop forged; finish, blued; stock, formed from sheet steel, nickeled; grip plates, walnut; holster, finest strap leather. Get Marble's Game Getter Gun catalog for complete information and record of results with cuts of actual targets.

One in a box, one dozen in a case.

CROSMAN PNEUMATIC.

Pell.

The Crosman Pneumatic Rifle is 36 inches long and weighs 5½ pounds, just right for steadiness. The propelling force is air, placed under tremendous pressure by means of a lever that folds up out of sight under the barrel. The power depends upon the number of lever strokes. The trigger pull is light and smooth. Breech mechanism is of bolt action type, rugged and fast. The .22 caliber barrel is of fine blue steel, rifled with painstaking care. Adjustable peep-sight and special front blade-sight enable an accurate marksman at 100 feet to do precision shooting comparable with that of any powder-using .22.

The Crosman Pell is a spool-shaped bullet, with rounded nose and deeply concave base. This is the most accurate type of bullet of light weight known to give a flat trajectory. Up to the standard 50-yard distance, it has great striking power and startling accuracy. At greater range, the force is soon spent so that it can be used in crowded communities where everyday .22 caliber fire-arm bullet might be dangerous. Packed, 250 in a box.

Crosman Pneumatic .. ..Each $16 00

MARQUETTE SPACER TOW BARS

Improved Type

Universal in every direction

Showing the secure and easy connection of Tow Bar to the frame ends of a disabled car.

A most useful and efficient towing spacer connection. No service car is complete without one. While bringing in a wreck, this Spacer Tow Bar keeps both cars properly spaced and under absolute control at all times.

It makes the two cars travel as a unit, prevents their bumping together and stops all destructive jerking and sidesway. It permits wrecked cars to be raised but a few inches off the ground while towing, this preventing strain on rear of service car.

Improved design makes them unbreakable. Quick connection is made by inserting pin in vertical position, which forms a common swivel point for both bars. The heavy coupling piece is bolted to the truck. Bars quickly removed for carrying in service car when not in use.

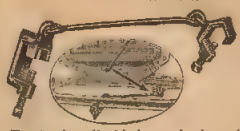
Heavy compression spring in each bar absorbs all shocks. Chain grip locks provide quick, tight fastenings to the disabled car. Universal forks permit a wide latitude of fastenings.

No. F7831—Extended length of arms 50 in., contracted length of arms 36 in., range of adjustment 14 in., w't each 52 lbs.★.....each $44.45

LOOSE

MARQUETTE STEERING GEAR TOW LOCK

A Necessity for Towing Wrecked Cars Backwards



For towing disabled cars backwards whenever necessary.

This Device holds the front wheels in line and enables towing the car backwards as fast and as safely as forwards.

It complies with all state laws regulating towing.

Attached or detached in 20 seconds.

Consists of two crucible steel vices, heat treated and connected by a steel rod.

No. F6198—Fits all cars, w't each 4 lbs.★ .....each $10.55

LOOSE

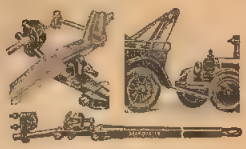
This Cart is equipped with three trays, has room for every tool from a reamer to a heavy power drill. Also an extra tray for placing under motor to catch dripping oil when taking down motor. Helps keep shop clean. It has several handy compartments for rings, pins, pistons, bolts and small parts.

No. F8050—All steel construction. Angle steel posts, strong handle. One swivel caster and two stationary wheels all with bronze bearings and rubber tired. Size overall: height 31½ in., width 18½ in., length 34½ in., w't 60 lbs.★....each $50.00

ONE IN A CRATE

MARQUETTE ONE MAN TOW POLE



Steers the Car Being Towed

One man can tow a car or two cars with this Tow Pole. It saves the time of an extra man sent out to steer the car being towed. Requires no one to steer the car while towing. It steers one or two towed cars in the same tracks as the pulling car. It provides the most economical way for towing new cars from freight yards. Hook-up made in a few minutes. The Marquette fastens to axle and tie rod of towed car. Full universal. When towing car with self-locking steering gear, remove drag links. Strong construction throughout, with ample safety allowances. Every shop, service station and car agency needs the handy Marquette ONE MAN Tow Pole. A valuable addition to your service or wrecking cars. Attachment for tubular axles can be secured at small additional cost.

No. F7830—Length overall 6 ft., w't each 31 lbs.★.....each $40.00

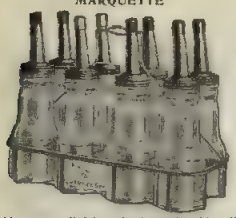
FINE MOTOR CARS

OIL SERVICE SETS
MARQUETTE



Aluminum finished basket of cold rolled steel, with a substantial steel handle. Entire basket is electrically welded. Crystal clear glass, standard quart bottles that show up the oil to the best advantage. Every bottle is perfect, no colored or cloudy glass. Bottles are marked at standard quart and pint capacity. Air vent of tubing in spout, has a control feature for pouring fast or slow, simply by holding finger over tube. Spouts are durable, copper color, and have dust caps of three different colors to quickly distinguish light, medium and heavy oil. Slope of spout enables easy dispensing for any make of car. The large opening of the spout makes refilling easy with any ordinary pump, without removing spout from bottle. Gaskets provided to prevent leakage. Complete set consists of basket and eight bottles with spouts, gaskets and dust caps.

Made from soft cotton yarn chemically treated with Shino chemical treatment, absorbing the dust, polishing the surface and leaving a bright dry finish. Contains no oil or grease to accumulate dirt and dust. Slips on the hand like a glove, fits either hand. The slightest rubbing instantly removes dust or dirt leaving surface in its original lustrous condition. When duster becomes filled with dust it can be washed. The dust absorbing solution remains. You cannot wash that out.

No. 209 Length, 10 inches . . . . . Per Dozen, **$8.00**

SPACER TOW BARS

MARQUETTE

Steel construction. Full universal and bayonet lock made of ⅜ inch boiler plate. Each arm is composed of two steel pipes, one telescoped inside the other which allows a generous extension, has quick acting lock which effects a positive hold at any adjusted length.

Both the forked end and the chain latch lock can revolve entirely around the arm as an axis, which permits gripping any odd shape frame ends or axle of the disabled car.

With the aid of the bumper bar, the driver has absolute control at all times over both cars, as this bar prohibits the towed car from bumping into the service car when going down grade or when quick starts and stops are necessary. Each

No. A-26—Length over all 48 ins; length of arm contracted 27 ins; length of arm extended 48 ins; range of adjustment 16 ins **$63 00**

One in crate; wt each 52 lbs.

AUTOMOBILE JACKS

WALKER, LIFT-A-CAR

Quick Tire Changer.

Malleable iron frame and handle, blue finish; drop forged pawls; hardened steel rack bar and top case.

Foot lift is 3½ inches from ground when lowered. Designed for cars having balloon tires and equipped with bumpers, trunk rack etc. Each

No. A-715A—Capacity 1 ton; height 7½ ins; height of foot 3½ ins; raise 8½ ins; length handle 48 ins **$57 75**

Packed loose; wt each 50 lbs.

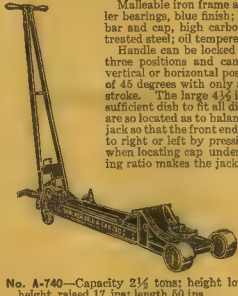
Automobile Jacks are absolutely necessary in every Public Garage.

Jacks shown on this page are the "dependable" kind—built for continuous service.

AUTOMOBILE JACKS

WALKER, ROLL-A-CAR

For Balloon Tires and Cars with low slung Axles.



Malleable iron frame and wheels with roller bearings, blue finish; lifting pawls, rack, bar and cap, high carbon drop forged heat treated steel; oil tempered steel springs.

Handle can be locked rigid in any one of three positions and can be operated in a vertical or horizontal position or at an angle of 45 degrees with only a 12 inch operating stroke. The large 4½ inch square cap has sufficient dish to fit all differentials. Wheels are so located as to balance the weight of the jack so that the front end can be easily swung to right or left by pressing down on handle when locating cap under axle. 43 to 1 lifting ratio makes the jack operate easily.

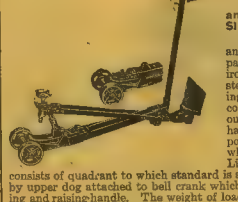
Each

No. A-740—Capacity 2½ tons; height lowered 5 ins; height raised 17 ins; length 50 ins **$117 00**

Packed loose; wt each 120 lbs.

WEAVER LO-WAY

For Balloon Tires and Cars with Low Slung Axles.

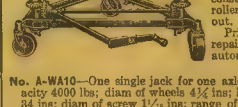


Spring steel frame and mechanism, painted green; cast iron wheels. Solid steel axle, ball bearing and roller bearing construction throughout. Long lever handle held in vertical position by spring when not in use. Lifting mechanism consists of quadrant to which standard is attached and turned by upper dog attached to bell crank which operates by lowering and raising handle. The weight of load is carried by a set of heavy roller bearings in quadrant and by two sets of roller bearings between axle housing and steel axle. Easily guided by turning handle. For general garage use also for unloading automobiles and moving new cars in showroom. Each

No. A-WA20—Capacity 5000 lbs. Minimum height 6 ins; maximum lifting height 14 ins, with extension standard 17 ins **$113 40**

One in bdle K. D. wt each 110 lbs.

WEAVER, TWIN JACKS



Malleable iron and steel construction; ball and roller-bearing throughout.

Private garage, auto repair shop or wherever automobiles are handled Each

No. A-WA10—One single jack for one axle; lifting capacity 4000 lbs; diam of wheels 4¼ ins; length handle 34 ins; diam of screw 1 1/16 ins; range of lift 9 ins; wt each 50 lbs. **$48 00**

No. A-WA12—Extra heavy; one single jack for one axle; lifting capacity 8000 lbs; diam of wheels 6½ ins; length handle 40 ins; diam screws 1¼ ins; range lift 9½ ins; wt each 100 lbs. **78 00**

One in crate.

Merchandise Portrayal

Yesterday it was the master craftsman. Today it is the interpretive craftsman who is just as much an artist as his predecessor. Today he works with modern machinery, modern methods and mechanical contrivances because today his output is not a single thing but runs into the millions. Yet under the skilled eye of today's interpretive craftsmen are beautiful things wrought with true art embodied.

20th Century Flyer

Per Set.

N74368—TWENTIETH CENTURY FLYERS—Very clever and ingenious idea. First time an airplane and train working in combination have been successfully put in a mechanical toy. Airplane flies around and under the tunnel, the airplane propeller in the nose revolves above, flying around at the same pace as the trains. Sets, 16d inches. Packed one in a box 16.00

New York to Paris Monoplane

Per doz.

N74048—NEW YORK TO PARIS MONOPLANE. 8d x 6 — of metal, aluminum finish. This toy is drawn by a string along the floor turning the wheels, tips the wing so that the plane "banks" in a very realistic manner. The propeller spins when the plane is in motion. The wheels are equipped with rubber tires. Length, 8 inches, with a 10-inch wing spread. Packed one in a carton 16.80

Hiway Henry

Per doz.

N73907—HI-WAY-HENRY—As it wobbles along its front rears up from time to time, then drops down and the car starts off again. The radiator cap quivers incessantly and the driver's head bobs constantly in and out. The sudden low aerial rocks from side to side with each jolt of the car as the fat old lady listens to the radio. Packed one in a carton 16.80

Speedway

Per doz.

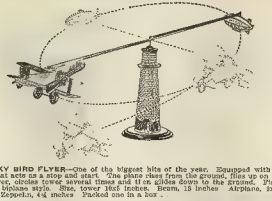
N74330—JUNIOR SPEEDWAY—A junior adaptation of the popular Mac Speedway. Similar in construction to the Mac, but has a starter and track balls for two cars. Diameter, 16 inches. Packed one in a box 14.00

Dutch Mill

Per doz.

N74329—MAC DUTCH MILL—This is a Gravity Sand Toy, dumping sand through the hopper into the mill, will set the little dutch man into motion and rotate the wings of mill. Set up ready for action. Fitted out with bag of sand and steel container Height 13 inches. Packed one in a box. Per doz. 16.00

Sky Bird Flyer



Per Set.

N74364—SKY BIRD FLYER—One of the biggest hits of the year. Equipped with a brake that sets in a start and start. The plane rises from the ground, flies up on its own power, circles tower several times and then glides down to the ground. Finished in bronze style. Size, tower 16d inches. Beam, 13 inches. Airplane, 2x4 inches. Expands, 4-4 inches. Packed one in a box 16.00

Whirling Jockey Race

Per doz.

N74831—WHIRLING JOCKEY RACE—Give it a whirl and see which horse wins. A horse race game without a motor. It is hand operated, strongly built and a very interesting scoring game. Size, 11x18x3 inches. Packed one in a box 16.00

Miniature Train

Per doz.

N74041—CAROUSEL TRAIN Brightly lithographed train set including station, tunnel overhead walk with engine and two passenger cars attached to moving platform. Diameter, 9 inches 16.00

Safety First

Per doz.

Tractor, 4-in-1, 25½ inches overall, 6 inches high and 4 inches wide. This set consists of Tractor with driver, a four-wheel wagon trailer, a disc harrow and a rake, all attractively lithographed in bright colors representing a real tractor outfit. Each set in a strong, attractive box.
No. 39N70. Per dozen..... **8.80**

OVER AND UNDER

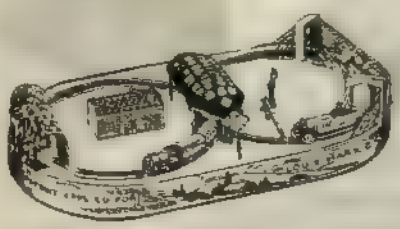
Over-and-Under, extreme length 35 inches. Made of steel throughout, finished in attractive colors. Fitted with strong steel spring. One winding will operate this toy for a long time. Very amusing item. Packed one in box.

No. 39N37. Per dozen..... **7.84**

AUTO BUS

Auto Bus, 10½ inches long, 5⅝ inches high and 4½ inches wide. Made of metal. Comes in two finishes, green and brown. Has special stairway and double row of seats on top. A really wonderful item. Each in box.
No. 39N35. Per dozen..... **8.25**

STOP, LOOK AND LISTEN



It is equipped in every detail, showing a railroad crossing with the Stop, Look & Listen sign that is seen all over the country. The train travels in circles as does the car. At the crossing the car stops at the gate to permit the trains to go by and then proceeds when the trains pass through. Each in box.

No. 39N161. Per dozen..... **10.56**

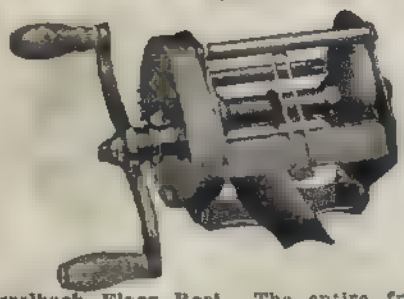
PINCHED

Another brand new idea in a mechanical toy. Motorcycle cop hides behind station and shoots out quickly, stops and pinches auto driver. Here is something that is seen daily on our roads and its action in a mechanical toy is most humorous and appealing. This brand new idea is sure to be a big seller. 10 inches square, 3½ inches high.
No. 39N166. Per dozen..... **8.50**

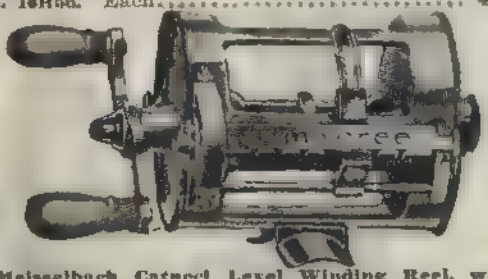
MAIN STREET

Here is one of the biggest hits in the mechanical toy line. It portrays "Main Street." There are six different types of mechanical toys moving in both directions and is most realistic in every detail, including a policeman who is supposed to be directing traffic. Beautifully finished in colors that are sure to attract the eye and make it a ready seller. Size 24 inches long, 3¾ inches wide, 2¾ inches high. Each in box.
No. 39N168. Per dozen..... **3.50**

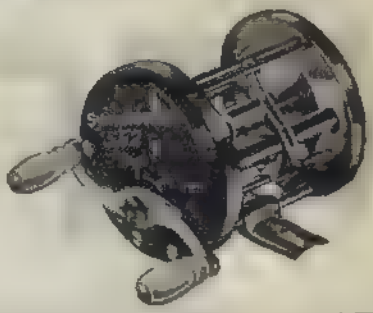
Meisselbach and Meisselbach Catucci Level Winding Reels



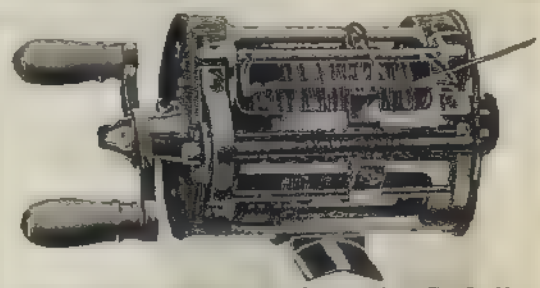
Meisselbach Flyer Reel. The entire frame is made of brass, heavily nickel plated, which is pleasing in appearance. Spool flanges are of nickel silver. Arbor made of brass. Pivots are nickel steel running in phosphor bronze bearings. Adjustable end bearing. Can be oiled without disassembling. Pin which travels in groove of level wind shaft is made of long wearing hardened steel, copper coated to prevent rust. Quadruple multiplying. Line capacity 100 yards. Each in box.
No. 16R50. Each..... **4.90**



Meisselbach Catucci Level Winding Reel, with Double Handle, that has achieved nation-wide success among fishermen. It is well made and well designed. A reel that with care should last a lifetime. Has an adjustable reciprocating shaft bearing which enables the angler to take up the play in the reciprocating shaft, assuring greater and smoother service. No other level winding reel has this feature. Holds 100 yards of standard bait casting line. Packed in an individual anti-tarnish jewelers bag. Each in box
No. 16R48. Each..... **6.54**



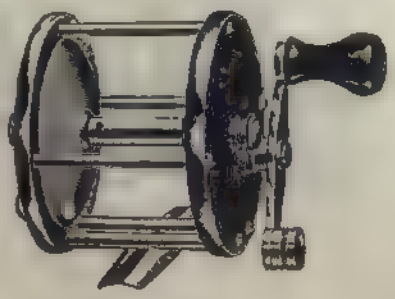
Meisselbach Catucci Level Winding Reel. The black "Catucite" on the end plates contrasting with the rich quadruple nickel plated parts makes a striking contrast that sets it apart at once as a most attractive reel. Its parts are trim and gracefully designed. All bearings are double pin, phosphor bronze, and spool flanges of nickel silver; spool perfectly balanced, double handle. Each in box
No. 16R45. Each..... **5.88**



Meisselbach Catucci Level Winding Reel, Non-Back-Lash. Built with watchlike precision. Will last a lifetime and lends itself to every weight of bait, wind condition and any length of cast. Accurate flexible and perfect control. Full 100 yards of line capacity. Packed in individual anti-tarnish jeweler's bag. Each in box
No. 16R47. Each..... **9.16**

Muscallonge Reels

CORONADO DOUBLE MULTIPLYING REEL



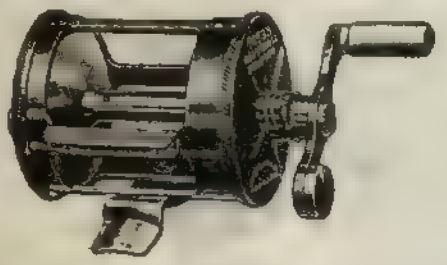
Coronado Double Multiplying Fishing Reel. Rubber side plates with metal bands. Nickel plated with adjustable click. Especially suited for muskallonge fishing. Capacity 200 yards. Each in box.
No. 16R58. Each..... **3.35**

OCEAN CITY TOP-SAIL LEVEL WINDING REEL

The Top-Sail is a reel of 350 yard capacity, adaptable for both fresh and salt water fishing and has the added level winding attachment. This reel does not have the free spool action for surf casting. It is constructed of the highest quality Nickel Silver and Bronze bearings. This is the big sturdy level winding reel that will keep the line from piling up and snarling. All parts are readily accessible for cleaning and oiling. Each in box.
No. 16R54. Each..... **6.54**

Highest Grade Fishing Reels

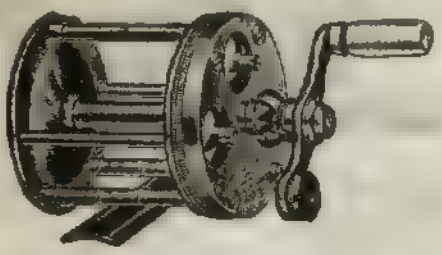
BLUE GRASS SIMPLEX REEL



Blue Grass Simplex Reel. One of the best reels for the price. Has handle forward of the bottom and sliding click, on back of reel. One piece seamless tubing frame. Gear is one piece of hard drawn brass rod. Pivots are tempered, ground and polished. Reel is made of brass and nickel silver, and all brass parts are heavily nickel plated. Capacity 120 yards. Each in box

No. 16R35. Each 7.84

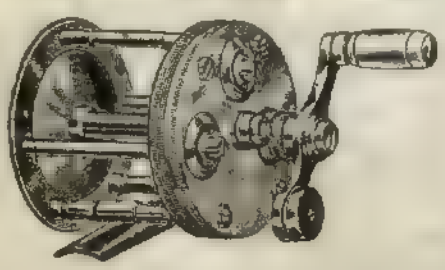
BLUE GRASS REEL



Blue Grass Reel. A popular size for general purposes, suitable for bass, pickerel, trout and often used for muscallonge and salmon. Made of nickel silver, quadruple multiplier with click and drag and screw-off oil caps. Capacity 120 yards. Each in box.

No. 16R48. Each..... 13.06

MEEK REEL



Meek Reel. This popular reel for fishing and tournament casting. Watch nickel silver, balance handle forward, click or click and drag, screw-off oil caps. Capacity 120 yards. Each in box.

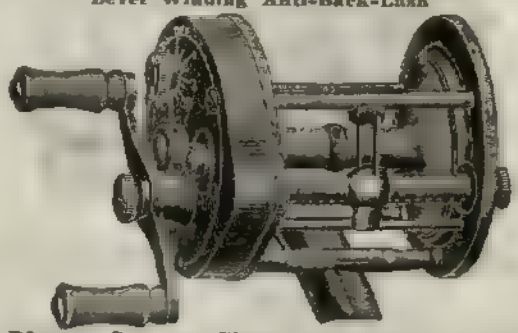
No. 16R49. Each..... 11.00

SOUTH BEND LEVEL-WINDING ANTI-BACK-LASH REEL

South Bend Level-Winding Anti-Back-Lash Reel, intended to make every cast a perfect cast so as to throw your bait and line accurately without a back-lash, snarl or tangle, agate jeweled spool caps with adjustable spring tension grip, easily screwed off to permit oiling. Gearing is quadruple multiplying; crank has double grips of white ivoroid. Level-winding attachment winds the line evenly and closely upon the spool. Capacity 100 yards. Each in box complete with genuine leather case and practice casting weight

No. 16R24. Each..... 10.78

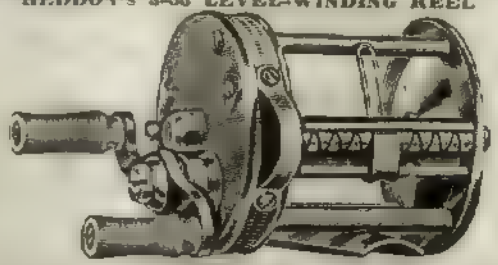
PFLUEGER SUPREME FISHING REEL
Level Winding Anti-Back-Lash



Pflueger Supreme Fishing Reel. Level-winding anti-back-lash quadruple multiplying, generated spiral tooth gears steel pivots, tempered and polished. Phosphor bronze bearings, adjustable back sliding click, fancy balanced double handle crank. Will hold from 75 to 100 yards according to size of line used. A booklet describing and also giving instructions how to operate reel is inclosed.

No. 16R39. Each..... 14.34

HEDDON'S 3-36 LEVEL-WINDING REEL



Heddon's Level-Winding Reel, is up to recognized high standard of quality in every respect. Is made of the best, tested, hard drawn watch nickel; stud, shaft, pivots, and pinion are of Stubbs drill rod, hardened, oil tempered, ground to size and highly polished. Full quadruple multiplying with exactly the correct ratio of speed between the spool and line carriage to produce enough of that criss-cross of the line which prevents back-lashing. The spiral gears are of a special hard drawn phosphor bronze and are much stronger than are ordinarily used. Has a capacity of 100 yards of 15 pound test line. Weight 9 ounces. Each reel furnished with one drop oil can, bottle reel oil and tube of high grade vaseline. In genuine leather reel case.

No. 16R28. Each..... 22.54

DANCE OF OLD MEXICO

Engraved by SOUTHWESTERN ENGRAVING COMPANY of HOUSTON —*Printed by* HERBERT C. MAY COMPANY

TEXAS~

Its historical background

View of San Antonio De Valero (The Alamo)

Almost without cessation the siege had lasted eleven days. At four o'clock on Sunday, the sixth day of March, 1836, four thousand crack soldiers, the flower of Santa Anna's army, moved on the Alamo with silent and stealthy tread . . . At dawn the attack was launched. The charge was met with a roar of cannon, shrapnel and musketry from the valiant handful of Texans of the garrison . . . Twice the Mexican onslaught was repulsed with heavy losses. But Santa Anna would not relent. His third offensive gained the fort and, like ants, his men swarmed over the walls . . . Of the one hundred and eighty-two Texans not one survived to tell the tale of the Alamo. And for every Texan killed, thirteen Mexicans paid the supreme penalty. It was an awful carnage, a slaughter whose equal has not been recorded since the day of Thermopylae.

In bold relief stands out the heroic picture of the defense of the Alamo. It is a beautiful heritage often read to Texas children as emblematic of that patriotism and loyalty of spirit which has safely carried the Lone Star State through the rule of six flags.

Engraved and Printed by BRIGDENS LIMITED, TORONTO, CANADA

Description on following page

The picture on the preceding page is a four-colour process reproduction of a water-colour painting, printed on 200 lb. (M) enamel paper in four colours and a tint, roughed after printing to grain of hand made paper by embossing on platen press.

MILBRADT ROLLING STORE LADDERS

Showing No. 1 bent ladder, which runs on a track fastened to shelving near the top and runs close to wide base shelf.

The Milbradt Rolling Stepladders are all made to order, and to fit each particular place, of good oak lumber, in the most artistic and neatest style, handsomely finished, are durable and perfectly safe, as they cannot jump the track. They take up the least possible space, run noiselessly and so easily, either empty or with operator upon them, that a slight push will propel a ladder the length of an ordinary store. These ladders have an extra wide shelf at the top, which affords great convenience in handling stock. All iron work on ladders, as well as the brackets to hold up steel track, is malleable, artistic and strong and aluminum finished.

No. F1—Suitable fixtures at the top to run on steel track and rubber covered rollers attached near the lower end to run against the edge of base shelf. Best for all around purposes where shelving is reasonably strong. With fixtures★.....each $44.45

No. F2—For shelving that is not strongly built. Most of the weight of ladder and operator rests on the floor. Runs on a hardwood track at the top and has cushion tired wheels to run on the floor. No track required. With fixtures★...each $44.45

No. F10—Bent ladder that runs on a flat hard wood track screwed on top of original low shelving. When top of shelving is reasonably strong this is the most convenient way to apply a ladder to this style of shelving. With fixtures★.....each $44.45

No. F15—Trolley or ceiling ladder that suspends from a track fastened to ceiling. Has at the top, suitable iron in which paper filled wheels run noiselessly on the steel track and also has cushion tired wheels that run on the floor. Very strongly built and specially adapted for hardware stores or any place of business where heavy goods are handled. With fixtures, each★ $44.45

Approximate W't Ladder Crated 50 Lbs.

No. F11—Steel Track—For No. F1, regular strength★ per foot $0.75

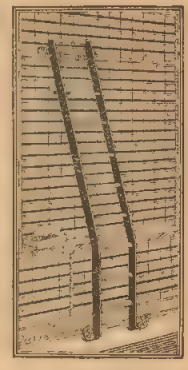
No. F150—Steel Track—For No. F15★.....per foot .75

Approximate W't Steel Track 1 lb. per Foot.

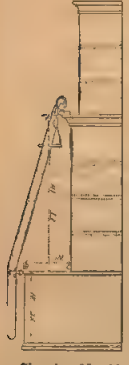
No. F20—Hardwood Track—For No. F2, complete, per foot★.....$0.65

No. F200—Hardwood Track—For No. F10, complete, per foot★.....$0.65

Approximate W't Steel Track 1 lb. Per Foot.



Showing No. 2 bent ladder, which runs on floor.



Showing No. 10 bent ladder, which runs on track screwed on top of original low shelving.

HOW TO ORDER

Ladders as Nos. 1 and 2 give the exact height from floor to top of base shelf; the exact width or projection of base shelf and then the exact height from top of base shelf to top of shelf to which track is to be fastened and the track shell be fastened to a shelf that is about 3 feet from the top.

Steel track for ladders No. 1, both regular and extra strong, is 1 inch in diameter and therefore does not block up any space when fastened up opposite the edge of shelf. When ordering steel track give the total length of each line of shelving; second, give distance from center to center of uprights and state how many brackets are required to hold up the steel track. For regular steel track the brackets cannot be more than 4 ft. apart. When the uprights to which bracketts are to be fastened are more than 4 ft. apart, it is necessaary to use extra strong steel track.

Ladder No. 10, give the exact height from floor to top of base; the width or projection of base and then the exact height from base to the top of shelving or cornice on top of which track is to be fastened. Also state how much the cornice or moulding on top of which track is to be fastened, projects out over lower part of shelving.

Trolley ladder No. 15, is only necessary to give the exact height from floor to ceiling and the exact length of each line of track wanted.

To order wood track for ladders Nos. 2 and 10, it is only necessary to state the number of feet required.

For further information write for special Rolling Ladder Catalogue.

Showing No. 15 trolley or ceiling ladder, which suspends from a track fastened to ceiling.

Per doz.

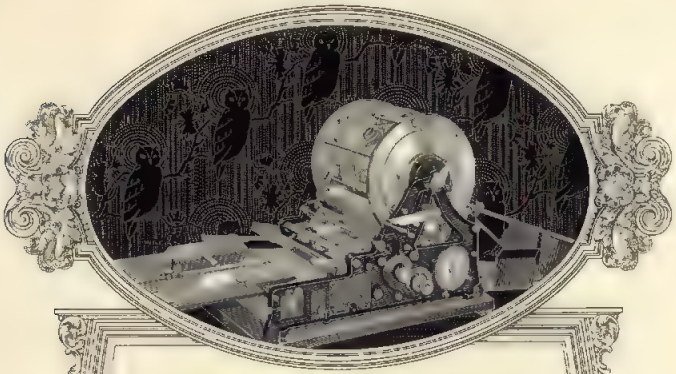
G6175—GAME OF TREASURE ISLAND—The board is an attractive design in colors. Size, 16¾x16¾ inches 18¼ inches..... 16.00



Wisdom is in *doing*, more than in *saying*. Are you machine wise?

It is a self-evident fact that no man should be permitted to do a piece of work which a machine can do *better*. But here is a machine that does important work that could hardly be done *at all* without its help. Its ability to turn out thousands of well printed letters, forms, bulletins, designs, etc., in every hour of the working day, has made the Mimeograph an *indispensable* factor in many business and educational activities, where it is helping to beat down operating costs and to speed up general efficiency. In the day of the triumphant machine it pays to be machine wise.

Service

We maintain direct branches of our own factory in New York, Boston, Philadelphia, Washington, Cincinnati, Indianapolis, Pittsburgh, Detroit, St. Louis and Kansas City. And usually the best office equipment store in other cities sells Mimeographs and always has supplies in stock.

A B Dick Company
Chicago

Today

You can't possibly know of the many important ways in which the Mimeograph can serve you until you have learned a few interesting facts concerning the Mimeograph of today. Let us send you an interesting booklet on this subject. A request will bring it without obligation.

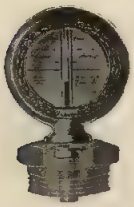
DE LUXE MODEL.

The Heat Indicator

This model is all that its name implies. It is especially designed for use on high-grade passenger cars. The instrument is triple nickel plated, has a retaining ring embossed with laurel wreath, and a gold finished dial with hand lettering denoting various operating conditions of your motor. The entire instrument is of the highest quality. Each DeLuxe instrument is equipped with the Schlaich Chain Lock, offering protection against theft.

DeLuxe. Complete with Schlaich Chain Lock. Wt. 28½ oz..Each **$15 00**

STANDARD MODEL.



A perfect heat-indicating instrument of the highest type. Because of its perfection of workmanship, the Standard Model has been selected as regular equipment on many of the leading cars. This instrument is nickel plated, has a retaining ring embossed with laurel wreath, and a gold finished dial with hand lettering denoting various operating conditions of your motor.

Standard. Wt., 16 oz.....Each **$10 00**

UNIVERSAL MODEL.

This attractive instrument is especially for use on passenger cars of medium size. Though slightly smaller than the Standard Model, it fulfills the same functions with the same high standard of efficiency.

The Universal Model has bevelled crystals both front and rear. The frame of the instrument is finished in a durable highly polished nickel.

Universal. Wt., 12 oz.....Each **$7 50**

JUNIOR MODEL.

The Junior Model Boyce Moto-Meter is a durable, accurate instrument, embodying all the features of the larger models. It has a heavy nickel plated frame, and the same temperature range as the larger instruments. Size, 3x4⅞.

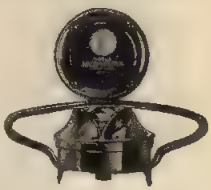
Junior. Wt., 8 oz.....Each **$5 00**

MIDGET MODEL.

This attractive instrument has a distinct appeal to every small car owner. Its high standard of efficiency, as well as its accuracy, have made it one of the most popular instruments in the line. A heavily nickeled frame with bevelled crystals, make it an extremely ornamental as well as useful addition to any car. Size, 2¼x3⅛ inches.

Midget. Wt., 5 oz.....Each **$3 50**

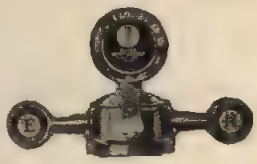
SPECIAL FORD MODEL.



If every Ford owner knew the value of a Boyce Moto-Meter on his car, he would, without question, install one immediately. The Special for the Ford consists of the Midget Model mounted on a handsomely designed locking radiator cap . The complete unit is nickel plated, and offers an article of great utility as well as beauty for the Ford car.

Special Ford. Wt., 12 ozs..Each **$4 00**

SPECIAL ARISTOCRAT MODEL.



For the Ford and Other Small Cars.

Utility, beauty and protection—three elements combined—are offered in the Aristocrat Model Boyce Moto-Meter. A Midget Model Boyce Moto-Meter, mounted on a handsomely designed locking radiator cap, and the complete unit nickel plated and assembled ready for installation. The Aristocrat Model for Chevrolet, Maxwell, Overland, Star or Gray is furnished complete with adaptors for these cars. No adaptors are necessary when installing on the Ford car. While the Midget Model Boyce Motormeter is regularly furnished with the Aristocrat, the hole in the cap is sufficiently large to permit the use of the Universal Model without interference from the steam of the instrument in opening the cap. Those desiring the larger instrument can easily have change made by the dealer at a slight additional cost.

Aristocrat for the Ford. Wt., 1¾ lbs. .....Each **$7 00**

Aristocrat for the Chevrolet, Maxwell, Overland, Star or Gray. Wt., 1¾ lbs. .....Each **$7 00**

All moto-meters one in a box—ten in a carton.

MOTO-METERS.

BOYCE.

MODEL H.

Made for those who wish to know the actual temperature in degrees of the water in cooling system of their cars; not affected by the jars and jolts of the roughest road; can be installed on any car within a short time. Has a 2-inch dial, with 2½ inches outside diameter; fits into a 2 1/16 inch hole in dashboard; furnished with 5 feet connecting tubing and special rubber hose connection bulb.

Model H. Wt., 1 1/16 lbs..Each **$8 00**

Model H—Illuminated .....Each **10 00**

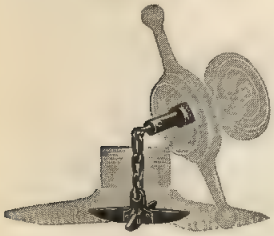
MODEL S.

Identical to the Model H in operation, but somewhat different in design and special mounting; is provided with an arm for mounting on the steering column, which can be done in fifteen minutes, as it is neither necessary to drill through the tough metallic dashboard, nor to tap into the cylinder castings; a simple strap, fitting all size steering columns, quickly secures the instrument dial under the driver's eyes. A miniature electric bulb placed behind the dial of this instrument, provides illumination for night driving. The entire unit is nickel plated. Has 2 inch dial with 2 7/16 inch outside diameter; 4 inches long by 2½ inches high; furnished with 7 feet of connecting tubing with special rubber hose anad connection bulb.

Model S. Wt. ea., 2 1/16 lbs..Each **$12 50**

MOTO-METER LOCKS.

ANCHOR.



One style lock to fit Ford, Midget, Junior, Universal and Standard Moto-Meters. Its use is assurance against loss of Moto-Meter and Radiator Cap; chain is case hardened; steel construction throughout.

Anchor. Wt., ¼ lb. .....Each **$1 50**

Specify for style Moto-Meter.

One doz. in counter display case.

AUTO CLOCKS.

TACOMA.

Stem Wind and Stem Set.

Easily and quickly installed by drilling a 3/16 inch hole. Finish, all nickel; dial, white with black numerals; regulator, on back of clock; installation, drill 3/16 inch hole and insert bolt; space required on instrument board, 1⅞ inches. Length of stem, 1⅜ inches.

Tacoma. Plain Dial. Weight, 4 ozs. .....Each **$2 50**

Tacoma. Luminous Dial. Weight, 4 ozs. .....Each **$3 50**

GLOWNITE.

The Glownite model has a black dial with "Undark" radium numerals and hands which stand out as clearly by night as by day. A lockplate completely encloses the clock, enhancing its appearance and affording protection against theft. 30 hour movement. Illustration ½ actual size.

Glownite. Wt., 2 ozs.....Each **$4 50**

Every ignition expert knows

This small .015" spark gap creates a hot intensive spark for quick, easy starting

STARTING a car is easier when the spark gap is set small; bound to be so, for most of the battery output is being used to turn over the engine—very little finds its way thru the ignition coil to the spark plugs.

Yet, obviously, a spark gap set to meet the demands of easy starting is shy of running power—the same gap cannot possibly be right for two such dissimilar conditions as starting and running: a gap that is set and fixed must of necessity be a compromise, satisfying neither condition.

Moto Meter Spark Plugs, because of the self-adjusting gap, meet the demands of quick starting and smooth running with a gap for each condition—a *proper* gap that means the utmost in engine efficiency and improved motor performance. Every set of Moto Meter self adjusting Spark Plugs you sell carries with it the assurance of complete motor satisfaction that earns dividends for you in consumer good will.

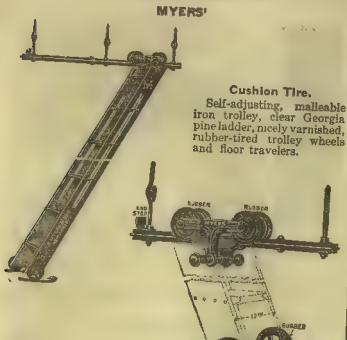
MYERS'



Cushion Tire.

Self-adjusting, malleable iron trolley, clear Georgia pine ladder, nicely varnished, rubber-tired trolley wheels and floor travelers.

The track is double angle steel rail, which is very neat and strong and is suspended from ceiling by means of lag screws, either 3 jointed or rigid, or by flanged plates and wood screws. By this means the track is placed close to the ceiling and can be leveled on an uneven ceiling without the least trouble and without any blocking or bridging.

The trolley is self-adjusting, is made of malleable iron, fitted with turned steel bearings, and 3 inch anti-rattler wheels, turned and bored on a lathe and fitted with special rubber tires.

The ladder is constructed of the best clear Georgia pine nicely finished, filled and varnished. It has open panel sides 5 inches wide, with 5 inch steps, each step being supported at each end with a special malleable dowel-tee, which makes the strongest construction possible. The width of ladder is 12 inches.

The floor-travelers are 5 inches in diameter, composed of metal sides with rubber cushioned tires, clamped in such a position as to be impossible to come loose or work off. They are laced on a steel axle which revolves with one of the wheels, the other running loose. In this manner the ladder will adjust itself to the floor.

In ordering, observe the following instructions:

1st.—Give exact perpendicular height from floor to ceiling.

2nd.—Give entire length of track required.

	Each
No. IML—Ladder and hanger, complete without track; for ceilings 14 ft or less in height; wt each 60 lbs	✦$66 00
	Per Ft
For each additional foot of ladder or fraction there of for ceilings in excess of 14 ft	$3 60

MILBRADT'S

Made to order, any shape and length necessary to fit shelving, of good oak lumber, in the best possible workmanlike manner, finished in first class style. They are made in various styles to suit all kinds of shelving.

Bent Shelf Ladders.

Runs on steel track; has rubber rollers attached near the lower end that run against the edge of base shelf; nickel plated malleable iron trimmings.

The track should be fastened to a shelf that is about 3 feet from the top.

In ordering, observe the following instructions:

1st.—Give the exact height from floor to top of ledge.

2nd.—Give the exact width or projection of base shelf.

3rd.—Give the exact perpendicular height from the top of ledge to the top of shelf to which track is to be fastened.

4th.—Give entire length of each run of track and number of uprights for each run.

5th.—Give dimensions of uprights, also distance of uprights from center to center.

6th.—State if uprights are straight faced or turned spindle.

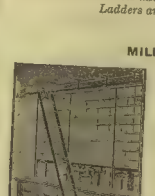
No. 8—Steel track for brackets not over 4 ft apart; complete with brackets and ends; wt per ft 1 lb	$1 14

Ladders and track crated.

MILBRADT'S



Trolley Ladder.

Has a suitable fixture with wheels at the top that run on a track, fastened to the ceiling. It also has attached at the bottom cushion tired wheels that run on the floor. This ladder is very strongly built and is especially adapted for hardware stores or any place of business where heavy goods are handled.

This ladder can be made to operate on any possible kind of curve by using special swivel wheels and track curves.

In ordering, observe the following instructions:

1st.—Give exact perpendicular height from floor to ceiling.

2nd.—Give entire length of track required.

	Each

STORE LADDERS

MILBRADT'S

Bent Ladder.

Intended for shelving that is not very strong, as most of the weight rests on the floor. This ladder runs on a hardwood track fastened to shelving near the top to guide it and has attached at the bottom cushion tired wheels that run on the floor, but no track is used on the floor.

The track should be fastened to a shelf that is about 3 feet down from the top.

In ordering, observe the following instructions:

1st.—Give the exact height from floor to top of ledge.

2nd.—Give the exact width or projection of base shelf.

3rd.—Give the exact perpendicular height from the top of ledge to the top of shelf to which track is to be fastened.

4th.—Give entire length of each run of track and number of uprights for each run.

5th.—Give dimensions of uprights, also distance of uprights from center to center.

6th.—State if uprights are straight faced or turned spindle.

No. 7—No brackets needed; complete with screws; wt per ft ⅓ lb	✣$0 99

Ladders and track crated.

BICYCLE

Bent Floor Track Ladders.

Track is placed on the floor entirely independent of the base shelf, and for this reason this style is preferred by many buyers to any other, particularly where the base shelf is narrow. Otherwise this ladder is the same as the bent base shelf. The track for the floor is so small that there can be no objection to it whatever.

Both the oak and pine are finished in the natural wood colors.

In ordering, observe the same instructions as on No. 25 ladder shown on preceding page.

STORE LADDERS

BICYCLE

Track is built at the bottom, either on the base shelf or the floor so that the entire weight of the ladder and operator is supported from below.

Light turned pole at the upper end of the ladder is used for a guide. Stout hook holds the pole in place. Has an extra wide shelf at the top for convenience of handling goods.

Has a double track; a half round steel rail for the wheels to run on at the bottom. The steel rail is 3/16 of an inch in height and 3/8 of an inch in width, the pole is little over an inch in diameter; sides 3½ inches wide; steps 4 inches wide; length of steps 12 inches.

In ordering, observe the following instructions:

1st.—Give exact distance from floor to ledge.

2nd.—Give exact width of ledge.

3rd.—Give exact perpendicular height from ledge to top of shelf to which ladder is to be fastened.

4th.—Give entire length of each run of track and number of uprights for each run.

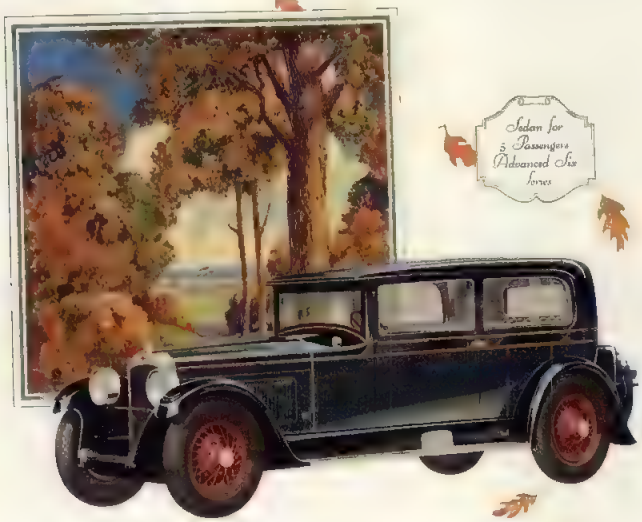
A FINER, FASTER, SMARTER-LOOKING SEDAN FOR FIVE THAN ANY AT ITS PRICE



You can see from this illustration of the Nash Advanced Six Sedan for Five one reason why Nash is breaking all previous high sales records!

HERE is a smarter-looking car than others at its price, equipped more luxuriously, with every nicety and convenience of travel. The crowning touch is a big built-in custom trunk at the rear, bound with heavy nickel straps for style.

¶ When you drive this car you'll discover many other reasons which are impelling people to buy it—features of performance high above the average

¶ It's a more powerful car, enthusiastic and instantaneous in getting into motion, exertionless on hills, and very fast.

¶ It's a smoother riding car, due to new specially-designed alloy-steel springs, just introduced by Nash.

¶ Engine is smoother—*7 bearings.*

¶ And, without a doubt, here is the *easiest handling car on earth,* because of the New and easier Nash steering mechanism.

¶ Look at and drive all the cars built today in the Nash field, and you'll speedily decide *you would rather have a Nash!*

OVB OUR VERY BEST

Our Very Best for Fifty Years

Has Stood the Test

NESTOR JOHNSON SPECIAL HOCKEY OUTFITS

The young men and boys who formerly played hockey usually had scrub teams—each man secured his own outfit and anything went. Today, that is changed. Hockey has become a leading winter sport. Athletic clubs and skating clubs have regularly organized teams—clubs are being formed solely for playing hockey—and many communities are getting up hockey teams to play other neighborhoods for championships.

These teams wear especially designed, distinguishing uniforms, and their equipment follows special regulations. It naturally follows that with this uniform equipment the shoes and skates should also be uniform, that is, a club team and its substitutes should all be outfitted with the same type of shoes and skates.

The Nestor Johnson Special Hockey Skates are superior and Nestor Johnson Shoes are specially designed, with patented features, to meet the severe requirements of the sport.

We have two high class outfits to offer: The Nestor Johnson Star Special Hockey for professionals and big clubs that want the best, and Nestor Johnson Flyer Special Hockey for those who want a high-grade outfit at a popular price.

NESTOR JOHNSON NORTH STAR SPECIAL HOCKEY

SPECIAL FEATURES

1. **The Special Nestor Johnson Hard Toe.** This is strong and tough as steel, affording full protection, but lighter weight and better than the ordinary solid leather toe. It is absolutely guaranteed not to break down from moisture or heat.

2. **The Famous Nestor Johnson Patented Rib.** On runner tube, making it strong and rigid. Hockey players appreciate the fact that this skate cannot spring or bend under the most severe strains incident to the game.

3. Rattan Protective Strips built right into the shoe.

4. The **Johnson Strap Carrier.** Permits real adjustment and straps are easily replaced.

5. Skates firmly and properly riveted to shoes so as not to loosen—carefully set in correct scientific position, giving quick and perfect control while playing hockey.

6. Full grained combination tanned cowhide with ankle pads.

7. One-piece cold drawn steel Heel Cup and Front Cup, riveted to solid plate giving a firm, unvarying support to foot—no seams to spread—no joints to loosen.

No. F600—Aluminum finish, sizes 4, 5, 6, 7, 8, 9, 10, 11, 12★.....per outfit *$12.50*

No. F601—Nickel Plated, sizes 4, 5, 6, 7, 8, 9, 10, 11, 12, per outfit★.....*$15.00*

NESTOR JOHNSON FLYER SPECIAL HOCKEY

Moulded sole leather arch, supporting counter that comes forward under instep. Shoes reinforced for maximum support and tongue heavily padded. Hard toe.

No. F700—Aluminum finish★.....per outfit *$9.00*

JOHNSON BUCK LACE

No. C13—A broad woven yellow lace, especially made for skating outfits. Used by the leading amateur and professional skaters. As it is uniform it will not stretch, harden or pull out eyelets; it is more suitable than the ordinary leather lace. Length 76 in., 12 pair to a box, per box $4.45

WE DO NOT BREAK BOXES

★Items Marked Thus ★ Are Shipped From Factory Only.

NESTOR JOHNSON NORTH STAR SKATES

Scientific principles of construction make Nestor Johnson skates the peer among tubular skates. Not only does the patent rib, on each side of the runner housing tube, add a feature of strength, but adds to the rigidity of the skate as well. A very superior feature is the one-piece drawn steel heel cup, which is an exclusive feature of all our skates. Nestor Jonhson blades are to well known to need any added praise Shoes for all outfits are made with correctly molded counters and only with inside counter pockets, same as all high grade shoes. All Nestor Johnson skates are made to place the foot in correct scientific position and cups are heel compensating. Rehability and long wear are built into every pair of our skates and shoes.

NORTH STAR HOCKEY

"They Keep a-Running"

2 Horse Power Century Type RS Repulsion Start Induction Single Phase Motor

Safe Operating Temperature

The safe operating temperature of Century Type RS Repulsion Start Induction Single Phase Motors is one point of *the difference* that contributes to their long life and makes them "Keep a-Running" indefinitely.

1 Temperature rise is not more than 40° Centigrade in the hottest spot under constant full-load operation.

2 This low temperature preserves the insulation, upon which the sustained operating life of the motor depends.

3 Well ventilated end brackets and symmetrical open spaces between field coil ends permit free circulation of air through and around all vital parts.

"Keep a-Running" ability plus high starting torque and low starting current makes Century Type RS Repulsion Start Induction Single Phase Motors particularly suitable for operating such apparatus as compressors, pumps, grinders, etc. Built in all standard sizes from ⅛ to 40 horsepower.

There is a difference—use and specify Century Type RS Repulsion Start Induction Single Phase Motors

A Stunning Cap *at a Selling Price*

Put a Neva-Lost with its display stand on your counter. Its graceful beauty is quick to catch the customer's eye. And, four times out of five, a mere mention of the price completes the sale.

For Neva-Lost is a stunning cap at a *selling* price.

Ruggedly built for lasting service from its husky hinge to the bayonet lock which operates by a quarter turn of the wings. And once on, it's on to stay — the *thief-proof* feature protects both cap and Moto-Meter.

For swift turnover just show Neva-Lost and say, *"Two-fifty."*

WASHING MACHINES

NEW CORNELL—Water Motor

Distinctive Features. — Balanced valve motor with only one spring, only one packing nut to adjust. Screened inlet to keep rubber washers and dirt out of cylinder. Roller bearing guide for gear rack. Double bearing for dasher post. Improved cypress tub with large two-ply cover, handsomely finished. Improved dolly and dolly post. No metal post extending through the dolly to injure the clothes and no metal cap on the under side of the dolly to interfere with its efficiency. Extra high grade rubber wire bound hose. **Balanced Valve**—This style of valve makes the only durable and absolutely reliable construction for a washing machine motor. The action of the water pressure on a balanced valve is such that the valve is continually revolved in operation, insuring uniform wear, which means that the valve always has a perfectly tight fitting joint and there can be no loss of power due to water passing the valves after a motor has been in use for a while. Any deposit of impurities on the metal from the water will not affect the free movement of the balanced valve no matter how heavily coated the metal may become. **Spring**—The New Cornell motor has only one spring, which is unusually large in size, is made of heavy bronze wire, and is practically indestructible. **Stuffing Box or Packing Nut**—Has only one stuffing box or packing nut which reduces friction and loss of power. **Inlet Port**—Is provided with a screen which prevents rubber hose washers or other substance from getting into the motor and causing trouble. **Gear Rack**—Has a roller guide and the dolly shaft is provided with a double bearing, thus reducing friction and wear to a minimum. **Dolly**—Is made of selected cypress, the under side is corrugated in addition to having the four pegs. The adjustable telescoping dolly post does not extend through the dolly, this allows the dolly pegs to take hold of the entire load in the tub, with the result that the clothes in the bottom of the tub are also agitated. **Tub**—Has stave legs. Is made of the finest quality cypress and is of improved construction, having a large overlapping steam-tight cover reinforced with a double thickness. The inside is corrugated and the outside finish is orange. The hoops are painted black and castings are finished in gold bronze and all hardware is galvanized. **Motor**—Has a cast brass cylinder with phosphor bronze parts, is entirely rust-proof and operates on any pressure over 25 pounds. **Hose**—Is of extra good quality rubber, wire wound, 3½ feet long, with screw-on connections, and the exhaust is provided with an improved anti-splasher. **Capacity** of tub, 8 shirts.

No. 1 Width overall, 26 inches; height overall, 31 inches. Shipping weight, 75 lbs. ..... Each, **$35.00**

NEW CORNELL—AERO MODEL

Same as No. 1 except that it is equipped with the improved aero agitator that gets electric washer results. The cast aluminum dasher with its numerous perforations whirls back and forth and creates a sucking rubbing action that forces the hot suds through the very meshes of the fabric and dislodges every particle of dirt and grime.

No. 60 Width overall, 26 inches; height overall, 31 inches. Shipping weight, 75 lbs. .... Each, **$36.00**
One in a Crate

FOREST CITY HIGH SPEED—Rotary

The flywheel does not revolve on the shaft, but is mounted on a long steel shaft which runs in double bearings—thus friction and wear at flywheel bearings are impossible, and noiseless and light running are always insured. The flywheel and mechanism is attached to tub. No heavy machinery attached to lid, and machine can be easily opened and closed without lifting a heavy weight. The gears are guarded and accident-proof. Dasher shaft has double bearing and dasher is telescopic—no projection through bottom of dasher to tangle or tear the clothes. The dasher and tub are Louisiana Red Cypress, attractively finished in colors. The improved construction of this tub rigidly enforces the top. The large lid is fastened with malleable detachable hinges, and when closed is securely locked by automatic latches. Tub is corrugated on inside, and the under side of the dasher is also deeply corrugated in addition to having the four pegs thus adding to the washing efficiency of the machine. All castings and hardware are galvanized where necessary, and outside castings are enameled in attractive colors. Capacity of tub, 8 shirts.

For Hand Power

The operating handle is adjustable to various positions—horizontal diagonal or vertical, so that machine may be operated while one is seated or standing. The change from one position to another can be made in a moment by simply loosening a thumb-screw. When the lever is operated the flywheel runs at a speed of 800 R. P. M.

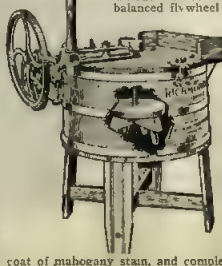
No. 55 Width overall, 28 inches; height to top of wringer board, 31 inches. Diameter of flywheel, 17 inches. Shipping weight, 90 lbs. ..... Each, **$30.00**

For Engine Power

The flywheel is grooved for round belt, and gearing is so designed that no idle pulley is necessary. Machine can be directly belted to line shaft of engine, and can be opened or closed while running. No shifting of belt or frequent stopping or starting of engine or machine necessary. Diameter of flywheel, 17 inches. Flywheel or pulley should run at a speed of 800 R. P. M. An 8x1¾ inch pulley for flat or round belt can be furnished extra when desired.

No. 56 Width overall, 28 inches; height to top of wringer board, 31 inches. Shipping weight, 90 lbs. ..... Each, **$30.00**
Extra for Pulley ..... Each, **2.00**

RICHMOND HIGH SPEED—Lever Action



The segment lever, directly driving the dolly pinion, has a pistol type head, ending in a ball which travels in the machined raceway, so arranged as to produce the reverse action of the dolly. All gears are cut and run in accident-proof covers. The well balanced flywheel is hung parallel with the hinge line, so that the lid can be raised easily, while the mechanism does not get out of gear, runs on ten roller bearings and is geared direct with the cut tooth gears so as to produce a washing machine mechanism with no dead center. Lever socket has two different positions. Flywheel has flat rim for use with belt if desired. Tubs made of everlasting Virginia white cedar, corrugated on the inside only and equipped with tight fitting lids, double crossed for strength and to prevent warping. Bolted and braced hardwood legs. Finished with a coat of mahogany stain, and completed with a coat of high quality coach varnish. Capacity of tub, 8 shirts.

No. 8 Width overall, 30 inches; height to top of wringer board, 32½ in.; diameter of flywheel 15½ in. Shipping weight, 115 lbs., Each, **$28.00**

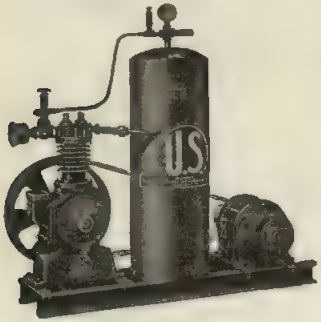
One-Gun Paint Spray Unit

U. S. Air Compressor Co.
Cleveland, Ohio

THE above company is now making several special low pressure and low priced one gun paint spray units, which are being marketed at a net dealer's price of from $151.60 to $211.60, depending upon the current specifications of the motor and type of mounting. The PSE-11, completely assembled unit, consists of a 3 by 3½ single cylinder air compressor automatic unloader for working pressure from 10 to 100



lb., intake silencer and filter, 1½ hp. motor, high quality prestretched leather belt, 12 by 26 by 15 best constructed tank with safety valve gage and fittings, all compactly mounted on a steel base in such a manner that the motor can be quickly moved backward to tighten belt. Unit has a displacement of 3 cu. ft. of free air per minute. The PSE-10 unassembled includes all items listed under PSE-11, except steel base, but including motor rails for mounting on wooden plant or floor.

New Weaver Hi-Speed Auto Ambulance

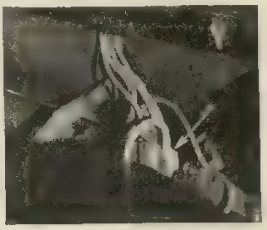
Weaver Mfg. Co.
Springfield, Ill.

AN improved model towing ambulance has been recently announced by the above company. It has been designed to support the load of a car in safety. The one-piece cast steel yoke which supports the load turns on a heavy pivot on the main frame of the ambulance, which permits the wheels of the ambulance to turn when turning corners and allows load to be guided by ambulance tongue. The saddles are offset to the side and by interchanging them the width can be varied from 18 to 22¼ in. In order to avoid brake rods and similar obstructions. The ambulance can be readily applied to front and rear axles, the yoke affording a two-point support that prevents tipping. The two saddles are offset fore and aft which permits the weight of the load to be thrown to the front or rear of the ambulance axle. The pole is made in two sections with pin adjustment that enables it to be extended from 7 to 13 ft. The body and yoke of the ambulance are of cast steel.

Shaler Magnetic Coincidental Lock

The Shaler Co.
Waupun, Wis.

THE above company has perfected an approved type magnetic coincidental lock which can be mounted anywhere on the instrument board within easy reach. The shutting off of the engine locks the car, making it impossible for the motorist to go away with the car unlocked. The principle of operation is by inserting the key in the lock cylinder and turn



90 deg. to the right, the operation position for the switch. To stop the motor and lock the car, turn the key to the left 90 deg. and remove and the car is in locked position. The lock has an electrical auxiliary or automatic device which acts as a secondary safety device when a thief attempts to cut through and trace the circuit or work around the device to establish the circuit.

Pyralin Gear Shift Knobs

E. I. du Pont de Nemours & Co.
Wilmington, Del.

ANNOUNCEMENT is made by the above company of gear shift knobs made of pyralin. The knobs are manufactured in a wide variety of colors to match or harmonize with the color scheme of the car. Shades available include marble, jade and mottled effect. The material is waterproof and greaseproof and unbreakable. The knobs may be easily fitted to the gearshift handle.

Lyon Display Case

Lyon Metallic Mfg. Co.
Aurora, Ill.

THE new steel display case manufactured by the above company is finished in grained natural walnut, mahogany, or oak exteriors which stand out against the clean white

interiors as do the accessories inside. It is also offered in white outside and inside, gray outside and white inside. The doors can be locked. Lights can easily be installed in the counter.

Duplicate Bridge Set

DUPLICATE BRIDGE SET—Consists of four packs of cards and four board trays, numbered from 1 to 4 inclusive. Each board has an individual container which is numbered the same as the board.

A feature of this set is the series of gummed label numbers which are included. These labels are numbered from 5 to 24 inclusive. If a set with a larger sequence is desired the labels may be pasted on the additional boards and containers. This arrangement permits the forming of sets up to a sequence of 24.

These Guaranteed—3-Heat Electric Ranges Just Out
Heat Regulated—High—Medium—Low and Out

These stoves are unusually substantial in construction. Their good appearance, economical current consumption and 4-station, three-heat reciprocating switch at each unit regulates the heat to any desired temperature at the snap of the switch. The oven when not in use may be removed, making each burner available for other cooking. They are the first and only ranges having all these features and yet retailing at a popular price

Current Consumption

Low 1½ Amperes
Medium 3¾ Amperes
High 6 Amperes

Showing No. 8C102 Two Burner Range
Also Furnished in Three Burner Range, as quoted

Open stock.

GAME TRAPS.

HIGH GRIP.

WITH CHAIN.

High Grip Traps, as the name indicates, grip the animal high up on the leg where bone and flesh are heavier. The higher the grip the surer the hold. By using High Grip Traps the trapper increases his catch, consequently increases his profits. After being set, the springs of High Grip Traps may be turned in any direction, from extreme right to extreme left or any position between these limits, and both jaws will still lie flat. This saves labor of cutting out or removing what would be obstructions with other makers' traps.

Nos. 115 and 215 Single Spring, Open.

Nos. 115 and 215 Single Spring, Closed.

Nos. 315 and 415 Double Spring.

Nos. 315X and 415X Double Spring.

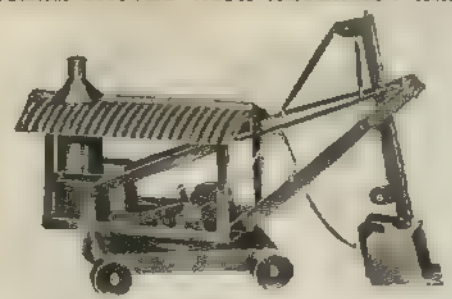
Keystone Heavy Steel Toys

Trucks Are Equipped With Solid Rubber Tires

Constructed of heavy automobile sheet steel body stock and baked in colored enamel to a beautiful glossy finish. All trucks are equipped with disc wheels and solid rubber tires, nickeled hub caps, head lamps and radiator caps. Chauffeur cabs with stop and go signals. They also have standard steering arrangement with steering knuckles of ⅜ inch thickness and are in every respect designed along the lines of the real machines. These remarkable toys are electrically spot welded, heavily riveted throughout and will sustain weights of from 200 to 300 pounds.

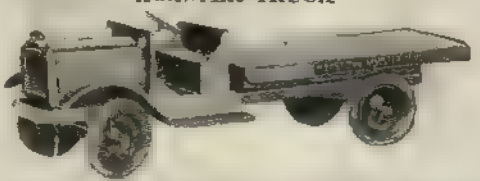
STEAM SHOVEL WITH EXTENSION ARM



(Mfr's No. 47). Steam Shovel is raised and extended by turning crank. It is lowered by pressing lever, opened and closed by pulling string. This steam shovel is 12 inches high, 26 inches long and 6½ inches wide. Black frame, red base and corrugated roof. Heavy steel boiler, coal box, water tank, house and 16½-inch extension arm, 14-inch derrick on turntable. Each in carton.

No. 82N51. Each..... 3.00

KOASTER TRUCK



(Mfr's No 53) **The tendency of children** is to try to ride on all the various models of **Keystone Trucks.** The above illustrated **Koaster Truck** allows this added feature to this class of goods. The platform is of particularly heavy material and baked with a heavy dipped red enamel. Comfortable for youngsters to sit on and put to varied play use. **Size 28 inches long and 9 inches high. Each in carton.**

No. 82N57. Each..... 3.30

DUMP TRUCK

(Mfr's No 41) **26½ inches long.** 10½ inches high, 8½ inches wide. Black body, cab, running boards and radiator, red wheels, red chassis. Lifting power of great strength operated by a crank at front of the car. Drop end with chute door. Each in carton.

The Last Word in candy—Home-Made

and here's the way We Make it:

FUDGE CENTER: 1½ cups pure cane sugar; ½ teaspoon creamery butter, 1 cup rich, full cream milk 1 cup corn syrup, white of one egg

CARAMEL LAYER 4 tea spoons creamery butter 1 cups corn syrup, 3 cups rich full cream milk teaspoon salt

PEANUT LAYER cups prime No 1 Spanish whole nuts roasted in oil (hulls removed

CHOCOLATE COATING. Melt one pound pure milk chocolate

There's nothing else like home-made candy. Ask anybody. Except, of course, Oh Henry! And the very reason Oh Henry! *IS* so good is that it's made the home-made way.

We tell the world how to make Oh Henry! because we are proud of the fact that it's made of the very things that come out of your own pantry — made just as you'd make it yourself. You *CAN* make it yourself! But *WHY* when you can walk up to any candy counter and say Oh Henry!

Oh Henry!

AUTOMATIC INCUBATORS
OIL BURNING

Cannot Overheat, Cannot Underheat. Each Incubator Carries the Underwriters' Laboratories, Inc. Guarantee.

Produce the largest possible hatches of vigorous healthy chicks with labor, risk and cost reduced to a minimum. The patented Automatic Revolving Chute controls the temperature of the incubator, preventing overheating or underheating. A chute between the hot water boiler and lamp tilts back and forth, deflecting the heat to and from the boiler. This chute is attached to a thermostat inside the hatching cabinet and by expansion and contraction of this thermostat the chute is automatically controlled. As the temperature in the incubator goes above 103 degrees the thermostat expands, forces a lever which tilts the chute away from the boiler; if the temperature goes below 103 degrees the thermostat contracts, permitting the lever to slide back, tilting the chute in a nearly direct line between the boiler and lamp. Double wall and double corrugation cabinet construction of best grade California redwood. Top double wall and insulated. Legs are of heavy ash. Removable drawer front keeps chicks in nursery tray while door is open. Moisture condenses right at egg tray. Adjustable compensating locks on outside door assures tight fitting. Heavy double doors afford maximum protection. Solid molding, heavy screws and brass bound corners makes the Automatic always tight. Heating element of 14 ounce copper insures durability and perfect radiation. Is absolutely fireproof and carries the guarantee of the Underwriters' Laboratories Inc., which validates the insurance. Each incubator is furnished complete with tri-tested, guaranteed thermometer, one egg tester and full directions for operating. Burns kerosene. No. 3, 4, 5D, 7 and 10 Automatic Incubators are equipped with automatic egg turning trays.

These are the facts—but please, could keep that fall for sheer of motoring pleasure when you see unusually impressive Oldsmobile for yourself this latest Oldsmobile triumph—a better car at a lower price.
OLDSMOBILE SIX

* The manufacturer's basic policies and underlying resources outweigh all other considerations in determining the desirability of a dealership.

And in this light, Oldsmobile's latest triumph assumes great significance. The Oldsmobile policy . . . "that the American family may have, at a moderate investment, a car that gratifies their finer tastes as well as satisfies their every need" . . . is once more unmistakably confirmed *as a policy pledged to progress.*

For Oldsmobile has presented, in a manner remarkable even for General Motors, that rare achievement of value giving—*a better car at a lower price!*

OLDSMOBILE SIX

PRODUCT OF GENERAL MOTORS

This advertisement appeared in the Saturday Evening Post and many other magazines.

*"$1000 Value Now $875," is what we said, giving the news of Oldsmobile's new lower prices.

"$1500 Value," dealers insist we should have said. But $1000 or $1500, whatever the value then, Oldsmobile today, with new smartness, new luxury, new colors and thrilling smooth performance is a greater value still—

A value, at the new low price, that is attracting ever-increasing numbers to Oldsmobile showrooms, and proves by actual sales that Oldsmobile is entering into a new era of popularity at a price which appeals to a tremendous market.

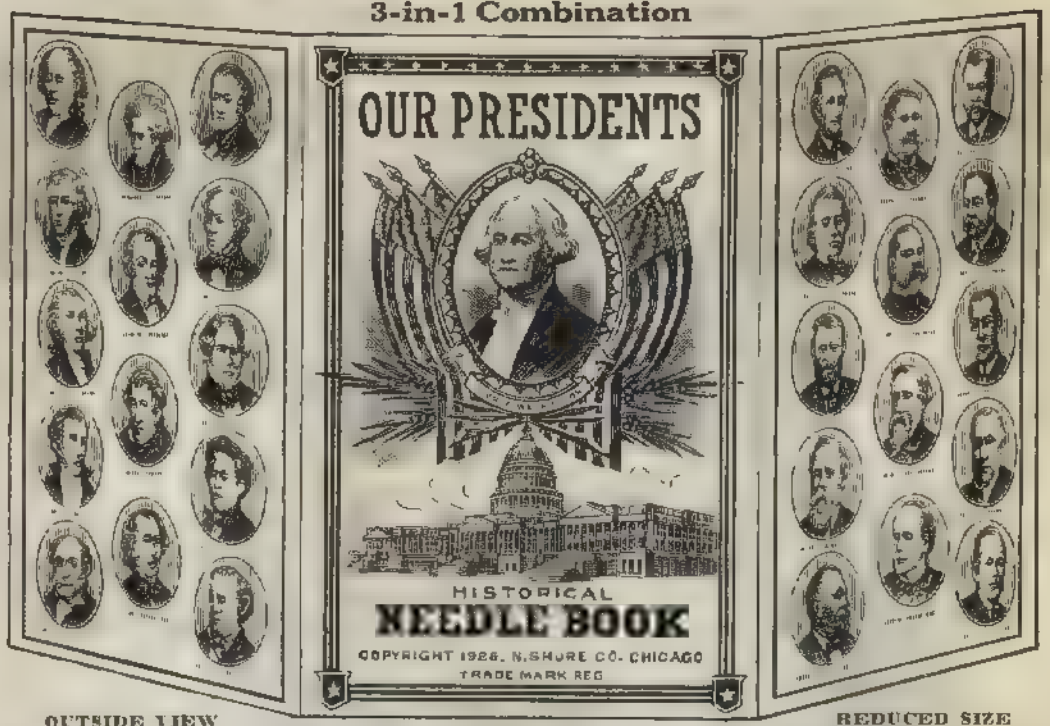
Our Presidents Needle Book

3-in-1 Combination



OUTSIDE VIEW

REDUCED SIZE

REDUCED INSIDE VIEW SHOWING CONTENTS

Read This—

Our Presidents, the world's best combination 3 in 1 needle book and handy historical reference. In 1909 we created the original Army & Navy needle book which for sales, has surpassed anything that has ever been put on the market. It has always been our aim to bring out something entirely different and we believe that the above needle book will fill a long felt need for something better. We are justly proud and we feel sure that after you have made a careful examination of the lithographing, general make-up and the all gold-eye needle feature, you too will share our enthusiasm. For the Premium user it has the appearance of a $1.00 value.

Each in individual envelope marked as follows: Introductory Price, 50c

Contents—All Gold-Eye Needles

4 papers 10 needles each, assorted 1-5, 3-9, 4-8, 5-10.
1 wide paper, 20 count assorted 3-9.
1 blue steel flat Lodkin gold-eye and tip.
3 gold eye crewel or embroidery needles
12 darners, assorted sizes.

Per Gross **11.50**

No. 22D53

Per Dozen **1.00**

Note! After all the needles have been used, the cover may be framed. In order to show exactly how it will look, we will, for a limited time, include ABSOLUTELY FREE with each initial order of 1 gross, a handsomely framed picture showing the cover design. This frame is complete with glass front and measures about 8½x11 inches.

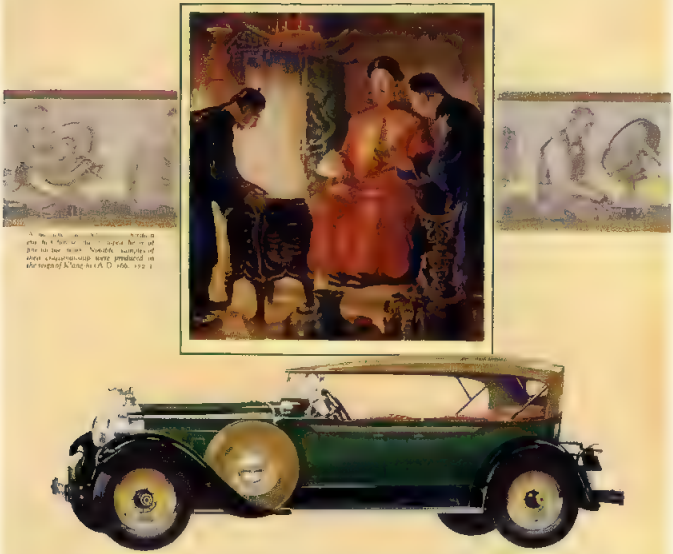
Pencil drawing by O. R. Eggers

THE KITCHEN WING AT MOUNT VERNON

Engraved for THE AMERICAN ARCHITECT *Highlight halftone and tint plate.*

By Powers Reproduction Corporation



TO CREATE a Packard requires more than money, more than factory facilities, more even than engineering genius and marvelous precision in manufacture. It requires artistic talent of a high order in many fields.

The Packard you see gleaming at your door today is a high achievement in hundreds of different arts and crafts each centuries old, but reaching their supreme development in the modern Packard factory.

The very finish and color of today's PACKARD Packard reflect the results of ages of technical experiment as well as the care and expert judgment of Packard artists and craftsmen. The rare, old lacquered cabinets of the Orient were no more perfect specimens of the finisher's art.

The beauty of Packard design is now enhanced by the charm and brilliancy of the color combinations available—all in perfect taste and all long preserved by the unusual processes which protect the artistry of Packard finish through the years.

ASK THE MAN WHO OWNS ONE

133 Four Color Process Plates

A MAGAZINE ADVERTISEMENT

Reproduced from two separate Oil paintings mounted as one copy and proofs of type

Engraved by GRAY-KETTERER-HANSEN, INC., DETROIT

All illustrations in this four-page insert are from four color process plates

A—Made direct from a slab of granite, which is considered difficult subject matter. No means of especially treating the surface was employed and the result is a faithful reproduction

B—The automobile was engraved from an opaque water color drawing and is an example of the smoothness obtainable from this kind of copy, 166 line screen

C—Reproduced from an oil painting The exquisite detail of the original, even the brush strokes of the artist are retained in this illustration

D—This picture is a true interpretation of a Coles Phillips painting Fidelity to the original has been achieved

No. 61 Pagoma

(Packed in ¼ Dozen Cases)

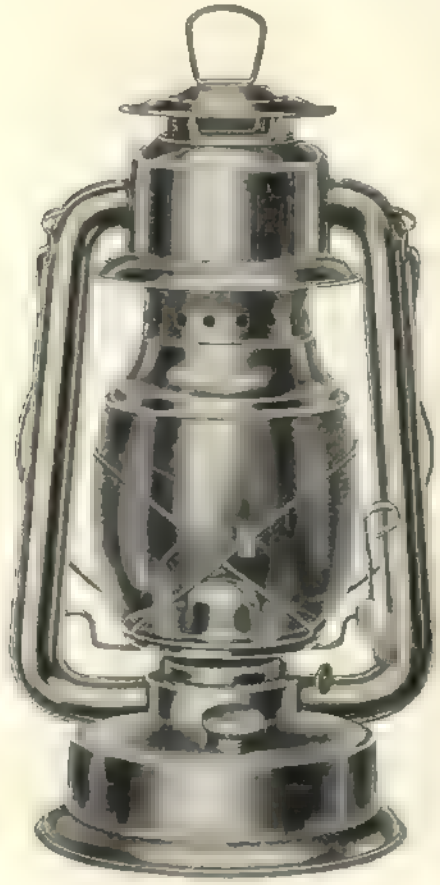
Packed ¼ dozen in a case. Gross weight 10lbs

Same specifications as our No. 156 but with Brass Fount and Red Enamel Frame. Gives 100 per cent longer service.

The best looking lantern ever made. Quality and workmanship guaranteed.

LIST PRICE $36.00 PER DOZEN

No. 156 Pagoma



Packed ½ dozen in a case. Gross weight 18 1-2 lbs

SPECIAL FEATURES

1. Tin used—IX 135 lb. Special Charcoal.
2. Dome and Dome Cap are designed to shed the rain and there are no openings where it can cause rust to form in the interior and cause the inner sleeve to stick.
3. Note the improvements in Dome Cap Lugs. This cover cannot break loose
4. The construction in Dome is so arranged as to make lantern absolutely wind-proof.
5. Perfect combustion is insured by the Cold Blast principle and the construction of the top has just the right ventilation to produce the best light.
6. Fount is made in oval form and bottom is con cave to make it rigid. Has 35 hour burning capacity.
7. Large brass filler with flush cap.
8. Standing bail (new and patented) which performs the additional function of reinforcing the holes where bail is inserted.
9. Lift holder is made of tinned steel and is the simplest and most efficient lift holder ever put on a lantern. Soldered fast to tube and never breaks off.
10. Tinned steel rising cone burner on all Cold Blast lanterns. The burner is exposed so it can be cleaned and wick trimmed readily.
11. New bright clean finish.

LIST PRICE $25.50 PER DOZEN

RAZORS.

PAGOMA

An exceptionally fine line of American Made Razors. The styles and patterns are the best, the same as the best imported, but the quality is superior.

A Line of Razors That Has No Superior Anywhere.

Inspection will disclose a bevel back of the edge This is absolutely a correct taper, which supports the edge and insures positive results in honing or stropping

SAFETY CORN KNIVES.

"A TREAT FOR THE FEET."

The Star SAFETY CORN KNIFE is simplicity itself—just two parts. The holder is heavily nickeled metal, sanitary, can't rust or corrode, with a hard rubber handle

It is scientifically designed, having a flexible blade that conforms to the contour of the blade guard with accurate precision, allowing only absolute correct shaving space between the blade and the safety blade guard

The spacing between the blade and the safety guard of the Star Safety Corn Knife is so graduated that it is wider at the point, gradually tapering down to least space at the handle, enabling the user to shave off a thick paring or the finest flake, according to necessity An important point is the cutting vision that permits seeing the corn beneath and the exact amount you are shaving off

The STAR Safety Corn Knife is so constructed as to be safe However, caution should be exercised in not paring the corn to the point of breaking the skin after the callous part has been removed.

Blades in the STAR Safety Corn Knife are interchangeable you simply slip a new blade in the frame—always have a new keen blade to hand

Net per doz.

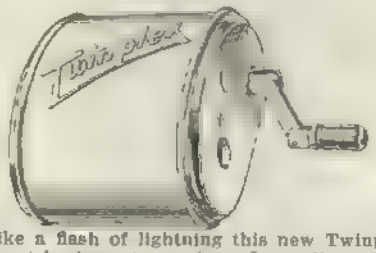
NO. SE2—For Gem and Ever-Ready Blades..... Retail price $3.00	$4 00
NO. SE3—For Enders Blades..... Retail price $3.00	4.00
NO. SE5—For Auto Strop Blades ..... Retail price $3.00	4.00

ONE ONLY IN A BOX.



Like a flash of lightning this new Twinplex will set business to moving. In quality, workmanship and efficiency it is the equal of the $5 00 model. It has the same mechanism, is made by the same skilled workmen from the same high grade materials and it will give the user just as many years of service as the $5 00 Twinplex. Its handsome nickel and red enamel finish will appeal to men instantly.

In order to get the cost down so that dealers will have a stropper which will sell on sight we pack Red Flash in an inexpensive combination carton and case. Also we have eliminated the free repair service guaranteed and have substituted a repair service at nominal cost.

These savings, plus the tremendous increase in sales which the low price will bring, enable us to sell Red Flash to dealers at the astonishingly low price

PARKER VISES.

Parker Vises are the Product of Master Makers, America's oldest Vise Manufacturers and are backed by **79 years of satisfactory service.** The castings are of a mixture of Bessemer Steel and Grey Iron which has been found to be the best material for strength, quality and durability.

The Parker patented swivel base stands as a challenge to produce its equal. This type is furnished on all of our swivel base vises and gives the mechanic the convenience of being able to place his vise in any position, at the same time having the strength of a Stationary Vise.

The Parker method of attaching the steel jaws has never been equaled. Not welded on which requires an entire new casting when breakage occurs nor screwed on the face which causes the jaws to work loose after constant use but riveted to steel and pinned on from the top, at the same time easily removable, also protecting top of vise with a full steel covering which the front jaw does not lo

CABINET SCRAPERS

STANLEY

Japanned, Raised Handles, Tool Steel Blade

The blade may be sprung to a slight curve by means of a Thumb Screw giving ease of operation and quickness of cut. Each

No. 80—11 in. Long, 2⅝ in. Blade, Weight Each 1¾ Lbs. **$1.45**

Extra Blades ..... **.80**

One in a Box.

STANLEY WOOD FACE

Nickel Plated, Raised Handles, Tool Steel Blade

This Scraper has a Rosewood Face for use in the finest cabinet work. Each

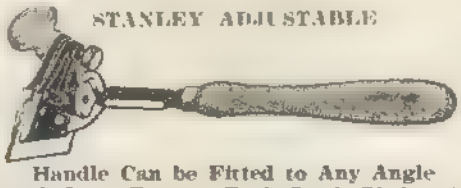
No. 81—10 in. Long, 2⅛ in. Blade, Weight Each 2¼ Lbs. **$2.35**

Extra Blades ..... **.30**

Extra Rosewood Bottom ..... **.50**

One in a Box

STANLEY ADJUSTABLE



Handle Can be Fitted to Any Angle

Japanned Iron Frame, Tool Steel Blade, Adjustable Hardwood Handle and Knob, Holds Blades of different forms and widths. Each

No. 82—14½ in. Long, 3 in. Blade, Weight Each 1¾ Lbs. **$1.90**

Extra Blades ..... **.30**

One in a Box

STANLEY SOLID-SET

Particularly Adapted for Floor Work

Single Handle, Non-Adjustable Tool Steel Blade, Sharpened at Both Ends, Japanned Body, Hardwood Handle Securely Fastened. Each

No. 282—13 in. Long, Blade 3 in. Wide, Weight Each 1½ Lbs **$1.50**

Extra Blades ..... **.30**

One in a Box

STARRETT UNIVERSAL

Stained Hardwood Handle and Grip, Tool Steel Blade

Has eight sharp cutting edges perfectly ground. Ball Joint Handle, locked or released by a slight turn, can be Locked at any angle. Each

1¼ Lbs. **$1.50**

No. 194—7 in. Handle, Blade 3x4½ in., Weight Each

One Dozen in a Box.

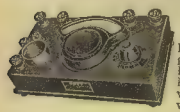
RADIO ACCESSORIES AND PARTS



RADIO TUBE TESTERS
HOYT MODEL 100
6 Volt Scale.

Mahogany base; bakelite knobs and binding posts; white glass covered dial with large black numerals. Consists of a high grade moving coil meter with three scales, specially wound rheostat, standard socket to which may be fitted adapters and the necessary binding posts and connections. Both A and B batteries are required to operate tester and with their use a condition is produced in tube such as exists in the set where by pressing two buttons, first the plate current and then the plate and grid combined may be measured. Designed to detect open circuits, short circuits between plate and grid or between grid and filament, low vacuum or poor emission. Complete with instructions and chart for operating.

Each

No. 100—Base 5x9 ins ..... ✤$32 50

One in carton; wt each 4 lbs.

TUBE REJUVENATORS
JEFFERSON
For 201A, 301A, UV199 and C299 Type Tubes.

Designed to rejuvenate exhausted radio tubes and keep them to their full efficiency and greatly increase their length of life; by so doing makes it unnecessary to turn the filament high to secure proper tube operation. This prevents excessively heating the filaments and keeps the tubes from burning out prematurely.

Complete with 6 feet of cord and separable plug for attaching to regular alternating current lighting circuit; operates on 100 to 120 volts, 50 to 133 cycles.

No.

1 to 12, Each 175

12 or more, Each 14 55

One in box; wt each about 5 lbs. ..... 13 50 / *$7 50*

LOUD SPEAKERS
PATHE, CATHEDRAL
Cone Type.

Cast metal base and border, antique gold and polychrome finish. Heavy non-warping parchment sound reproducer held rigidly in place by metal border. Equipped with 6 feet of silk covered cord and screw for adjusting the tone.

Each

No. C—Height over all 21¾ ins; diam 18 ins ..... 68 55 / *$30 00*

One in carton; wt each 15 lbs.

PATHE, GRECIAN MODEL
Cone Type.

Cast metal border and ornament, rich gold finish.

Because of the area of the diaphragm of the cone, a small proportion of its surface is kept rigid by the cast metal border than is the case of the smaller diaphragm, therefore a larger percentage of the cone vibrates and the range of pitch of the cone is wider.

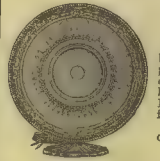
Each

No. 6—Height 17¼ ins; width 15¼ ins ..... 56 25 / *$25 00*

One in carton; wt each 6 lbs.

✤**F. O. B. Massachusetts Factory Only.**

RADIO ACCESSORIES AND PARTS
LOUD SPEAKER



TOWER, Cone Type.

Ornamental cast metal base, brown crystal lacquer finish; felt padded. Acoustically perfect cone of specially prepared light brown paper, non-warping. Direct drive unit, eight connections from unit to cone.

Height 17½ inches; diameter cone 16½ inches.

No. T5C5

1 to 11, Each 19 95

12 to 47, Each 18 54

50 or more, Each 17 10

One in carton; wt each 7 lbs. *$9 50*

—BRANDES—
Cone Type.

Cast metal base, antique bronze finish. Delivers great volume reproducing speech an music. Resonating chamber brings out low tones enriching the quality of reproduction. Not affected by atmospheric conditions; adjustable unit. Complete with 5 feet of silk covered cord and connections.

Each

No. 1300 Diam cone 15¼ ins; height over all 16⅜ ins 30 00

One in carton; wt each 5½ lbs. *$12 50*

BRANDES, Cone Type.

The diaphragm is the entire cone made of heavy parchment paper, secured at the outer edges to the frame. Actuated by a metal rod running from the apex of the cone to the magnets similar to those of other loud speakers and inclosed in a small round disc. Theoritically the cone speaker should reproduce a wider range of note than a speaker having a smaller diaphragm and horn. For mantel or library table ornament. Dark mahogany finished cabinet. Unit used is of special design; there is a small armature which actuates on the push pull principle that reacts to the faintest impulses, thus reproducing extremely low and high tones. Equipped with 5 foot extension cord.

Each

No. 1000—Height 13⅛ ins; width 10⅛ ins; depth 7¼ ins 69 30

One in carton; wt each 9 lbs. *$35 00*

—OLD KENTUCKY HOME—
Cone Type.

Cast metal base, rich bronze finish; heavy parchment cone, mottled brown finish with gold decorations, gold and black braid around the edges. Adjustable unit mounted on wood eliminating metallic sound. Complete with 5 feet of silk covered cord and connections. May be used on all receiving sets from 90 to 450 volts.

Each

No. OKH-Cone—Diam cone 15 ins; height over all 18 ins 33 90

One in carton; wt each 11½ lbs. *$16 50*

RADIO ACCESSORIES AND PARTS

DETECTOR TUBES

Radiotron.

Operates on Storage Batteries Only.

A vacuum tube detector for amateur and experimental wireless stations. It is not only a detector or spark receptor, but is also an excellent tone frequency amplifier for magnification of the telephone circuits in vacuum tube receiving circuits.

	Each
No. UX-200A—New R. C. A. storage battery detector. This tube is not critical to plate voltage or to filament temperature. In many receivers it will bring about an increase in sensitivity approximating that of an additional step of radio frequency amplification. Filament volts 5.0; filament amperes, .25; plate volts 45.0. Length over all 4 1/2 ins	11 55
One in carton; wt each 1 lb.	*$5 00*

AMPLIFYING TUBES

Radiotron.

Operates on Storage Batteries Only.

A vacuum tube radio and tone frequency amplifier. For magnifying radio and tone frequency currents. Can be shifted from one socket to another in a cascade outfit without loss of signal audibility.

	Each
No. UX201A—Will fit either Navy Type socket or new R. C. A. Standard base socket; diam 1 9/16 ins; height 4 7/16 ins	4 65
	$3 00
No. UX210—New R. C. A. super power amplifying tube; draws 1.25 amperes; designed for use in A. C. operated power amplifiers	20 79

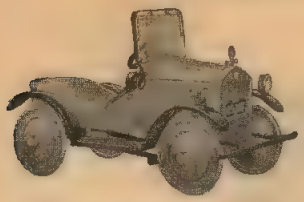
STEEL CRAFT HI-SPEED AUTOMOBILES



DODGE ROADSTER

For Children 3 to 7 Years

This is a trim, neat racy little car.

Over-all Dimensions—Length 38 in., width 21½ in.

Color—Brilliant green baked enamel—effectively striped.

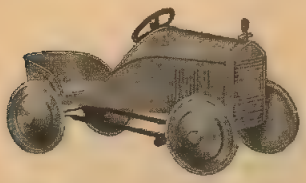
Equipment—Springs, adjustable pedals, bumper, windshield, horn, motometer, designed instrument board, etc.

Wheel—10 in. double disc, with ¾ in. rubber tires.

Weight—Each 61 lbs.

No. M38—With plain crank drive.....each $20.00
No. M39HS—With Hi-Speed drive.....each 23.25

ONE IN A CRATE



DURANT

For Children 3 to 7 Years

The long cutaway hood makes this model very racy.

Over-all Dimensions—Length 37½ in., width 21½ in.

Equipment—Springs, designed instrument board, momometer, horn and adjustable pedals.

Color—Brilliant blue baked enamel finish, with fine striping.

Wheels—10 in. double disc, with ¾ in. rubber tires.

Weight—Each 52 lbs.

No. M45—With plain crank drive.....each $15.85
No. M46HS—With Hi-Speed drive.....each 19.10

ONE IN A CRATE

DODGE FIRE CHIEF

For Children 3 to 7 Years

Overall Dimensions—Length 38 in., width 21½ in.

Color—Body and wheels Fire Chief Red baked enamel, attractively striped.

Equipment—Bumper, steel fenders with steel running boards, springs, adjustable pedals, large nickeled bell with pull cord.

Wheels—10 in. double disc with ¾ in. rubber tires.

Weight—Each 61 lbs.

No. M42—With plain crank drive.....each $18 50
No. M43HS—With Hi-Speed drive.....each 22.80

No. H510E—10 in., Universal motor, direct or alternating current, 110 volt, 60 cycles. Black enameled finish with brass plated blades, and heavy wire guard. Automatic spring relief in oscillator movement against contact. Porcelain insulated speed control, two speeds and stop. Height 13¼ in., width 10¼ in. Complete with cord and plug, w't 7 lbs., each $15.55

ONE IN A CARTON

"PEERLESS" DESK AND BRACKET FANS

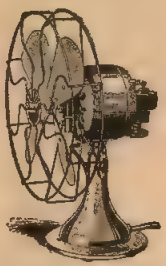
Finish—The brass blades are highly polished and lacquered. Base and other parts baked on black enamel.

Construction—Cast enclosing shells and base, can be adjusted to any angle desired, either for a bracket or desk fan. The construction is simple and the field of service large. Large air velocity with minimum current consumption.

Speeds—Has four point switch for three speeds, namely, low, medium and high, ranging from 900 to 1500 revolutions per minute.

Equipment——8 ft. cord and attachmment plug included.

OSCILLATING.



PEERLESS oscillating fans can be used either as a desk or bracket fan without the use of an adaptor.

They are designed to move from side to side through a desired angle, thus distributing the air over a larger area than with a stationary fan.

DIRECT CURRENT

110 Volt.

No. H1212E—12 in. diam., 3 speeds, 960, 1460 and 1860, w't boxed 40 lbs., each $48.30

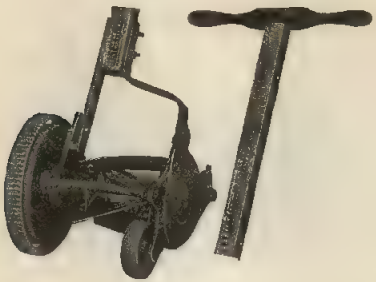
LAWN TRIMMERS.

PENNSYLVANIA.

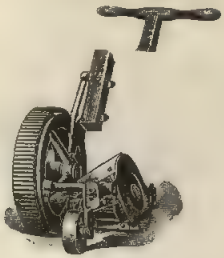


Ball Bearing.

This machine will cut to within ⅜ of an inch of wall or tree trunk and mow any border wide enough to run one wheel on; constructed of crucible tool steel in both cylinder and stationary blades; self-sharpening; ball bearings with patented adjustments; four 6 inch crucible steel blades.

Pennsylvania. Wt. each, about 28 lbs. .....Each **$14 00**

PENNSYLVANIA UNDERCUT.



Ball Bearing.

The slanting side plate and conical cylinder make it possible to cut all the grass left by the regular style of lawn mower. The unique construction permits cutting not only close up to wall, fence, trees, etc., but it will get the grass under a fence or cut rock base of tombstones, house foundations and other places hitherto out of reach of anything but hand shears. Constructed of crucible tool steel in both cylinder and stationary blades; ball bearings with patented adjustments; has four 5½ inch crucible steel blades.

Pennsylvania Undercut. Wt. each, 32 lbs.....Each **$16 00**

LAWN ROLLERS.

DUNHAM'S WATER-WEIGHT.

The weight of this roller can be regulated to suit a soft lawn, firm turf or tennis court; can be quickly filled with the garden hose. The edges of the drum are rounded back, to prevent cutting lawn; all seams are perfectly smooth. The drum and heads of the roller are formed from heavy high-carbon steel plates; all seams are welded, making a strong one-piece container for the water. Drum is painted a bright green; frame is painted red with a hardwood varnished top handle.

No. 4. Diameter of drum, 18 inches; length, 24 inches. Weight empty, 76 lbs.; filled with water, 274 lbs.; filled with sand, about 400 lbs.....Each **$25 00**

LAWN MOWERS

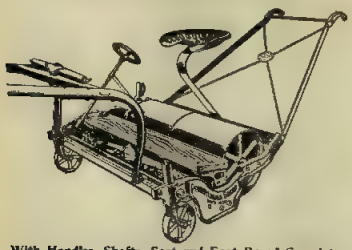
PENNSYLVANIA PONY OR TWO-MAN

11 Inch Drive Wheels, 6¾ Inch Four-Blade Cylinder

This machine bridges the space between our 21 inch hand mowers and the regular horse sizes, combining the strength of the latter with the mobility of the former, making it especially useful on large lawns where the surface is broken by walks and shrubbery, or is too hilly for a regular horse mower. Can be handled by two men where a horse is not available. This machine is fitted with the Enos yielding, self-sharpening lower knife, double train of gears, extra heavy blades and large cylinder, fitting it for use in high grass. Fitted with lugs to attach the Braun Grass Catcher. Will cut grass to within ½ inch of ground. **Finish**—Green frame and wheels; red cylinder and handle, gold striping. **Blades**—Crucible tool steel, oil hardened and water tempered. **Wheel Base**—Extreme width, 35 inches. **Wheels**—Broad tread, 11 inches in diameter. **Parts**—Malleable and cast, accurately machined to insure noiseless service.

Width of Cut, Inches 25
Weight Boxed, Including Handle, Lbs. 150
Each **$100.00**

PENNSYLVANIA GRAND HORSE



With Handles, Shafts, Seat and Foot Board Complete

Finish—Aluminum bronzed body with red and blue striping, gold bronzed rollers and cylinder. **Blades**—Crucible tool steel, oil hardened and water tempered, extra wide. **Gears**—Extra large fitted with bronze bushings. **Extreme Width**—30 inch cut, 41 inches overall; 38 inch cut, 49 inches overall. **Double Rollers**—15 inches in diameter. **Parts**—Malleable and cast, accurately machined to insure noiseless service. **Bottom Knife**—Self-sharpening. Raised lip or upturned edge style. Crucible tool steel. **Cylinder Adjustment**—All wear on either revolving or stationary knives is taken up by a pair of set screws on the top of the cylinder journal boxes, allowing the cylinder to drop on the stationary knife, which is rigidly bolted and remains fixed in place. The cylinder journals run in phosphor bronze boxes, and these are split so that all wear can be taken up by a set screw. The journal box is floating or self-aligning. **Cutting Adjustment**—The wheel at the right regulates the height of cut from ⅝ to 2⅝ inches. The operator can instantly change from low to high cut, or an intermediate one.

15 Inch Rollers. 7½ Inch Cylinder. 30 Inch Cut

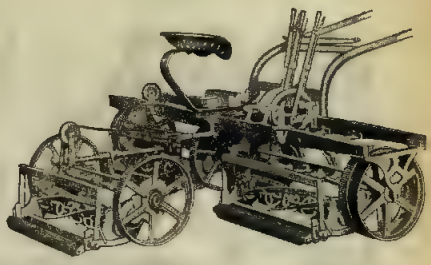
LAWN MOWERS

PENNSYLVANIA TRIO



Can be Drawn by Horse or Tractor

A three-unit type mower; made especially for golf courses, public parks, cemeteries and all grounds where large areas of undulating surface present difficult problems of lawn mowing. The Pennsylvania Trio consists of three specially constructed, 30-inch, 4-blade mower units, high geared, so yoked to a frame or sulky that a cutting swath of 86 inches is attained. Each mower unit acts independently of the others, being pivoted to the frame, enabling them to ride over uneven surfaces and to closely follow the undulation of the ground. The frame is supported on two separate ground wheels, as shown in the illustration, thereby relieving the cutting units of any extra weight, overcoming the objection of wheel marks on the turf and also giving the mowers greater flexibility and greater efficiency.

Automatic Clutch—Each mower unit may be raised separately by means of the three levers, and when lifted to the highest point the cutting cylinders are automatically disengaged or idled. When lowered, the cylinders are again automatically engaged.

Wheels—The wheels are 18 inches in diameter and have a tread of 2½ inches. They are fitted with automobile-type ball bearings.

Cylinders—4-knife, 30 inches, 6¾-inch diameter. The knives are the same "Pennsylvania" Quality of crucible steel, oil-hardened and water-tempered, as used in all Pennsylvania mowers.

Cylinder Bearings—The cylinder carrying the knives revolves in a universally adjustable bronze bearing. These bearings can be adjusted for wear and cannot get out of alignment. This insures true-running of the cylinder, and a bearing which will last indefinitely.

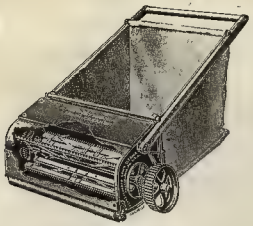
Bottom Knife—To insure great rigidity, the bottom knife cast-back is bolted solidly to the side plates. This eliminates all chances of the mower becoming twisted or strained. The blade is crucible steel, oil-hardened and water-tempered, new flexible type which reduces friction and wear, and helps make the mower self-sharpening.

Adjustment of Knives—Instead of the usual method of raising the bottom knife for wear, all adjustments are quickly made by tightening two regulating screws and bringing the cylinder closer to the bottom knife.

Assembling—The mowers are absolutely interchangeable, will fit in any position. The "sulky" style frame may be used for pulling other equipments, such as rollers, seeders and other cultivator tools.

Specifications—Net weight, complete machine, 860 lbs., net weight, individual mower, 195 lbs.; boxed, including single shafts or draft pole for double team, 1100 lbs.; cutting width, 86 in.; width overall, including sulky or ground wheels, 109 inches.

Complete Machine ..... Each, **$500.00**
Individual Mowers ..... Each, **125.00**
Extra Cutting Units ..... Per Pair, **15.00**



A Profitable Lawn Accessory

The man who takes a real pride in the appearance of his lawn knows that, if sunlight and dew are to reach its roots, it must be kept both short and *clean*.

Such a man not only buys a PENNSYLVANIA Quality Mower but is, also, an active prospect for a PENNSYLVANIA Lawn Cleaner and Rake. By means of rapidly revolving rakes, this machine acts like a vacuum cleaner on the lawn, removing cut grass, leaves and all other foreign matter. It is also made with brushes for lawn sweeping and for golf greens. With this cleaner, one boy can do as much work as three or four men with rakes.

Place your order now for this labor-saving accessory and be prepared to make a liberal extra profit from your lawn mower sales.

Our Golden Anniversary

Since 1877, when the first PENNSYLVANIA Mower was built to meet the highest mechanical and material standards of that time, PENNSYLVANIA Quality has been acclaimed in every civilized quarter of the globe.

Today, there is a PENNSYLVANIA Quality Mower for every grass-cutting purpose and they all embody, in connection with the original high ideal, the experience and research of half a century.

CAN YOU OVERLOOK THIS EVIDENCE?

Mr. Happy Man Says—

An Atkins Silver Steel Saw costs just a few cents more than a cheap saw, but Oh, what a difference in cutting efficiency.

To Attract New Customers!

Included in the great Atkins Sales Plan this year is a wonderfully complete idea to bring many new customers into your store. Without going into all the details of Atkins Demonstration Plan, we want you to appreciate that it includes letters to selected lists of men who will be valuable customers for you. It includes features in your store which will make it a center of attraction to men like those shown in the picture—men who buy and use better saws and tools.

There is no "theory" about the popularity of Atkins Saws. Can you overlook this evidence?

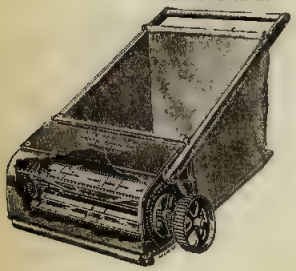
GRASS CLEANERS

PENNSYLVANIA



This machine will remove from the lawn not only the cut grass but all sorts of litter, leaves and trash, leaving the grass standing upright and free from foreign matter that prevents the sunlight and dew from getting to the roots. The metal teeth rake up everything on the surface of the lawn, and in combination with the current of air carry it to the canvas receptacle or basket. The suction created by the three rapidly revolving rakes cleans the lawn on the same principle as the vacuum cleaner operates on carpet. Easy to operate and will do as much work as four men with hand rakes.

LAWN TRIMMERS

PENNSYLVANIA BALL BEARING

8 Inch Drive Wheel, 5½ In. Four-Blade Cylinder

Will cut to within ⅝ of an inch of wall or tree trunk and mow any border wide enough to run one wheel on. Crucible tool steel in both cylinder and stationary blades. Self-sharpening. Ball bearings with patent Pennsylvania adjustment, light running. Cylinder is 5½ inches in diameter and has four blades. Finished in aluminum and gold bronze with red striping. Fitted with New Staytite handle, with adjustable steel clamps on the cross bar.

No. 1 Width of cut, 6 inches. Weight boxed, including handle, 20 lbs. ..... Each, **$18.00**

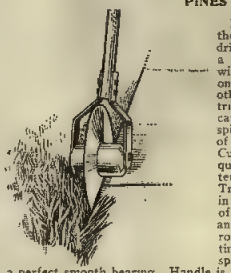
PENNSYLVANIA UNDERCUT BALL BEARING

9½ Inch Drive Wheel, Four-Blade Cylinder

Permits cutting not only close to a wall, fence, tree, etc., but it will get the grass under a fence or rock, cut base of tomb stones, house foundation, and other places hitherto out of reach of anything but hand shears. The slanting side plate and conical cylinder make it possible to cut all grass left by the regular style of lawn mower. Has four blade cylinder Cylinder is finished in gold bronze with red cutting edge. Body and wheel finished in dark green with gold bronze striping Fitted with new Staytite handle, with adjustable steel clamps on the cross bar.

No. 2 Width of cut, 6½ inches. Weight boxed, including handle, 34 lbs. ..... Each, **$19.00**

PINES



Is used to finish up and trim the edges along walks, curbs, driveways, etc. Does not require a trench or ditch. It is used with one of the traction rollers on the walk or curb and the other on the turf Mowing the trimmer forward or backward causes the traction rollers to spin the cutting edge at a speed of 24 times that of the rollers. Cutting disc is made of highest quality saw steel hardened and tempered and self-sharpening Traction rollers are 2½ inches in diameter, 2 inches wide, made of hard maple, paraffine treated, and will not warp or swell. The rollers are attached to the cutting disc by a heavy brass tube spun over at both ends, making a perfect smooth bearing. Handle is made of ash, wax finish.

No. 5 Diameter of cutting disc, 6 inches; length of handle, 42 inches; length overall, 49 inches. Approximate weight, 8½ lbs. Each, **$2.50**

Twelve in a Crate

N. W.

Heavy stamped steel frame; compression spring controlling blades, assuring clean cut; ground and tempered steel shears, painted red, hardwood roller and handles.

No. 3 Length of cutting edges, 7 inches; length of handles, 4 ft. Approximate weight, 7 lbs. Each, **$3.00**

Golden muffins, sizzling bacon— cooked in a Jiffy on the Perfection

New Colors
1927 Stores

Gray porcelain enamel tops. Gray legs. Satin-black body finish. White enamel warming cabinets. Large white front ovens—On newest Perfections, and all those with Superflex burners

CRISP SIZZLING BACON. Fragrant coffee. And light, toothsome muffins hot from the Perfection Oven. Breakfast is off to a smiling start! It takes just a few minutes from the time you light the stove until breakfast is all ready to serve.

It's easy to cook delicious meals with a Perfection. Cooking starts at the touch of a match to the wick. Clean, intense heat pours up the long chimneys direct to the cooking.

No heavy coal, wood, or ashes to carry. And no sooty kettle bottoms to scour! They stay clean and shiny as when new. Every drop of oil is completely burned in the long chimneys before the heat reaches the cooking. No smoke, no odor.

Perfection is *always* quick, convenient, and dependable. See the newest models at any dealer's. Priced from $7.25 to $130, for stoves ranging in size from one to five burners.

Engraved by ROGERS ENGRAVING COMPANY, Chicago

Cold, delicious, invigorating

Tinkling ice, good coffee and rich, creamy Carnation . . . there's a delicious, refreshing summer drink. Sweetened or unsweetened, in tall glasses of flavor but in the genuine nourishment provided by the pure, fresh, *doubly-creamy* Carnation.

A great hot-weather ally is Carnation Milk, dependably good no matter what the weather. Ready to lend its creamy richness to summer fruits and cereals . . . and to *cooking*. There, perhaps, it makes its most brilliant showing—giving smoothness, delicacy, fineness of texture which experts agree cannot be equaled by the best of fresh milk.

Carnation is simply pure cow's milk, evaporated to double richness, sterilized for safekeeping and homogenized to distribute the cream through every drop. Try it. You'll see!

The Assurance of a Better Score

Judge this improved Pinehurst from every standpoint and it will measure up to the standard of the World's most expert golfers. It will give consistently more yards per drive ever known. It is dead on the green and no truer ball for putting has ever been made. A new Pinehurst in a new handy package, a longer ball, a truer ball—of distinguished appearance and marking—a Wilson. Play it and know the joys of greater distance and positive accuracy. The Pinehurst and Wilson V Balls are marked in four different colors for ease in identification.

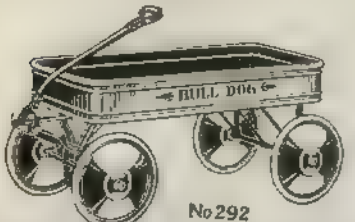
ONE DOZEN IN A BOX

"BULL DOG" STEEL COASTER WAGONS.



No 292

The Last Word in Low Priced Steel Wagons.

Body—Size 15x32 inches; heavy sheet steel. Large roll around top of box, sides beaded. Top and bottom are joined in a heavy double lap seam, making a firm and very rigid box.

Gear—Improved corrugated gear with unusual strength. Wooden cleats between gear and bottom of box to give a base for the gear to rest on and so the bolts will draw up better and stay tighter than when iron is drawn against iron. These cleats also eliminate noise.

Wheels—10-in. roller bearing wheels, ¾-in. tires; nickeled hub caps.

Handle—Tubular handle curved to bring it in a practical position for steering. Handle has attachment to keep it from bumping body.

Finish—Box is finished in a snappy red, stenciled in gold, wheels in red, gears and handle black.

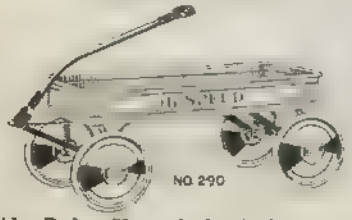
Net Each

NO. 292—Size 15x32 in., 10 in. steel disc wheels, ¾ in. tires..... $7.50

In lots of 12 or more..... $7.30

ONE COMPLETE IN CARTON; WITH PAPER TO PROTECT FROM SCRATCHING.
SHIPPING WT. 31 LBS.

HI-SPEED ALL STEEL COASTERS. "PAXTON CYCLONE."



Wide Body—Channel Steel Gear—Roller Bearings—Steel Throughtout—1-inch Rubber Tires.

Body—Size 14x30 inches inside; depth 4 inches. Top of body has ⅝-inch roll and sides heavily beaded. Bottom also is beaded which makes it very rigid.

Gear—Channel Steel Gear with ½-inch cold drawn steel axles.

Wheels—Diameter 9½ inches with 1-inch corrugated rubber tires; roller bearing; double disc, riveted.

Handle—Tubular handle curved.

Finish—Finished in a beautiful orange baked enamel and stenciled in black. Wheels, tangerine, striped in black. Gear, black enamel.

Net Each

NO. D290—Size 15¼x31x4, 9½-in. wheels with 1-inch corrugated rubber tires, double disc roller bearings, tubular handle curved..... $10.62

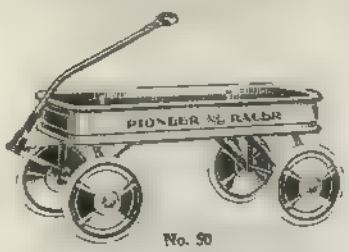
"PIONEER" ALL STEEL RACERS.

The Best on the Market.



No. 50

An indestructible all steel coaster wagon, unsurpassed for strength, durability and beauty.

Body—Body has a ¾-inch roll around top and ⅝-inch roll around bottom. Heavy gauge steel, reinforced with wide panel extending around sides and ends of the box. Box made of one piece formed over dies, absolutely true to form and size. Bottom of box is of one piece extra heavy sheet steel, with the edge formed to make a seat for the sides to fit in, and with the edge of the bottom turned down so it will not scratch or harm the child, and also giving great strength to the bottom. The bottom is reinforced underneath with steel cleats. Top box is removable, and is fastened to the bottom with four braces extending almost to the top of the box inside.

Gear—Is of heavy steel, easily assembled, ½-inch cold rolled axles. Wide braces to body.

Wheels—Double disc, roller bearing, with 1-inch corrugated tires. Hub caps attached with a wrench which is supplied with every wagon. The hub caps can be put on or taken off freely, and when put on will stay on.

Handle—Tubular handle curved.

Finish—The finish of the top part of box is a beautiful red, baked on, stenciled in gold. Bottom of box is black enamel, baked on. Gear, black enamel. Wheels, red, striped in yellow.

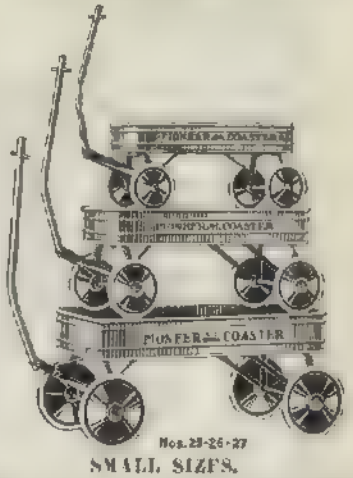
JUNIOR "PIONEER" ALL STEEL COASTERS



Nos. 25-26-27

SMALL SIZES.

Steel Gears—Roller Bearing Disc Wheels.

Note particularly the method by which the top of the box, that is the sides and ends, is attached to the bottom. This is a seaming process which leaves a heavy wide fold around the bottom of the box. This extends below the bottom an eighth of an inch and makes the box very stiff and strong. No other manufacturer is making all steel wagon boxes by this method

Strength—durability—and beauty puts this line of all steel wagons in a class by themselves.

Body—Has ⅝ inch roll at top and sides heavily beaded. Bottom also is beaded making it very rigid. Top and bottom are jointed in a heavy double lap seam, which is done on a special built sheet metal seamer. This seam at the bottom, together with the roll at the top and beads on the side make not only a rigid but very classy looking body. The bottom of No. 27 is reinforced with four steel cleats; on the Nos. 25 and 26 there is one cleat only at fifth wheel.

Gear—Heavy band steel ¾x⅛ inches—arched. Band steel braces to body. Dressed hard wood handle shellaced and varnished.

Finish—Body finished in a beautiful royal blue baked enamel and stenciled in gold Gears, black enamel and wheels, red. Handles, red enameled.

	Net Each

LIVE BOXES AND FISH WELLS

One of the most convenient accessories for a fisherman is a live box in a boat. This is placed under one of the seats, can be divided into two compartments where desired, one for live bait and one for fish. Holes in the bottom of the boat are so arranged that the motion of the boat causes a continuous flow of fresh water in the boxes. No dead minnows, fish always fresh when you reach your cottage.....each $17.20

GUARANTEE

All of these boats are guaranteed both as to material and workmanship. Any defects will cheerfully be made right.

CANOE GLUE

Its particular properties are those of flexiblity and durability, clean and insoluble in water.

Invaluable for quick repairs on either canvas or cedar canoes.

Any puncture or leak in boat or canoe can be repaired in five minutes.

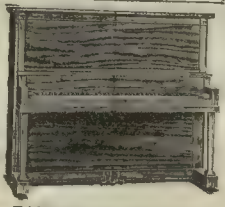
THE prestage of the Playwell Pianos holds the world over as the inevitable result of the determined policy and standard to produce the very best in piano construction. The Playwell Piano embodies every quality that means lasting service and satisfaction—the natural result of years of fine piano building.

The tone is rich, pure and musically perfect. Every case is artistically proportioned, beautifully finished, staunchly built and mechanically correct. As either a Straight Piano or Player they are musical masterpieces. Guaranteed and backed by an organization of over half century's musical experience.



Height 55 inches; width 63½ inches; depth 27½ inches. Mahogany veneered.

Outstanding Features By
WOOLNOUGH
The Foremost American Animal Manufacturer

Powder Puff Sunbonnet Girl

Powder Puff Bear Cub

Powder Puff French Gamin

POWDER PUFF NOVELTIES!

made by Woolnough are without a doubt the finest in detail and construction that are being offered for the approval of the trade.

Doll Novelties of powder puff plush all have embroidered facial features. The bodies and costumes comprise a riot of pleasing color combinations. This beautiful series is made up of Comical Clowns, Fairy Tale Bears, Sunbonnet Girls, Ballet Skirt Girls, Snow Girls, Snow Boys and Cute French Urchins

The New "Lonleggs" Series is receiving a wonderful response from the public. They have chubby bodies, long dangling legs and the family consists of Monkey, Teddy Bear, Rabbit, Dog, Cat, etc. Comes in 2 sizes.

Standing Animal Series of powder puff plush comprises cute elephants, pussy cats, bunnies and a beautiful series of cats with bushy, curving tail.

Full Jointed Teddy Bears, both regulation and chubby, are also offered in the powder puff series.

"TOWZER"

The most beautiful shaggy haired terrier that we have ever offered to the trade,—alert in expression—smart in appearance—his cocked ears always at attention—his eyes asking you, "What next?" Towzer has pure white breast and nose with shaded tan back, head and ears—made in 10 sizes of beautiful shaggy silk plush.

"MUGGS"

Younger brother of Towzer, a trifle modified in material and design to meet the popular demand. Comes in 6 sizes sitting and in 5 sizes standing. Standing can also be had on wheels.

VITAMINS

Pay a Penny for Its Life!

Life and growth for Chicks come from vitamins packed in Checkerboard Bags. One cent for six weeks' feed pays the difference in cost between feeding Purina Poultry Chows and feeding average unbalanced, untested rations. 50% of the chicks fed average mixtures die. Purina saves 90%. There's real profit in saving chicks' lives.

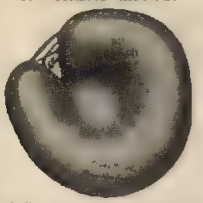
MITTS AND GLOVES.

REACH.

THE "BABE" RUTH LINE.

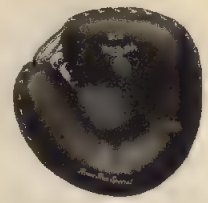
Special models of base ball mitts and gloves for players who want moderate priced equipment which has all the desirable playing and wearing qualities. "Babe" Ruth assisted in designing this line and his signature on each number is his endorsement of its fitness for use in playing the game.

CATCHERS' MITTS.



No. RC1—"Babe" Ruth Home Run Special. A regular big league professional model with every quality necessary to make a good mitt. Made of selected light brown, smooth grained horse hide, the toughest and best leather for the purpose. The entire face is moulded from one piece of leather. The fingers are double stitched to the back. The edges are leather bound and laced. A strap and buckle at the wrist hold the mitt snugly to the hand. A felt lined, leather extension under the buckle prevents chafing on the back of the hand. A deep, sure-catch pocket is formed in the felt padding and moulded in the leather face. A special lacing between the thumb and face of the mitt allow adjustment of the depth of the pocket. This mitt will do all the catcher expects it to do under all playing conditions. Wt. each, 2¼ lbs. ..... Each $8 00

CATCHERS' MITTS.



No. RC2—"Babe" Ruth Home Run Special. This mitt is moulded on one of our most popular professional patterns. Compact and snug fitting, it hugs the hand and the built-in, moulded pocket is always in the right place which helps to make sure catches of hard pitched or thrown balls. Made of real horse hide of a dark brown color. Bound and laced edges; a hand formed pad of good felt; professional style trap lacing between thumb and face allows adjustment of pocket; strong strap and buckle at the wrist with felt padded extension under the buckle to protect the back of the hand. Every little feaure that makes a real mitt, with all of the desired playing and wearing qualities. Wt. each, 2 lbs. ..... Each $5 00

BASEMEN'S MITTS.

No. RB1—"Babe" Ruth Home Run Special. It is easy to note the sure-catch qualities of this mitt when it is put on the hand. It gives the player confidence in his ability to stop and hold any balls which come within reach. Made of light brown horse hide and fitted with a hand-made, felt pad with the natural built-in pocket; the pad may be adjusted if desired; the edges are leather bound and leather laced: strap and buckle at wrist with protector to prevent buckle from rubbing the hand; lacing between thumb and face permits adjustment of depth of pocket; high or low, wide or close, this mitt helps to hold them. Wt. each, 1⅛ lbs. ..... Each $5 00

FIELDERS' GLOVES.

No. RF1—"Babe" Ruth Home Run Special. A real professional glove. The pocket and fit are perfect; the fingers move as quickly as your own and it always stays in place. These features are built right into each glove. The horse hide leather is specially tanned and specially oil-treated to give it permanent flexibility and extra wearing quality. The hand-made padding is fitted into each glove. The seams are leather welted and diverted between the fingers to prevent ripping. Laced at wrist tot allow change or adjustment of padding. Long thumb with lacing adjustment to form a wider or deeper pocket. Lined with durable, soft leather and leather bound. A glove that will measure up to the demands of any player. Wt. each, 15 ozs. ..... Each $5 00

FIELDERS' GLOVES.

No. RF2—"Babe" Ruth Home Run Special. The playing features and wearing qualities of this glove are better than the price would indicate. Made of a very fine selection of dark brown horse hide, lined with soft glove leather; strongly bound edges; leather welted seams, diverted between fingers to prevent ripping; laced at the wrist to permit change or adjustment of padding. A good hand-formed padding which stays in place; wide, deep sure-catch pocket; wide web between thumb and first finger. It has all of those fine points which assist in good playing. Wt. each, 14 ozs. . Each $3 50

When ordering Mitts and Gloves for use on right hand, specify full right.

BASE BALL BATS.

LOUISVILLE SLUGGERS.

Baseball Bats are Not Guaranteed.

We carry a complete stock of Louisville Slugger bats in all grades for both the professional and amateur players. These bats are made of woods that will stand the test, having been thoroughly seasoned and air dried, giving them greater driving power and strength. In ordering bats, specify the model after the number of bat desired, viz., 40 Ty Cobb, 250 Babe Ruth, 125 Geo. Sisler, etc.

No. 250. No. 40K. No. 40. No. 125. No. 20. No. 10. No. 5. No. 40J. No. 16. No. 15. No. 11B. No. 13.

No. 250. Made from choicest select second growth ash; straight grain; weather seasoned; hand bone rubbed; dark finish. "Trade Mark" assorted models as follows: Babe Ruth and Geo. Sisler. Lengths, 32 to 36 inches; weights assorted 35 to 46 ounces. One in a paper bag; 1 dozen in a crate weighing about 38 lbs.....Each $2 50

No. 40K. Kork grip handle; made from the choicest second growth ash, with a new kork grip handle; on account of the yielding character of cork, it affords a perfect grip, absorbs perspiration, eliminates vibration and consequently will not sting the hands; assorted models. Autograph of players on each bat. Hand cured "oil tempered" finish. One in a paper bag; 1 dozen in a crate weighing about 33 lbs. .....Each $2 50

No. 40. Made from the choicest second growth ash; straight grain; hand turned; highly polished finish; none are genuine without "photo trade mark" transfer and autograph of celebrated players such as Ty Cobb, Eddie Collins, George Sisler, Bucky Harris, Geo. A Sign that points the way TO GREATER PROFITS!

Let Us Send You One

This sign over your work bench is a constant reminder to check timing chains for possible replacements. Put it to work and watch the profits grow. Your customers will also benefit. Replacing the chain in time may save a towing bill.

The "Arched" Link

The principle of the arch is applied to the shape of Duckworth links. The result is a much stronger link at points of greatest strain. Duckworth chains run smoother and wear longer.

Uniform Wear on the Sprocket Teeth

Ground link surfaces on DUCKWORTHS secure even wear on the sprocket teeth. The uniformity of each link produces even pull on the pins Replace with Duckworths

Individually Packed

Every Duckworth chain is wrapped in oil paper and packed individually in a strong fibre container. Send for one of the "reminder" signs and we will include a copy of the new timing chain handbook containing the latest data on 1927 cars.

A T J.-10

For the Light Car

No. 14

This is a fast-acting balloon tire jack of one-ton capacity. Lifts 9½ inches. Positive, long-handled control. No need for manual adjustment. Operator places jack in position with handle. A wonderful seller. A splendid jack for general service. All Reliable Jacks are red, but not all red Jacks are Reliables—or reliable. Look for the trade mark before buying.

Ask us about these powerful, hydraulic, heavy-duty, service jacks. No. 50, general garage use. No. 70, for trucks. No. 71 for buses. Low and long, they handle heavy loads with ease. Unscrupulous manufacturers imitate the distinctive and long-established red color of the Reliable line, but they cannot equal the stamina and genuine worth of these jacks.

PEARL STOCKS

Pearl (properly speaking, Mother of Pearl) is cut from the inside of the shell. A portion of the pearl is yellow and a portion is blemished, balance fair to fine. We use for our pearl stocks only the best selected material, and for this reason our prices cannot be as low as you may find quoted on inferior grades. Our prices, however, are in keeping with the quality.

ONE IN A BOX, TEN IN A CASE

REPEATING SHOTGUNS

REMINGTON HAMMERLESS TAKE-DOWN

REMINGTON MODEL 17

Developed to meet the rapidly growing demand for a very light, small gauge gun of this type. It embodies the Remington idea of Solid breech Hammerless—Take-Down and carries out all the popular features of the Model 10-12 gauge Repeating Shot Gun.

Symmetrical lines made possible by bottom loading and bottom ejection, very quick and accurate pointing (due to its light weight), easy action, for rapid firing, and hard shooting qualities. It is chambered for 2¾ in. shells, which permits of a load heavy enough for duck hunting.

Barrel—20 gauge Remington Highest Quality Steel, Blued finish, solid breech, chambered to take shells from 2½ to 2¾ in. in length.
Stock—Walnut stock, half pistol grip, length 13¾ in., drop at heel 2¾ in., drop at comb 1¾ in., walnut fore-end.
Frame—5 shot, Model 17, Take-Down, bottom loading and bottom ejection.
No. C2017 Plain barrel, 28 and 30 in., full choke, or 28 in., modified choke, w't about 5¼ lbs.....each $83.40
Will be supplied with 26 or 32 in. barrel, for factory shipment only.
No. C2017R—**Raised Matted Rib** barrel, 28 and 30 in., full choke bored, w't about 6 lbs.....each $98.15
Will be supplied with 32 in. barrel, for factory shipment only.

MODEL 10T—TARGET GRADE WITH VENTILATED RIB

The VENTILATED RIB and BARREL ARE ALL ONE, in other words, they are both built out of one solid piece of steel, while in most arms of this type the ventilated rib is brazed or soldered on the barrel. The Remington ventilated rib will positively not curl up or buckle, as may be the case with a rib brazed or soldered to the barrel.

Sighting—This gun permits the shooter to obtain a full view of the object aimed at, because the ventilated rib is so constructed that the gun shoots high, thus permitting a full view of the target. A ventilated rib practically eliminates heat waves, which rise above the barrel during continuous shooting and interfere with sighting, especially in warm weather. Oil finish on the stock and fore-end of this gun is more durable than the ordinary finish applied to most guns.
Barrel—12 gauge, 30 in. full choke, option of modified choke or cylinder bore, fitted with **raised matted ventilated rib.** Rear sight optional, but furnished only when specified.
Stock—Imported walnut oil finish, straight grip with option of half or full pistol grip, neatly checkered, full comb, fitted with soft rubber recoil pad of any make desired. Choice of any dimensions within the following limits. Lengths from 13½ in. to 15 in.; drops from 1½ in. to 3¼ in. at heel; drops from 1¼ in. to 1¾ in. at comb. Any other dimensions subject to extra charge.
Fore End—Imported walnut, oil finish, long extension type, neatly checkered and shaped so as to afford a better grip and give better control over swing of the gun on sharp angles. Short fore ends such as are regularly supplied on Model 10C trap gun can be furnished if desired, and bottom ejection.
Frame—6 shot, bottom loading
No. F190—12 gauge, 30 in. Remington, full choke, 6 shot bottom loading, w't about 8¼ lbs.★.....each $249.95

RIOT REPEATING SHOTGUNS

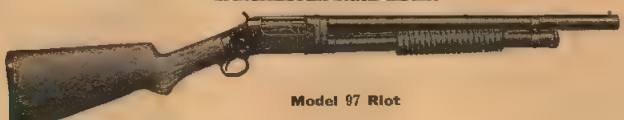
Cylinder bored, to shoot buck shot loads. Buck shot riot shell contains 9 large lead pellets, the weapon is more deadly, for shooting in the dark, from automobiles, against a mob, or where aim is uncertain, than would be a revolver.

MARLIN TAKE-DOWN

Marlin Model 42, 12 Gauge, Hammer

Barrel—Special rolled steel, handsomely matted full length, facilitates quick sighting.
Stock—Black walnut, pistol grip and action slide handle, length 13½ in., drop at comb 2 in., drop at heel 2½ in., hard rubber butt plate.
Chambered to handle both 2¾ and 2¾ in. shells.
No. C42X—12 gauge, 20 in. cylinder bored, visible hammer, w't about 7 lbs., 6 shots.....each $68.90

WINCHESTER TAKE-DOWN



Model 97 Riot

Barrel—Rolled steel, blued.
Stock—Plain walnut, pistol grip, length 13⅞ in. Drop at comb 1¾ in., drop at heel 2⅞ in. Rubber butt plate.
Frame—Blued, 6 shots.
No. C29TDX—12 gauge, plain barrel, 20 in. cylinder bored, chambered to handle both 2¾ and 2⅝ in. shells. W't about 7 lbs.....each $70.65

BUCKSHOT LOAD RECOMMENDED FOR RIOT PURPOSES
Peters "Target" Loaded Shells—12 Gauge
No. C237X—3½ drams smokeless powder, 1¼ oz. shot, size 0 buck, 12 pellets in load, 2¾ in. shell. See Regular page for price.

BROWNING AUTOMATIC SHOTGUNS

Grade No. 1.

These guns are fitted with Cockerill Steel Barrels, of the same grade as used in Mauser rifles. The very high tensile strength of this steel, makes it possible to furnish a considerably lighter barrel, without any sacrifice of strength and thus reduce the weight of the gun. Matted receiver, English Walnut checkered stock and fore end. Half pistol grip stock. Standard dimensions, 14¼ in. long, drop at heel 2¼ in., at comb, 1¾ in. An improved safety device is located in the forward end of trigger guard. Safety can be pushed to "SAFE" position from outside of trigger guard with the finger which eliminates any danger of finger slipping and accidentally pulling the trigger. A magazine cut off permits loaded shell in chamber to be ejected without disturbing shells in magazine. Barrel ring guide is forged in one piece with the barrel, instead of being a separate part. Double extractors insure positive extraction and feed. Side ejection, five shot, take-down, solid breech.

The only Browning Guns we shall be able to supply this year are those indicated below:

No. C712—12 gauge, 30 or 32 in. full choke, 28 in. modified choke, or 26 in. cylinder bored, plain barrel, w't about 7¾ lbs. ..... each $108.45

22 CAL. AUTO-LOADING.

MODEL NO. 16A "STANDARD" GRADE AUTO-LOADING RIFLE, 22 CALIBRE.

Shoots Fifteen 22 Remington Auto-Loading Rim Fire Cartridges Without Reloading.

22 in. Remington steel barrel, straight grip stock of American walnut fitted with steel rifle butt plate, special step rear sight and white metal-bead front sight.

Solid breech

Safety—Safety lock is arranged just in front of the trigger.

Accuracy—This rifle has an extremely accurate barrel and is fully up to the Remington UMC standard for shooting qualities.

Sights—The sights are the same as used on Model 12, .22 calibre repeating rifle, being of simple design and giving a quick and very clean-cut alignment for rapid shooting. The rear sight is adjustable for elevation.

Rapidity of fire—The autoloading action permits great rapidity of extremely accurate fire, which is still further increased by the perfect balance of the arm.

Take-down—For the first time, the screw take-down system, which has proved so successful in the Remington UMC Pump Gun under much heavier strain and greater wear, is here offered in a .22 calibre arm.

Magazine—A simple tube holding fifteen cartridges is arranged within the stock where it is protected from injury incident to rough usage.

BOLT ACTION, EXPRESS, SPORTING RIFLE.

THE NEW MODEL 30 EXPRESS RIFLE.

The new Model 30 Express is chambered for .25, .30, .32, 35 Remington and 30-'06 Springfield.

The construction and design of the Model 30 gives it a superior balance which, together with its marvelous accuracy and smooth working action, makes it an ideal rifle of the bolt action type.

Its weight is about 7¼ pounds; over-all length, 42¾ inches. 22 inch round ordnance-steel barrel, bored, rifled and chambered for extreme accuracy. Selected American walnut oil finished stock in one piece with hand checkered grip and fore-end. Receiver and bolt are nickel steel.

The butt plate is of forged steel with an extension to protect the toe of stock during rough usage. Front sight is gold bead of blade type. It has a buckhorn sporting rear sight with adjustable, reversible leaf with U and V notches and an adjustable slide.

The sights are adjusted for a point blank range of 100 yards. Each rifle is carefully targeted for both alignment and grouping. The receiver is drilled and tapped for a Lyman No. 48-R micrometer windgauge receiver sight. The staggered box type magazine has a capacity of 5 cartridges which can be loaded singly or from a clip. An extra cartridge in the chamber places 6 shots at the disposal of the shooter.

Sailing Down September's Painted Lanes

In a Reo Flying Cloud

REO
FLYING CLOUD

SEDAN VICTORIA
BROUGHAM
SPORT COUPE
ROADSTER

WHEN the tang of the year's turning makes travel more alluring, point the prow of a Flying Cloud toward the lanes where the leaves are flaming. Sail over the paved roads, the hills, and the back roads, in floating comfort. Loiter along at a sight-seeing pace or hasten home when the day is done, and learn what "sailing" on a highway really means.

There's a Flying Cloud near you. Try it out.

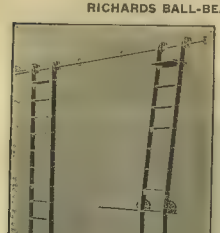
STORE LADDERS

RICHARDS BALL-BEARING



Ladders are made of oak or pine, selected and kiln dried. Steps are let into the sides and held by screws passing through the sides of ladder, made perfectly rigid with steelbraces.

Ladder sides are 3½ inches wide and steps 4 inches wide on ladders up to 14 ft.; over 14 ft., sides are 4 inches wide and steps 5 inches wide.

Steps are 14 ins. long between ladder sides. Track is attached to the uprights of shelving, edge of shelves or to cornice as shown above.

Straight Ladders.

Straight ladders can be set close to shelving when not in use, as the upper fixture has a self-adjusting vertical slide, which also conforms to unevenness in floor. Furnished with ball-bearing fibre or rubber tired wheels for bottom of ladder.

In ordering, observe the following instructions:

1st.—Give exact perpendicular height from floor to top of shelf to which track is to be fastened.

2nd.—Give entire length of each run of track and number of uprights for each run.

3rd.—Give dimensions of uprights, also distance of uprights from center to center.

4th.—State if uprights are straight faced or turned spindle.

5th.—State if fibre or rubber-tired wheels are preferred.

Ladder and Fixtures Complete, Any Length.

	Each
No. 114—Oak; wt per ft 3½ lbs	✤$74 25
No. 114P—Pine; wt per ft 3 lbs	✤ 66 75

Bent Ladders.

Bent ladders have roller-bearing wheels running on half round ledge track.

In ordering, observe the following instructions:

1st.—Give exact distance from floor to ledge.

2nd.—Give exact width of ledge.

3rd—Give exact perpendicular height from ledge to top of shelf to which track is to be fastened.

4th.—Give entire length of each run of track and number of uprights for each run.

5th.—Give dimensions of uprights, also distance of upright from center to center.

6th.—State if uprights are straight faced or turned spindle.

	Each
No. 114B—Oak; wt per ft 3½ lbs	✤$81 75

HARDWARE STORE FIXTURES

WARREN STANDARD COMBINATIONS

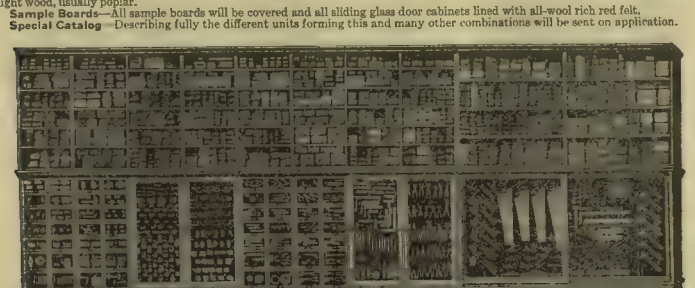
Made on the sectional interchangeable unit system. Cabinet units have exactly the same outside dimensions and the base units correspond to the cabinet units in length. When set up and fastened together they come into perfect alignment and are absolutely solid.

All cabinets are 8 feet 4⅜ inches long, 4 feet 6 inches high, 1 foot 3⅜ inches deep. All bases are 8 feet 4⅜ inches long, 2 feet 7½ inches high, 2 feet 6 inches deep.

Material—The outside exposure is made of selected white oak, antique finish, hand rubbed dull, interior construction of soft, light wood, usually poplar.

Sample Boards—All sample boards will be covered and all sliding glass door cabinets lined with all-wool rich red felt.

Special Catalog—Describing fully the different units forming this and many other combinations will be sent on application.



Cabinet No. 4450—Constructed with paneled center supports, 24 inches apart with twenty removable and adjustable shelves designed for hardware in original packages.
Each ..... ✦$191 40

Cabinet No. 3600—Contains two glass swing panels, twenty 7x12 inch and eight 8x12 inch glass front drawers. All drawers and swing panels have removable sample boards covered with rich colored felt; removable partition in each drawer and six adjustable shelves back of each swing panel.
Each ..... ✦$470 40

Sub-Cabinet No. 4614—Forty-eight 2⅝x4 in. dove-tailed dust-proof drawers with three removable partitions in each, forming 192 compartments.
Each ..... ✦$148 95

Base No. 5325—Sixteen 8x12 in. drawers with two removable partitions, side to side, forming three compartments; eight 8x12 in. drawers with one removable partition, front to back, forming two compartments. Drawers are 26¾ in. deep and grooved for five partitions, side to side, and one partition front to back.
Each ..... ✦$346 05

Cabinet No. 4450—Constructed with paneled center supports, 24 ins. apart with 20 removable and adjustable shelves designed for original package goods.
Each ..... ✦$191 40

Cabinet No. 3302—Contains two glass swing panels, twenty 6x12 and eight 8x12 inch glass front drawers. Drawers and swing panels have removable sample boards covered with felt; one removable partition in each drawer and six adjustable shelves back of each swing panel.
Each ..... ✦$470 25

Sub-Cabinet No. 4612—Thirty-two 2⅝x6 in. oak front, dove-tailed dust-proof drawers with 3 removable partitions in each, forming 128 compartments.
Each ..... ✦$130 20

Base No. 5361—Contains four insets, each containing one 3x22¾ and four 8x5⅝ inch oak front drawers, eight 8x12 inch drawers with two removal partitions, side to side, forming three compartments; four 8x24 inch drawers with removable partition forming nine open compartments.
Each ..... ✦$421 65

Cabinet No. 4200—Contains six adjustable shelves, forming 8 open spaces for original package goods.
Each ..... ✦$152 70

Cabinet No. 3064—Two sliding glass doors, fitted with ball-bearing sheaves; interior lined with felt and fitted with removable tool racks, brackets, display stands and universal saw rack for displaying 42 hammers, 42 hatchets, 28 hand, up or butcher saws, 6 braces, 6 draw knives, 56 steel squares and a general assortment of planes and levels.
Each ..... ✦ $353 55

Sub-Cabinet No. 4610—Contains eight 6x6 inch oak front dove-tailed, dust-proof drawers with removable partitions, forming 40 compartments.
Each ..... ✦ $89 55

Base No. 5313—Contains one 8x36 inch drawer with saw rack; one 8x36 in. with sliding tray, two 8x36 inch, without partitions, two 8x24 inch with partitions forming nine compartments each, and eight 8x12 inch oak front drawers with removable partitions.
Each ..... ✦$323 10

Combination No. 6272—Complete as above. Arranged for the right hand side of store as you enter the front, is 25 ft. 6 ins. long (including the return crown on both ends), 12 ft. 3½ ins. high and is composed of six cabinets, three sub-cabinets and three base units. Each ..... ✦$3289 05

Packed complete; approx wt 4180 lbs.

Engraved by THE MODERN ENGRAVING COMPANY, CINCINNATI, O.

ELECTRIC FANS

ROBBINS & MEYERS

Drawn Steel Frame—Base, Motor Frame and End Heads are drawn from Heavy Gauge Sheet Steel.

Rotor—Built up of Steel Laminations Conductors Solidly Riveted and Soldered to End Rings Rotor Shaft is of High Carbon Steel with all Bearing Surfaces Ground Accurately to Gauge.

Stator—Steel Lamination Securely Riveted together Winding is Thoroughly Insulated from the Core. Completed Core Securely Attached to Frame by Screws through End Heads.

Armature—Core is built up of Steel Laminations, Mounted Securely on High Carbon Steel Shaft, Winding well Insulated from Core, Best Grade Copper Commutator, Deep Segments, Mica Insulated.

Bearings and Oilers—Bearings are Large and Substantial, Phosphor Bronze Bushed, Lubricated by an Oil Cup at Each End of the Motor

Adjustable Oscillating Mechanism—Positive in Action, Extremely Simple and Durable and Produces a Slow, Steady Oscillation There is a Provision for Convenient and Positive Adjustment Gradually by a Fraction of a Degree for Air Direction from Full Sweep to Stationary, or Vice versa All Gears and Pinions are Accurately Machined and Adjusted and Gear Box Packed with a Season's Supply of Non Fluid Grease is Grease Tight.

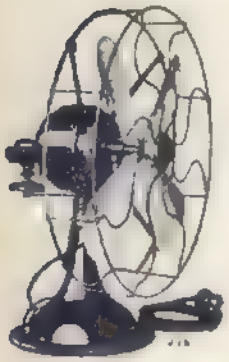
Blades—Firmly Constructed, Accurately Balanced, Designed for very Efficient and Effective Air Delivery. Their Shape and Pitch being Carefully Determined to give Maximum Breeze with Lowest Wattage and Least Noise.

Guards—Heavy Steel, Strong and Rigid and Securely Anchored to the Motor.

Base—So Constructed as to make it Practically Impossible to Accidently Overturn the Fan The Felt Protection Permits Fans to be placed on Highly Polished Surfaces without Danger to the Finish.

For 110 Volts, with a Range from 10 Per Cent Lower to 10 Per Cent Higher

MODEL 38—OSCILLATING



Four Blades, Three Speeds, Drawn Steel Frame

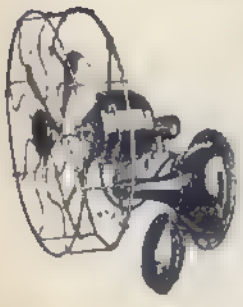
Four Point, Three Speed Switch, Felt Covered Base, Hinge Joint for Vertical Adjustment and Wall Mounting, Highly Finished in Baked Black Enamel Relieved with Gilt Lines on Motor and Base, Solid Brass Blades, Lacquered.

Induction Type Motor, 7 Complete Oscillations per minute, Full Sweep 95 Degrees.

No. 3854-C 16 in., A. C. 60 Cycles, 3 Speeds, 1350 R. P. M. at 82 Watts, 1150 R. P. M. at 51 Watts and 1000 R. P. M. at 65 Watts, Complete with 8 ft. Cord and Standard Attachment Plug, Weight Each Packed 44 Lbs. $35 00

One in a Box.

MODEL 45—OSCILLATING



Four Blades, Three Speeds, Drawn Steel Frame

Four Point, Three Speed Switch, Felt Covered Base, Hinge Joint for Vertical Adjustment and Wall Mounting, Highly Finished in Baked Black Enamel Relieved with Gilt Lines on Motor and Base, Solid Brass Blades, Lacquered.

Induction Type Motor, Seven Complete Oscillations per Minute, Full Sweep 90 Degrees.

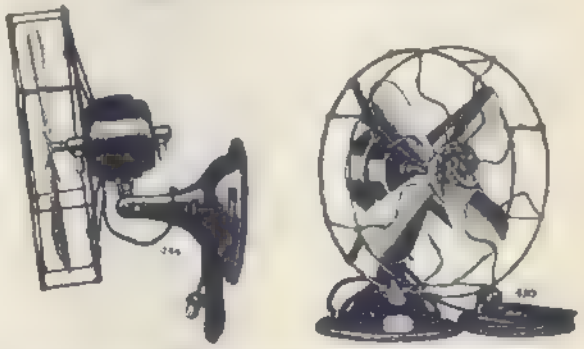
Each

No. 4504 -12 in., A. C. 60 Cycles, 3 Speeds, 1450 R. P. M. at 44 Watts, 1300 R. P. M. at 36 Watts and 1050 R. P. M. at 31 Watts, Complete with 8 ft. Cord and Standard Attachment Plug, Weight Each Packed 20 Lbs. $30.00

Embodies the latest improved construction of motor and base, being better in appearance lighter in weight cool running and very efficient.

One in a Box.

MODEL 47—NON-OSCILLATING



Four Blades, Three Speeds, Drawn Steel Frame

Four Point, Three Speed Switch Felt Covered Base, Swivel Hinge Joint Provides for Wall-Bracket Mounting and Convenient Vertical or Horizontal Adjustment, Highly Finished in Baked Black Enamel Relieved with Gilt Lines on Motor and Base, Brass Blades, Lacquered Induction Type Motor.

Each

No. 4704—12 in., A. C., 60 Cycle, 3 Speeds, 1450 R. P. M. at 43 Watts, 1300 R. P. M. at 35 Watts and 1050 R. P. M. at 31 Watts, Complete with 8 ft. Cord and Standard Attachment Plug, Weight Each Packed 20 Lbs. $28.50

One in a Box.

MODEL 46—OSCILLATING

Four Blades, Three Speeds, Drawn Steel Frame

Four Point, Three Speed Switch, Felt Covered Base, Hinge Joint for Vertical Adjustment and Wall Mounting, Finished in Baked Black Enamel with Gilt Lines on Motor and Base, Steel Blades, Black Satin Finish

Induction Type A. C. Motor

Has a Single Oscillating Sweep making Five Complete Oscillations per Minute over 75 Degrees.

Each

No. 4602—10 in., A. C., 60 Cycles, Three Speeds, 1500 R. P. M. at 33 Watts, 1400 R. P. M. at 26 Watts, 1250 R. P. M. at 23 Watts, Complete with 8 ft. Cord and Standard Attachment Plug Weight Each Packed About 17 Lbs. $16.50

One in a Box.

ELECTRIC FANS

ROBBINS & MEYERS

For 110 to 120 Volts

MODEL 43—NON-OSCILLATING

Wall Bracket Position.

Desk Position.

Four Blades, Three Speeds, Drawn Steel Frame

Four Point, Three Speed Switch, Felt Covered Base, Hinge Joint for Vertical Adjustment and Wall Bracket Position, Highly Finished in Baked Black Enamel with Gilt Striping Around the Base and Motor. Polished Solid Brass Blades, Lacquered.

Induction Type A. C. Motor.

Each

No. 4312—10 in., A. C., 60 Cycles, Three Speeds. 1560 R. P. M. at 27 Watts, 1300 R. P. M. at 21 Watts, 1100 R. P. M. at 18 Watts, Complete with 8 ft. Cord and Standard Attachment Plug. Weight Each Packed About 15 Lbs. **$15 00**

One in a Box.

MODEL 41—NON-OSCILLATING

Four Blades, One Speed, Drawn Steel Frame

Felt Covered Base, Hinge Joint Permits Tilting Backward or Forward. Finished in Baked Black Enamel. Steel Blades, Black Satin Finish.

Induction Type A. C. Motor.

Each

No. 4100-S—8 in., A. C., 60 Cycles, 1550 R. P. M. at 30 Watts. Complete with 8 ft. Cord and Standard Attachment Plug. Weight Each Packed About 10 Lbs. **$7 50**

This is a good, durable, well constructed long life fan that is attractive in appearance, and gives a very effective breeze with practically no noise and at a low wattage consumption.

One in a Box. Ten in a Case.

ELECTRIC HEATERS

"UNIVERSAL" STANDARD

Dark Bronze Enamel Finish, Heavy Metal Base, Water Leaf Design

Each

No. E-9953—625 Watts, 12 in. Plain Solid Copper Reflector, Highly Polished, 16 in High Over All, Complete with 8 ft. Olive Green Mercerized Cord and Standard Attachment Plug. Weight Each Packed About 8 Lbs. **$7 50**

One in a Carton. Three in a Package

ELECTRIC HEATERS

"UNIVERSAL" SUPER-FOURTEEN

Dark Bronze Enamel Finish, Heavy Metal Base, Water Leaf Design

Each

No. E-9954—625 Watts. 14 in. Plain Solid Copper Reflector, Highly Polished. Height Over All 16 in., Complete with 8 ft. Olive Green Mercerized Cord and Standard Attachment Plug. Weight Each 8 Lbs. **$8.50**

One in a Carton, Three in a Package.

"UNIVERSAL" SUNFLOWER

"The Heater Beautiful," Florentine Bronze Finish Heavy Metal Base, Water Leaf Design

Each

No. E-9955—625 Watts. 13 in. Solid Copper Fluted Reflector, Highly Polished, 16 in. High Over All, Complete with 8 ft. Olive Green Mercerized Heater Cord and Standard Attachment Plug, Weight Each Packed 8 Lbs. **$8.00**

One in a Carton, Three in a Package.

These "Universal" Electric Heaters bring clean, safe and cheery heat to small chilly places and are so very attractive that they form an ornament to any room.

Each model has a long life heating unit with Edison screw base which can be replaced in a moment. Detachable wire guards on all models, easily removable. Reflector is adjustable to any angle and has convenient cool handle on the back

HOME MOTORS

HAMILTON-BEACH

Operates on Both A. C. or D. C., 105 to 115 Volts 25 to 60 Cycles

Each

Home Motor—Complete with Cord, Attachment Plug Speed Control Pedal and Can of Oil, Weight Each Packed 8¾ Lbs. **$18.50**

This amazingly simple motor makes any old or new sewing machine a self-operating electric machine. It is merely placed next to the hand wheel—that's all; no tools or screws or clamps or belts. The Machine is unmarred. Wearisome and health endangering pedal drudgery is abolished forever

The machine always starts the right way automatically, never breaks a thread. Sews fast or slow or speeds between. Controlled by a slight pressure on the Speed Control Pedal

Uses less than a cents worth of current an hour.

One in a Box.

Gas, they buy every week . . .
Oil, they need twice a month—
But a horn they buy only once!

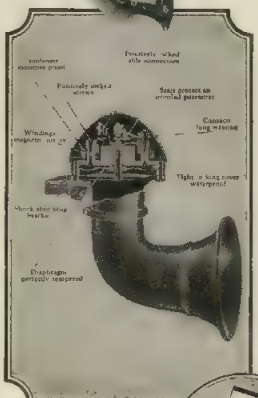
YOU could *afford* to be satisfied with a small profit per gallon on items like gas and oil. For every customer is buying such necessities all the time. The "repeat" business is steady. The turnover is rapid.

But when you sell horns, it's a different proposition. You never sell the same customer a new horn every week or every month. "Repeats" don't figure in horn sales. Therefore it's good business to push the horn you make the most money on, per sale.

Now on a cheap horn, your profit is only $2.50 or $3.00. While on the best horn you can sell him—the Original-Bosch horn—you earn triple profits—about $10. or more (depending on quantities).

In spite of low-priced, low-quality imitators, sales of this Original-Bosch horn are steadily increasing. Dealers, disgusted with complaints and come-backs of cheap horns, have rallied to Original-Bosch.

Because they know that this horn will not get out of order, need attention or fail the driver in an emergency. They find their customers perfectly willing to pay the extra price, when they learn that the Original-Bosch horn will actually outlast the life of the car itself! And dealers feel it is good business to earn the triple profits which the Original-Bosch horn alone makes possible.



Write for triple profits plan

If you want to earn triple profits, identify your store with the best, and render a real service to your customers, write today for full information about the Original-Bosch horn plan which offers a larger discount to dealers and enables you to carry this horn without loading yourself up. We will also send you our new folder "A horn that increases the speed of your car" containing a striking new sales measure that makes it easier to sell Original-Bosch horns.

The Original Bosch

ROBERT BOSCH MAGNETO CO., Inc.

No connection with any other company or firm bearing the name "Bosch"

The full name Robert Bosch and the trademark appear on all Original-Bosch products—your guaranty of Original-Bosch quality as known the world over since 1881.

Robert Bosch Magneto Co., Inc.
3801B Queens Boulevard
Long Island City, New York.

Please send copy of new folder "A horn that increases the speed of your car," and complete information explaining how I can make triple profits from the sale of Original-Bosch horns.

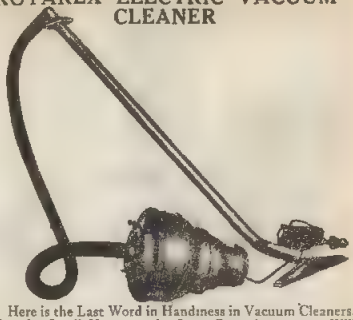
ROTAREX ELECTRIC VACUUM CLEANER



Here is the Last Word in Handiness in Vacuum Cleaners. For the Small Home or the Snug Cozy Apartment, Will Clean Every Part of the House and Can be Stored in a Very Small Space.

Constructed Almost Wholly of Aluminum the Rotarex is Light and Durable. No Switches, Wheels or Other Moving Parts. Embodiment of the Simplest Idea Conceivable. It is the Biggest 7½ Lbs. of Convenience, Handiness and Service Imaginable.

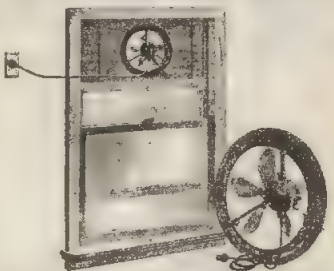
The Rotarex has a Powerful Suction and the Motor, the Heart of the Cleaner is as Powerful and as Well Made as in Any Higher Priced Machine. Oil-less Bearings Make Oiling Unnecessary.

The Rotarex is Made of the Fewest Parts of Any Vacuum Cleaner Made. It is Easily Emptied, Takes Up Very Little Room, is Conveniently Moved About, and is Fully Guaranteed.

List Each

No. 2450—(Complete) $25.50
Four, Individually Boxed in a Carton, Weight 52 Lbs.

ROTAREX HOME VENTILATION FAN



The Fan Embodies the Same Correct Principles as the Aeroplane Propeller. The Motor is Fully Enclosed, Dust Proof and Self-Cooling Lubrication is so Effectually Handled as to Require Attention Only at Very Infrequent Intervals. It is Quiet in Operation and Economical in the Consumption of Current

Solid One-Piece Aluminum Casting. Light but Strong and Accurately Balanced. Woven Fabric Supports which Absorb Vibration. Cast Aluminum Frame.

TABLE LAMPS IN PLEASING COLORS

Boudoir Lamp. Russetone, cast white metal base, push button socket, two piece plug, height 15 inches, shade 8 inches
H6632. Each..... **$9.96**

Library lamp is 25 inches high and fitted with an 18 inch round glass shade decorated in the original colors of oak leaves in Autumn when they turn from green to brown. The background is of a warm glow of ruby. This shade is mounted on an artistic standard of urn effect finished in antique gold harmonizing beautifully with the design of the shade; furnished with 3 pull chain sockets and 6 feet of silk cord
H6633. Each..... **$70.00**

End Table or Boudoir Lamp. 18¾ inches high with shade to match, 12 x 8½ inches oval. Furnished with 6 feet of electric cord plug and socket, one light. The stand of this lamp is a conventional design, manufactured in casting metal, and finished in venetian antique bronze. The shade is of oval glass, and is manufactured of what is known as Pompeian Glass, being of a rich bronze color, beautifully mottled in construction. The lamp as a whole, is a very artistic and classic item
H6634. Each..... **$25.00**

Early Fall, the old trees are turning Brown. The Summer sun has burned the landscape, turning it to Tan and Brown tones. A sunset sky is cast in Red and Yellow. A Bronze finish base is recommended. 21 inches high, 16 inch shade
H6635. Complete..... **$48.00**

An old Chinese Bridge of natural stone with the Oriental house of Red and Yellow. Trees and shrubbery of Tan, Yellow and Green. The rocky river banks are reflected in the Blue waters. Purple hills and delicate Blue sky complete a CLASSIQUE Masterpiece on a Bronze finished base of Chinese character. 18 in Shade, 24 inches high
H6636. Complete..... **$70.00**

Landscape taken from Scott's "Lady of the Lake" showing mountains in vivid Purple. A golden Yellow and Blue sky reflects in Loch-Katrine, the beautiful lake. The shaggy heathery foreground is of Brown heath and Purple heather. This beautiful scene is painted after the style of Carot, and is suggested on a Verde Antique base. 18 inch shade, 24 inches high.
H6637. Complete..... **$75.00**

Bases are equipped with two pull chain sockets, parallel silk cord and two-piece attachment plug.

KEY CUTTING MACHINES

RUSSWIN

Cuts duplicates of all makes of pin tumbler cylinder, flat, double bit, solid and hollow ground keys by changing the cutter and gauge accordingly.

Equipped with two types of cutters, one milling cutter (F) and gauge for cutting pin tumbler keys and two cutting saws and gauges for all other types of keys.

Hinged vice (A,A) holds both original key and blank to be duplicated in rigid and correct position; a shelf on the vice supports the bow on cylinder key. On each vice there is a hinged stop which screws both as a top shoulder stop (B1) and a setting stop (B2); the shoulder is indispensible when cutting cylinder keys, all cutting from original cylinder key should be started from the top shoulder. Stop (B1) insures accurate reproduction of the original key; the setting stop (B2) gives the correct distance from the cutter to the gauge (C) by resting the shoulder of one stop (B2) against the cutter and the shoulder of the other stop (B2) against the gauge (C).

Two gauges (CC) one for cylinder and one for other types of keys are furnished with machine. After original key and blank to be cut are placed in position, raise lever (D) turning handle (E) until cutter engages and cuts into blank to be duplicated. Equipped with .035 and .062 inch saws.

Operates by hand or motor.

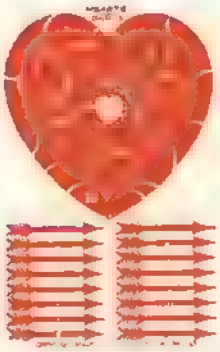
Doz **$5.50**

Peter Pan

THIS delightful game retains the charm and spirit of Barrie's dearly loved book. Two, three or four children play, taking the parts of the principal characters of the book, Peter Pan, Wendy, John or Richard. They take a trip to Never-Never-Land where Captain Hook and his fierce pirates dwell. Tinker Bell, the fairy, is caged in an ingenious box and tells each player in turn where to go by the tinkle of a bell. This is one of the most unique devices ever provided for any game. The child most favored by Tinker Bell gets back to the nursery first and wins the game. Peter Pan promises to be one of the big sellers of the coming year. *No. 16; retails for $1.00.*



Hearts and Darts

A delightful fortune-telling party game. Players, blindfolded, attempt to pin darts at center of a large red heart. Each player gets his fortune told according to the place where he pins his dart. *No. 12; retails for 25c.*

Donkey Party

No children's party is ever complete without this game where players, blindfolded, pin the tail on the donkey. Printed in realistic colors on sheet 18½ x 30", 24 tails provided. *Paper edition (No. 10) retails at 10c, cloth edition (No. 11) 25c.*

Home Team Baseball

EVERY known play that can be made in the national game is duplicated here. The ball is hit, the fielder makes the play, bases can be stolen, errors scored. The game supplies an umpire who settles all arguments, and the rules of organized baseball apply. From 2 to 18 people can play. Every boy and every baseball fan finds this a fascinating game. HOME TEAM BASEBALL was one of the big successes of 1926 and will be even more popular this year. *No. 3; retails for 50c.*

"Games that are Different"

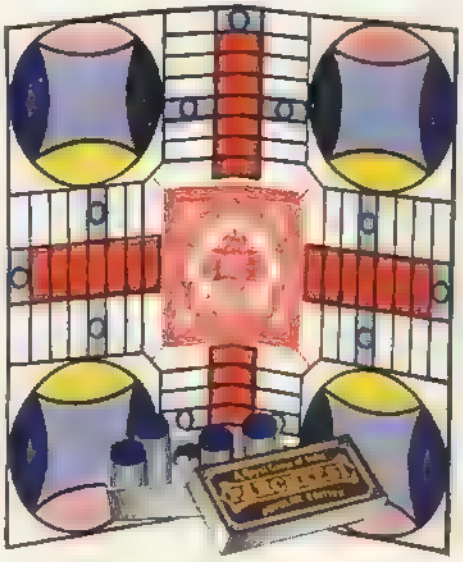
THE PARCHEESI FAMILY

The games illustrated and described in this folder represent the ripened experience of 60 years in the creation and sale of games that appeal to the American family. The name "Selchow & Righter" on a game, whether old or new, is your guarantee that it is original in conception, perfect in detail, and outstanding in value and enduring quality.

Selchow & Righter Co., 200 Fifth Ave., New York, N. Y.

Parcheesi

AMERICA'S favorite game which has enjoyed ever-increasing sales for half a century, and just now is enjoying a tremendous vogue in smart society. Made exclusively by Selchow & Righter. A big steady seller at all seasons, and just as popular with adults as with little folks. "Everybody loves to play Parcheesi." *Standard Edition (No. 1) retails for $1.00; DeLuxe Edition (No. 2) $2.00.*



Sumrun

THIS is the game (based on the British Minoru) that Europe went crazy about and preferred to bridge or roulette at many fashionable gatherings. Five horses run a race; one player acts as "bookmaker," and deals cards to move the horses from start to finish of the course. Any number of people can take part by placing wagers on any horse, from the favorite at 2 to 1 to the long shot at 10 to 1. A wonderful game to play for prizes, and equal fun for children and grown-ups. Sumrun will be one of the big game hits of 1927. *No. 18, with playing cards, retails for $2.50 No. 17, without playing cards, retails for $2.00*

Harper Introduces

The PLAYBOOK OF TROY

Every Book Its Own Theatre, With A Stage And All The Characters And Properties

THE Playbook of Troy has been a substantial success in every large toy department that has shown it because it is more than a mere book—it is a Playbook! The story depicts the immortal tale of Troy. Beautifully colored cut-out figures and a stage ingeniously formed by lifting off the back of the book and opening out the ends, reveal the scene of Troy with the sea, the boats and soldiers, the walls and the topless towers. For the first time in a juvenile book, the child can actually see and PLAY with what he reads about. Due to the novel cut-outs and stage, the Playbook displays wonderfully in small space, attracts instant attention and sells without demonstration. Retails for $2.00. You'll agree Harper has brought out the most appealing idea in the Juvenile Book and Game section in many seasons when you see it.

WOOD COASTER WAGONS
KIDDIE-KART SPECIAL

Roller Bearing

Body is made of selected kiln-dried Vermont hardwood. Pressed steel gear throughout. Tubular axles with short bearing shaft of special analysis steel. The Disco steel wheels are double disc steel electrically welded with accurately made smooth running roller bearings, lubricated and sealed at the factory. The rubber tires are oversize and of high quality. Slotted nut adjustment on king bolt in steering gear prevents wobbling. Lock washers under every nut to prevent nuts from rattling off. Wood parts are finished with three coats of natural varnish with red trimming. Metal parts are baked black enamel, wheels are red enameled.

No. 204 and 205 have an embossed strap handle; No. 201, 202 and 208 have a cross pin serving as handle.

No.	Size of Body Inches	Diameter of Wheels Inches	Size of Tires Inches	Weight Each Pounds	Each
201	20x 8½x2⅝	4⅝	⅛	6½	$3.00
202	24x10½x2⅞	5½	⅞	9½	4.00

204	30x12 x2⅞	7¼	⅞	14⅝	6.00
205	32x13 x3¼	8½	⅞	20½	7.00

Two in a Shipping Carton

KIDDIE-KOASTER

Roller Bearing

Body is made of carefully selected kiln dried ash and maple, highly finished. Disco steel wheels consist of double disc steel electrically welded with self-contained dust proof roller bearings and are equipped with large rubber tires. Automobile type hexagon hub caps threaded to screw on like automobile hub caps. Adjustable automobile type hub brake. All metal gearing, steel channel bolsters. Chrome manganese steel axle. Castellated nut for accurate adjustment in steering gear. Heat treated king bolt. Steel handle loop and handle braces. The finish is baked spar varnish on woodwork, baked enamel in all metal work. Body is finished in the natural wood with red trimmings, wheels are red enameled, gearing is finished in black enamel.

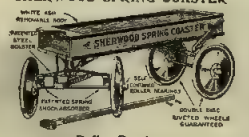
WOOD COASTER WAGONS
SHERWOOD SPRING COASTER



WHITE ASH REMOVABLE BODY
SHERWOOD SPRING COASTER
SELF CONTAINED BALLED BEARINGS
PATENTED SPRING SHOCK ABSORBERS
DOUBLE DISC RIVETED WHEELS GUARANTEED

Roller Bearing

Carefully selected white ash body with removable sides and ends. Equipped with double disc riveted steel wheels with solid rubber tires. Friction-proof self-contained steel roller bearings. Nickel plated hub caps. Steel bolster construction. Steel spring shock absorbers are attached to the bolsters and enveloped in solid steel casings. These casings are made of such a height that under heavy pressure they transfer the weight directly to the axle and to the transverse spring, thus ensuring ease of riding. The brake is always held in place by a concealed spring back of the bolt. Body is finished in the natural varnish with red trimmings, bolsters are black enameled; wheels are red enameled.

No.	Size of Body Inches	Diameter of Wheels Inches	Size of Tires Inches	Weight Each Pounds	Each

Each	$1.10	1.25

JANESVILLE COASTER

Ball Bearing

Selected white ash body and bolsters, equipped with ball bearing steel disc wheels with nickel plated dust caps. Side and end panels are removable. Wheels are made with two full discs and mounted with a substantial steel convex rim. Ball bearings are of the regular automobile cup and cone type with ¼ inch balls, the cups, cones and balls being assembled as a unit with the wheels, which can be removed without the balls or bearings coming out. Cups and cones are especially heat treated and case hardened. Axles are of ½ inch rolled steel. Front and back bolsters strongly braced with ⅝x⅞ inch steel braces. The bound brace re-enforces the tongue. It never can work loose from the bolster, because the king bolt fits through it. The same is true of the bolster brace, running from the front bolster to the center of the wagon. Body panels and bolsters finished in the natural wood with red mouldings; braces are black enameled and the wheels are red enameled. With brake.

No.	Size of Body Inches	Diameter of Wheels Inches	Size of Tires Inches	Weight Each Pounds	Each

ELECTRIC FANS.
"SIGNAL"—JUNIOR.

NON-OSCILLATING.

Distinctive beauty and well balanced lines attract buyers The Signal Jr. does more than "register present" it stands out in any display, even with fans much higher in price. Try it and see. You will note how eagerly your customer wants to see it work. Let the purchaser touch it off to show how lightly and quickly it snaps into action.

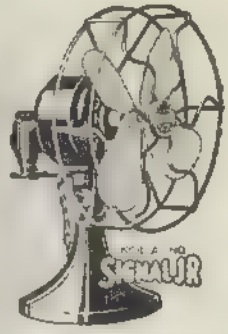
The smart curve of the special Signal Junior Blades turns a volume of air equal to fans much larger in size and higher in price and this without the usual nerve-racking whir of the ordinary fan This smooth silent action invariably determines the sale.

Every Signal Jr on your counter carries its own make-good selling message. The unusual quality built into the Signal Junior makes this two year guarantee possible. It is your assurance of satisfaction to your customers. It backs up your sales talk. The bearings are of Phosphor Bronze and the shafts are of the finest tool steel. Equipped with self lubricating oil wicks, three point toggle switch, new resistance unit which absolutely will not heat up and an improved oscillating mechanism. It is certainly fool proof. Operates on either A. C. or D. C. current

Net Each

NO. 809—Diameter, 8 inch, 4 Blades, Finished In Green Lacquer, Universal Motor.....List price $7.50 $11.24

ELECTRIC FANS.



The wonderful new Signal 9-inch Oscillating Fan finished in new standard Green Duco with two speed control switch in the base, toggle type, provides something different in the line of fan appearance as well as performance.

Built for the most extreme rough service, this fan will stand all the abuse that will ever be given it, and more, and still continue to give the same quiet smooth running performance as it did the first day it was put into service.

It is by no means an experiment but is a tested, tried and proven product of unequaled merit at its price, and combines the finest of materials and represents beauty unexcelled.

Net each

NO. 901—9-in. 4 blade oscillating, 110 volt A. C. Can be used as a stationery fan if desired, and can be instantly changed from one to the other by the turn of a convenient thumb screw.....List price $12 00 $18.00

WINDOW VENTILATOR.

The Signal Window Ventilator adjusts from 24 to 37 inches in width. Just lower the window from the top, set the Signal Ventilator in, adjust flush with window frame, raise the window flush against the Signal Ventilator, screw in the plug and it is ready for service

Serves to remove the hot air from the Kitchen, and through the suction from some other open window in the room will keep the room well filled with fresh air, and with a coolness that is refreshing

Every housewife is looking for just such an article, and from the large sale that this appliance enjoyed during its first year on the market, many of the housewives found just what they were wanting

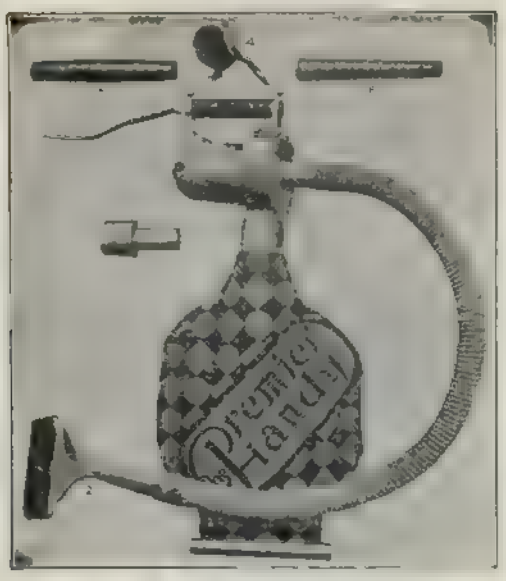
Nothing to get out of order, equipped with the sturdiest Electric Fan and motor that has ever been designed, constructed to last a lifetime, and always on the job.

Net each

NO. 902—9-in blades, 15 feet of cord, with feed through switch, 110-volt, A. C. .....List $16 00 $24.00

Federal Ortho-Sonic Receivers provide simplified control with the maximum of efficiency.

PORTABLE VACUUM CLEANERS



PREMIER HANDY

Ball-Bearing

ELECTRIC VACUUM CLEANER AND BLOWER.

For cleaning automobile upholstery—and for general use. A practical and essential accessory for the auto owner. Used either for suction or blowing. A new and different vacuum cleaner with a ball-bearing motor that does not have to be oiled. Stronger suction—better cleaning—longer life and less trouble.

Powerful Suction—Ball-Bearing Motor—Light Weight—Easy to Handle —Written Guarantee—Low Price

Motor. Air-cooled motor for General Electric type, thoroughly tested and guaranteed. Motor housing is of purest grade aluminum expertly fabricated. Handle at top is of black fibre securely fastened to projection from motor housing. Motor runs on precision ball bearings packed with lubricant which eliminate the necessity of oiling After several years of use the bearings can be re-packed if necessary

Sleeve Type Bag Connection. The twill bag is connected to the cleaner outlet by a sleeve bag connection with bayonet lock.

Slide-on Bag Clamp. This is a clamp which simply slides on to the end and is easily and quickly removed for cleaning

Cord. There is 20 feet of flexible cord which allows a large cleaning radius from one base receptacle.

The Premier Handy Equipment.

No. 1. Two and one-half foot hose sufficiently flexible to allow free use of the tools but not so flexible as to make careful guiding impossible.

No. 2. This is a carefully constructed, scientifically designed, tufted bristle brush tool. The brush section is removable so the tool may be used with or without the brush. This tool engages into hose No. 1 and may be used for cleaning articles of clothing and all materials of fabric construction.

No. 3. Blower coupling. When bag is removed this tool engages in the outlet of the cleaner. Hose No. 1 is forced over blower coupling and the outlet when so equipped is very effective in blowing the dust out of screens or out of corners, inaccessible to the Premier Handy when being used for suction purposes. Or, it may substitute for a fan in summer.

No. 4. Strap. Fitted with buckles by which the cleaner may be supported from shoulder.

No. 5. Short fibre section. Insert either end in hose No. 1.

No. 6. Soft nose tool. Attach to tool No. 5 and use for blowing dirt or dust out of corners, out of telephone exchange equipment, motors and dynamos, radiators, pianos, for drying hair, renovating pillows or mattresses. Also use for suction where larger tools cannot be used such as around the buttons and in the crevices of automobile upholstery.

Over 1000 Uses.

The Premier Handy is the only machine that accomplishes all cleaning tasks with an absolute minimum of effort It cleans where other cleaners can't Its uses are innumerable in the home, in the automobile, in the office, factory and store.

The Premier Handy is the product of one of the greatest exclusive cleaner factories in the world and is covered by an iron clad guarantee

DELLA ROBBIA PATTERN

Platinum Finish
Sterling Silver Flatware
925/1000 Fine

In this new pattern you will find the characteristic richness of ornament and form, balanced by fine perceptions of dignity and taste, which Luca Della Robbia, the 15th century Florentine master, contributed to the Renaissance.

ROCHAMBEAU
Platinum Finish

LADY WELLESLEY
Platinum Finish

Two Classically Beautiful Patterns in

Solid Sterling Silver

ROCHAMBEAU

The Count de Rochambeau commanded the military and naval expedition sent to our aid, in the dark days of the American Revolution, by King Louis XVI of France.

Rochambeau was a veteran of many successful campaigns in the service of his king, and after his return from America was made Marshal of France. His personal character and qualities commanded the highest respect and endeared him alike to General Washington and to the American people.

This Rochambeau pattern has the beauty and pronounced dignity of the Louis XVI style from which it is derived, and thus the prestige and permanent worth of this classic French art.

LADY WELLESLEY

Lady Wellesley was a notable figure in American and European society in the early years of the nineteenth century. As Mary Caton she was one of three sisters, daughters of a distinguished Maryland family, whose beauty was such that they were famed in the royal courts of Europe as the "American Graces."

Her husband, the Marquis of Wellesley, was a brother to the Duke of Wellington, and it is an interesting coincidence that one of her closest friends, Elizabeth Patterson of Baltimore, married Jerome Bonaparte, youngest brother of Napoleon, so that the two friends became sisters-in-law to the greatest military figures of their age,—victor and vanquished of Waterloo.

MARTHA WASHINGTON
Bright Finish

QUEEN LOUISE
Platinum Finish

Two Delicately Enriched Colonial Patterns in

Solid Sterling Silver

MARTHA WASHINGTON

The meeting of Washington, then a colonel of Colonial troops, with Martha Custis, his future wife, is of particularly romantic interest.

While crossing the Pamunkey River, in May, 1758, in the pursuit of military duties, Colonel Washington was observed from the gardens of the Chamberlayne mansion by a bevy of young ladies, of which Miss Custis was one, and, being invited by Mr. Chamberlayne, stopped there and partook of his hospitality. Thus were brought together the later "first lady and gentleman of the land."

Martha Washington represents to all Americans the ideal of Virginia womanhood, and this sterling silver table ware is a worthy tribute to her qualities, and reflection of her Colonial environment.

QUEEN LOUISE

Auguste Wilhelmine Luise, Queen of Prussia, was the daughter of Prince Charles of Mecklenburg-Strelitz, and was born in Hanover, March 10, 1776.

In 1793 she met at Frankfort the crown prince of Prussia, afterward King William III, who was so affected by her beauty and the nobility of her character, that he asked her to become his wife and they were married on the 24th of December of that year.

As Queen of Prussia, Louise commanded universal respect and affection, and her dignity and unflinching courage under the adversities of Prussia's struggle against Napoleon, are historic.

INSTRUCTIONS FOR ORDERING CIRCULAR SAWS

The following information must be given—

1—Rip or Cross Cut.
2—Right or left Hand.
3—Diameter.
4—Thickness or Gauge at Rim and at Center.
5—Number of Teeth.
6—Kind of Teeth.
7—Size of Mandrel Hole.
8—Size of Pin Holes.
9—Distance between Holes from Center to Center.
10—Number of Revolutions Per Minute.
11—Greatest Feed at each Revolution, in inches.
12—Kind of Lumber to be Sawed.
13—Spring Set or Swaged.

Extra Charges For Special Saws.

All saws under 6 inches in diameter take list of 6 inch saws.

All saws filed and set ready for use.

All saws of odd diameter take list of next larger size.

No extra charge for saws one gauge thicker than list.

No extra charge for saws one to three gauges thiner than list; when more than three gauges thinner add 5% for each gauge more than three.

Saws 48 inches and under, and 62 inches and over in diameter more than two gauges thinner than list not warranted.

Saws 50 to 60 inches in diameter thinner than 10 gauge not warranted.

Saws 42 inches or less in diameter beveled one gauge without extra charge; 44 inches or larger beveled two gauges without extra charge.

Saws hollow or concave ground add for each additional gauge hollow or concave ground double the list for beveling.

Saws for cutting bone, horn or ivory, add 50% to the above list. When these saws are hollow or bevel ground the 50% advance is to apply only on the list of straight saws and not on extras for hollow or bevel grinding.

✣F. O. B. Factory Only.

Stubbs English Standard Gauge used in manufacturing these saws.

INSTRUCTIONS FOR ORDERING CIRCULAR SAWS

The following information must be given:—

1—Rip or Cross Cut.
2—Right or Left Hand.
3 Diameter.
4—Thickness or Gauge at Rim.
5—Number of Teeth.
6—Kind of Tooth.
7 Size of Mandrel Hole.
8 Size of Pin Holes.
9—Distance between Holes from Center to Center.
10—Number of Revolutions Per Minute.
11 Greatest Feed at each Revolution, in inches.
12—Kind of Lumber to be Sawed.

Regular saws 40 inches and over have 2 inch mandrel hole, ⅝ tug pin holes three inches from center to center. If wanted different, please pull pattern of holes.

In reordering bits and holders specify style wanted. Number and gauges clearly stamped on each bit and holder. Otherwise send samples.

One extra set of teeth or bits given with each saw. Also two holders or shanks with saws 40 inches in diameter and under and three with saws over 40 inches in diameter. One wrench given with saw or set of saws.

No extra charge for saws one gauge thicker than list.

No extra charge for saws one or two gauges thinner than list, when more than two gauges hinner, add 5 per cent to list for each gauge.

REVOLVERS

IVER-JOHNSON

The Safety Action—The top of the hammer of an Iver-Johnson revolver rests against the solid frame, so that no conceivable impact could force it against the firing pin.

A lifter, which is a long upright part, fits into the notch in front of the hammer; when the trigger is pulled, this lifter is at its highest point and covers the firing pin and at this relative position the hammer is released, striking the lifter and driving the firing pin into the cartridge. Then as the trigger snaps forward the lifter drops down, leaving a clear space between the hammer and firing pin.

The safety action does not add a single extra part nor does it impair the smoothness or speed of action. It demands no thought or intelligence from the user. There is no other conceivable way to discharge the cartridge except by simply pulling the trigger. You can throw the revolver against the wall, kick it about the room or "hammer the hammer" and the cartridge will not explode.

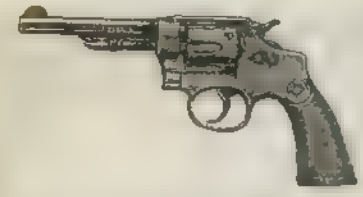
SMITH & WESSON.



THE "REGULATION POLICE" MODEL.

New Patent Safety Hammer Block.

Double action, solid frame, swing out cylinder, new patent safety hammer block.

The factory decided to put this, their latest model, on the market on account of the repeated requests which they have received from police departments for a light weight arm of this type in .38 calibre, as the heavier revolvers prove quite a burden to an officer by the end of his watch.

Hammer Positively Blocked Against Accidental Discharge.

Square Butt, Checkered Walnut Stock.

SORORITY WATCHES

POPULAR 15 Jewel WATCHES

SORORITY WATCHES are designed especially for the modern youthful woman. They are precision in construction, in time keeping and in appearance.

The movements are factory-made by the Sorority Watch Co., a subsidiary of the Hermetos Watch Co. Each one is finely finished and contains 15 red rubies, patent exhaustance wheel, lever escapement and engraved dials with assorted enameled and raised numerals. The model number stamped on each movement facilitates ordering of materials.

New and fashionable Star Scepter quality cases protect the movements and enhance the beauty of SORORITY WATCHES. The fancy models are also available in Star 14K solid White Gold 3 piece cases.

A splendid presentation box, together with a price ticket, guarantee card and "Laws of Lucerne" certificate is supplied with every SORORITY WATCH.

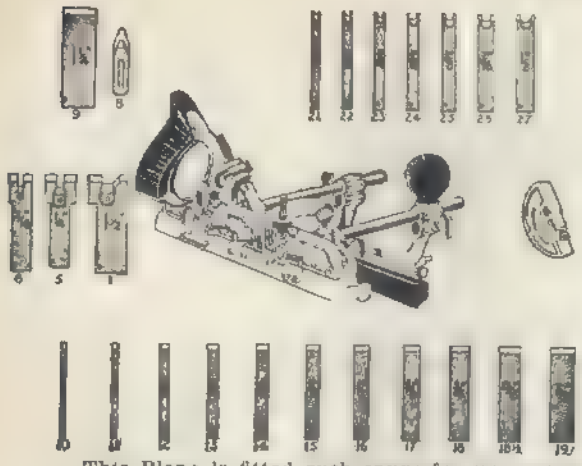
COMBINATION PLANES



STANLEY PLOW, BEADING, RABBET AND MATCHING

Seven Tools in One, in Compact and Practical Form

Each

No. 45—10 in. Long, Nickel Plated Stock and Fence, Rosewood Handle and Knob, Complete with 23 Cutters as Described Below, Weight Each 9½ Lbs. . . . $15.50

One in a Neat Steel Box, Complete with Cutters.

This Plane embraces in a compact and practical form (1) Beading and Center Beading Plane, (2) Plow, (3) Dado, (4) Rabbet and Filletster, (5) Match Plane, (6) Sash Plane, (7) Slitting Plane.

Each Plane is accompanied by seven Beading Tools (⅛, 3/16, ¼, 5/16, ⅜, 7/16 and ½ in.); Eleven Plow and Dado Bits (⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½, ⅝, ¾, ⅞ and ⅞ in.); One 1¼ in. Filletster, One Slitting, One ⅜ in. Match Tool, One ¼ in. Match Tool, and One 1⅛ in. Sash Tool; Twenty-three Tools in all.

This Plane is fitted with spurs for use across the grain, etc., and can be used either right or left hand

For beading at a distance from the edge of a board attach Cam Rest (see cut at right of plane) to the front arm between the sliding section and fence to prevent the fence sagging. In certain work attach the same to the rear arm to prevent the plane from rocking.

STANLEY ALUMINUM PLOW, BEADING, RABBET AND MATCHING

Similar in Design to the Regular No. 45 Plane. Being Made of Aluminum it is an Exceptionally Light Weight Tool that Will Not Rust

Each

No. A45—Aluminum, with 23 Cutters, Weight Each 7¾ Lbs. $18.50

STANLEY HOLLOWS AND ROUNDS

For Use on No. 45 Plane Only and Not Included in Price of Plane

Sold in Sets, Each Set Comprises One Hollow, One Round and Two Cutters.

Nos.	6	8	10	12
Cutter, Inches	½	⅝	¾	1
Works Circles, Inches	¾	1	1¼	1½
Per Set	$2 30	$2 30	$2 50	$2 50

STANLEY NOSING TOOL

For Use on No. 45 Plane Only and Not Included in Price of Plane

This is a specially formed bottom. The tool and its cutter will form what might be called an exaggerated round as in shaping the edges of stair treads.

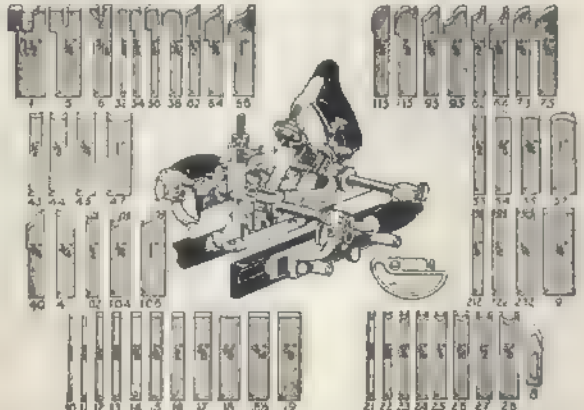
Each

No. 5—Nosing Tool with One Cutter $1.75

STANLEY PATENT UNIVERSAL COMBINATION

All metal parts of the planes are nickel plated. The handles and fence are made of selected rosewood, and every part is finished.

All parts are interchangeable.



This tool, in addition to being a Beading Plane, a Plow, Dado, Rabbet Filletster, Match Plane, Sash Plane and a Slitting Plane, is also a Superior Moulding Plane and will accommodate cutters of almost any shape and size.

Each

No. 55—10 in. Long, Nickel Plated, Rosewood Handles and Fences, Complete with 55 Cutters as Described Below, Weight Each 15¼ Lbs. $28 00

One in a Neat Steel Box, Complete with Cutters.

The Following Cutters are Furnished with Each Plane

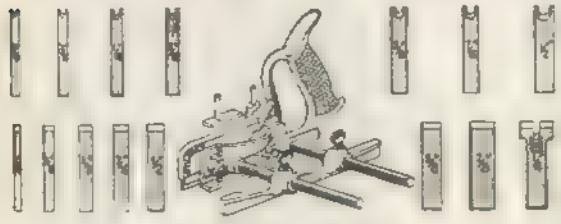
One 1½ in. Sash Tool, one ¼ in. Match Tool; one ⅜ in. Match Tool, one Slitting Tool; one 1¼ in. Filletster; twelve Plow and Dado Tools (⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½, ⅝, ¾, ⅞ and ⅞ in.), nine Beading Tools (⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½, ⅝ and ¾ in.), four Fluting Tools, (¼, ⅜, ½ and ¾ in.), four Hollows (½, ⅝, ¾ and 1 in.), four Rounds (½, ⅝, ¾ and 1 in.), two Quarter Hollows (½ and ¾ in.), two Quarter Rounds (⅝ and ⅞ in.); three Reverse Ogees (½, ¾ and 1 in.), two Roman Ogees (⅝ and ¾ in.), three Grecian Ogees (½, ¾ and 1 in.), two Quarter Rounds with Bead (⅝ and ⅞ in.); three Reeding Tools with two Beads (⅛, 3/16 and ¼ in.), one ¾ in Right Hand and one ¾ in. Left Hand Chamfers.

The Plane is fitted with spurs for working across the grain and a special cam rest to be located on the front arm when working at a distance from the edge of the board, to keep the fence from sagging, or on the rear arm on certain work to prevent the possibility of the plane rocking. All parts are interchangeable.

Note—Catalog and Prices of Extra and Special Cutters for Nos. 45 and 55 Planes Furnished on Request.

ADJUSTABLE IRON PLANES

STANLEY COMBINED PLOW, BEADING AND MATCHING



Complete with 13 Cutters

A small combination plane for light work Adapted for Plow, Beading, Matching and Rabbet work. Fitted with spurs, depth gauge, and a fence with a 5 in. adjustment.

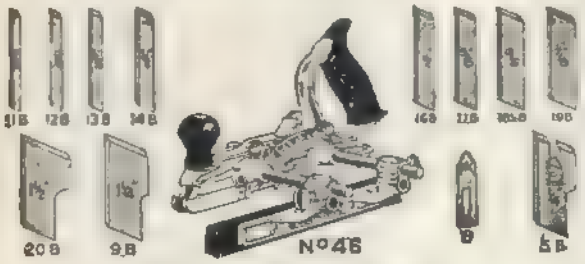
Each

No. 50—9 ¼ in. Long, Nickel Plated Stock and Fence, Weight Each 3 ½ Lbs.....$8.50

The cutters comprise 7 plow and dado bits, one each ¼, ⅜, ½, ⅝ and ¾ in., 7 beading tools, one each ⅛, ¾, ⅛, ⅜, ⅛ and ½ in. and a ⅛ in tonguing tool.

One in a Box

STANLEY SKEW CUTTER COMBINATION



Complete with 12 Cutters

Nickel Plated Stock and Fence, Rosewood Handle and Knob

For Plow, Dado, Filletster, Matching and Rabbet work Fitted with spurs, a depth gauge and a fence with Rosewood face

Each

No. 46—10 ½ in. Long, Weight Each 5¾ Lbs.....$10.95

The cutters comprise 9 plow and dado bits, ⅛, ¼, ⅜, ½, ⅝, ¾, ⅞ and 1 ¼ in.; a 1 ½ in. filletster cutter, a ⅛ in. tonguing tool, and a splitting cutter.

Each

No. 47—Without Fence, with ⅜, ½, ⅝, ¾, ⅞, 1 ¼ in. Dado and Slitting Cutter, Otherwise Same as No 46, Weight Each 3¾ Lbs.....$8.65

One in a Box

ELECTRIC PLANES

ALTA

Ten Times Faster than a Jack Plane

Aluminum Frame, High Speed Steel Blades, Dust-Proof Bearings, Indicator Dial on Front, Adjusting Screw Shows Depth of Cut, Equipped with Universal Motor, Fits Any Light Socket.

Each

No. 1A—Capacity 2 ½ in. Wide, Adjustable Cut, 0 to ⅛ in., Weight Each 13 Lbs $125 00

SCRAPER PLANES

STANLEY DOUBLE HANDLE VENEER

For Scraping Veneer or for Cabinet Work

The handles are of rosewood with a double grip, and, being placed across the center of the tool, give it a good balance. The blade is adjustable endwise and for angle, and can be firmly locked in position desired.

Each

No. 12—6 ⅛ in. Long, 2⅞ in. Cutter, Weight Each 3⅜ Lbs $4 90

Extra Blades .50

One in a Box.

With Rosewood Bottom

Japanned Iron Frame, Rosewood Handles, Endwise Adjustment. The Blades can be locked at any angle

Each

No. 12½—6¼ in. Long, 2⅞ in. Cutter, Weight Each 4 Lbs. $0.65

Extra Blades .50

Extra Rosewood Bottom .45

This wood bottom is especially adapted for use on very fine work, as it renders less liable the possibility of marring or scratching the surface being worked upon. This bottom is detachable, and, when worn, can be readily removed and a new one substituted.

One in a Box

STANLEY SINGLE HANDLE

Rosewood Handle and Knob

This Plane has the same form as the regular Bailey Plane and is preferred by some users to the double handle Scraper Plane. The blade is adjustable endwise and for angle, and can be firmly locked in position desired

Each

No. 112—9 in. Long, 2⅞ in. Cutter, Weight 4 Lbs. $4.30

Extra Blades .50

One in a Box.

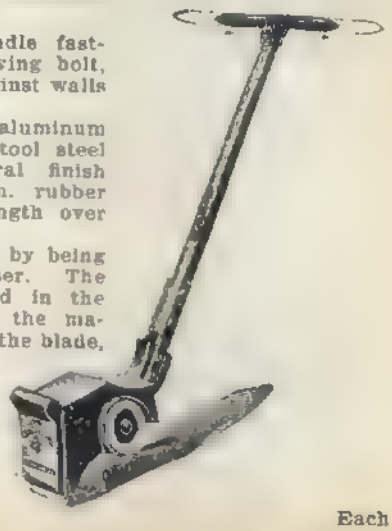
FLOOR SCRAPERS

STEARNS

Adjustable cross handle fastened with clamp and wing bolt, allowing user to get against walls and into corners.

6 in. cast iron frame, aluminum finish, 6 in. tempered tool steel blade, 38 ½ in. natural finish hardwood handle, 5 in. rubber tired wheels, 56 in. length over all.

This machine is used by being drawn towards the user. The blade is firmly clamped in the scraper, the weight of the machine, resting mostly on the blade, prevents vibration or clatter, and thus eliminates wavy effects on floor.



Each

No. 10—Weight 135 Lbs.....$20 00

METALLIC PLUMBS AND LEVELS

STANLEY ADJUSTABLE

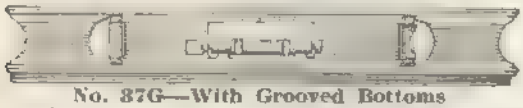
No. 36G—With Grooved Bottoms

Japanned Body, Nickel Trimmings, Adjustable, Prooved Glasses. Groove in Bottom Permits Use of the Level on Shafting in addition to its use as a Regular Level.

Length, Inches	6	9	12	18	24
Weight Each, Lbs.	⅞	1⅛	1⅜	3	4⅛
Each	$1 90	2 30	2 75	3 30	3 70

One in a Box

STANLEY IMPROVED ADJUSTABLE



No. 37G—With Grooved Bottoms

Nickel Plated Iron Body, Nickel Trimmings, Adjustable Ground Glasses, Eclipse Case Cover, Two Plumbs.

Length, Inches	12	18	24
Weight Each, Lbs.	1⅞	3	4¼
Each	$3 70	4.45	5 15

Groove in bottom permits use of the level on shafting in addition to its use as a regular level

The Eclipse Cover is an outer shell or tube fitting over the level case, which can be turned either to expose the level glass when in use, or to protect it when not in use.

One in a Box

STARRETT

No. 132—With Double Plumb

Grooved Bottoms, Graduated Vials, Black Enamel Finish. The 4 to 12 in. have Square Ends. The 18 and 24 in. Sizes are Furnished with Concave Ends

Length, Inches	4	6	9	12	18	24
Weight Each, Lbs.	¾	⅞	1¼	1¾	2¾	4
Each	$1 65	1 80	2 00	2.10	3.00	3.50

One in a Box

STARRETT ENGINEERS AND PLUMBERS

With Grooved Bottom

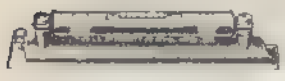
The Hinged Tube inside the frame contains a level glass and is adjusted to a graduated scale and shows any incline by 32nds (or less) to 2 inches to the foot. A fixed level and plumb in addition makes this a practical tool for all class of work

	Plain Vial		Ground Vial	
Nos.	133A	133B	133C	133D
Length, Inches	10	15	10	15
Weight Each, Lbs.	1⅞	2⅝	1⅞	2⅝
Each	$3 75	4.00	7.00	7.25

One in a Box

IRON BENCH LEVELS

STARRETT IMPROVED ADJUSTABLE



Style of 6 and 8 inch.

Style of 12 inch

For Testing Shafting

Japanned Iron Base, Nickel Plated Trimmings.

No. 97—With Plain Vial

Length, Inches	6	8	12	*18
Each	$2.25	2.75	4 00	6 00

No. 98—With Ground Vial

Length, Inches	6	8	12	*18
Each	$4 25	5.00	7.00	10 00

*The 18 inch size is furnished with double plumbs.

In addition to the regular parallel vial, the bases have a cross level which enables one to place or hold the base on a shaft level in its cross section, not canted sidewise, for the shape of a level glass is such that though true as adjusted on a flat surface, it will not be reliable when canted sidewise.

One in a Box.

LEVELS

ADJUSTABLE IRON PLANES

STANLEY RABBET

With Adjustable Depth Gauge

Japanned Iron Stock, 8 in. Long, with Spur for Working Across Grain

Nos.	190	191	192
Cutter, Inches	1½	1¼	1
Weight Each, Lbs.	2½	2¼	2
Each	$2 95	2.80	2.60

These Planes will lie perfectly flat on either side and can be used with right or left hand while planing into corners or up against perpendicular surfaces They are fitted with a spur and a detachable depth gauge

One in a Box

STANLEY IMPROVED RABBET AND FILLETSTER

Japanned Iron Stock, Two Spurs and Adjustable Depth Gauge

This Plane will lie perfectly flat on either side and has an adjustable fence for regulating width of cut

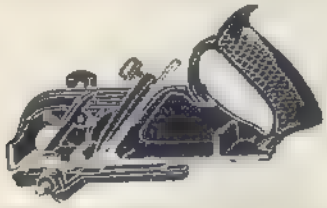
It is fitted with two spurs and an adjustable depth gauge.

The front part of the plane can be detached for bull nose work. The cutter is adjustable endwise. Each

No. 278—6¾ in. Long, 1 in. Cutter, Weight Each 2 Lbs. $3.20

One in a Box.

STANLEY DUPLEX, FILLETSTER AND RABBET



With Adjustable Depth Gauge

Japanned Iron Frame, Adjustable Fence, Detachable Depth Gauge Each

No. 78—8½ in. Long, 1⅛ in. Cutter, Weight Each 3 Lbs. $3.20

These Planes have two seats for the cutters, one for regular work and the other where a bull nose is required The adjustable fence can be used on either side and slides under the bottom, regulating the width of the cut. To work same as a rabbet plane, remove fence and arm.

One in a Box.

STANLEY ALUMINUM DUPLEX FILLETSTER AND RABBET

With Adjustable Depth Gauge

Similar in design to the Regular No 78 Stanley Iron Plane. Being made of Aluminum it is exceptionally light and will not rust. Each

No. A78—8½ in. Long, 1½ in. Cutter, Weight Each 1¼ Lbs. $4.20

One in a Box

ADJUSTABLE IRON PLANES

STANLEY HANDLED IRON DADO

With Adjustable Depth Gauge

Japanned Iron Stock, 8 in Long, with Skew Cutters and Two Adjustable Spurs.

Weight Each, Lbs.		2	2¼	2¼
Each		$3.60	3.80	3.95

One in a Box

STANLEY SCRUB

Round Edge Bit

Japanned Iron Frame, Beechwood Handle and Knob. Each

No. 40—8½ in. Long, 1⅛ in Cutter, Weight Each 2½ Lbs. $2 45

No. 40½—10½ in. Long, 1½ in. Cutter, Weight Each 2½ Lbs. 3 25

For planing down to a rough dimension any board that is too wide to conveniently rip with a hand saw. Thas is made possible by reason of the peculiar shape of the extra heavy cutter.

One in a Box

STANLEY EDGE TRIMMING

Japanned Iron Body, English Steel Cutter Each

No. 95—6 in. Long, ⅞ in Cutter, Weight Each 1¼ Lbs. $1.90

For trimming or smoothing the edge of boards for a square or close fit. The cutter works on a skew Wood blocks of various bevels may be attached enabling the user to make a slanting cut

One in a Box

STANLEY BELT MAKERS

With Adjustable Throat

Japanned Iron Body, Hardwood Handle, Cutter Adjustable Endwise. Each

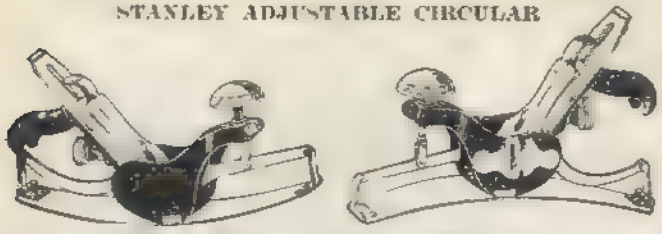
No. 11—5¾ in. Long, 2⅜ in. Cutter, Weight Each 3½ Lbs. $4 30

This Plane is used for chamfering down the ends of belts before fastening them together

One in a Box.

ADJUSTABLE IRON PLANES

STANLEY ADJUSTABLE CIRCULAR



With Graduated Scale for Setting Face

Japanned Iron Frame, Nickel Plated Trimmings. Each

No. 113—10 in. Long, 1¾ in. Cutter, Weight Each 3½ Lbs. **$7.45**

This plane has a flexible steel face which can be accurately adjusted for planing the inside or outside of circles.

The face is fastened at its center to the plane body, and adjusted at the ends by means of a screw and levers.

One in a Box

VICTOR ADJUSTABLE

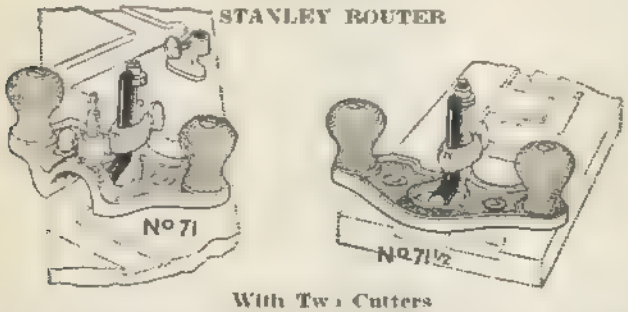
For Inside or Outside Circles

Black Japanned Finish, Cutters adjustable endwise and sidewise. Center Screw Adjustment with Stop. Each

No. 20—10 in Long 1¾ in. Cutter, Weight Each 4 Lbs. **$9 15**

One in a Box

STANLEY ROUTER



With Two Cutters

For surfacing the bottom of grooves or other depressions parallel with the surface of the work. A wooden bottom of any size can be attached, enabling the user to router on large openings. A ¼ and ½ in. cutter and a patented smoothing cutter furnished with each plane. Each

No. 71—Open Throat, 7½ in. Long, Nickel Plated Beech Handles with Cutters and Attachments for Closing Throat on Narrow Surfaces and Regulating Depth of Cut, Weight Each 2⅝ Lbs **$4 10**

No. 71½—Closed Throat, 7½ in. Long, Nickel Plated Complete with Cutters, Weight Each 2⅛ Lbs.. **3.20**

One in a Box.

STANLEY CORE BOX
With One Pair of Sections

Nickel Plated Iron Frame, Beechwood Handle and Knob

For making Circular Core Boxes either Straight or Tapered. The Sides of the Plane are at right angles, consequently the point of the Plane will always cut on the circumference of the circle when the sides rest on the edges of the cut

Adapted for large Core Boxes, working Semi-circles from 1 to 2½ in. diameter, and with extra sizes up to 5 in. diameter. Each

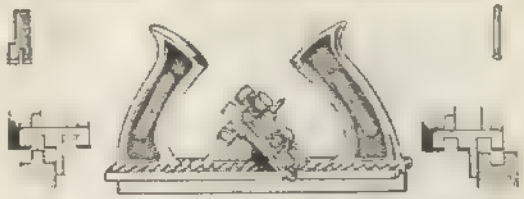
No. 57—10 in Long, ⅞ in. Cutter, Weight Each 6¾ Lbs. **$8 65**

Per Pair

Additional Sides—Each Pair Adding 2½ in. to Diameter of Semi-circle..... **$1 90**

ADJUSTABLE IRON PLANES

STANLEY DOUBLE END MATCHING



Nickel Plated Iron Handles and Body

These Planes have two cutters, a plow, and a tongue tool, both governed by one permanent fence. The tongue tool has one edge wider than the other, which overhangs one side when tonguing on center. Both tongue and groove are cut by working the tool in the same direction, by merely reversing it end for end

Each

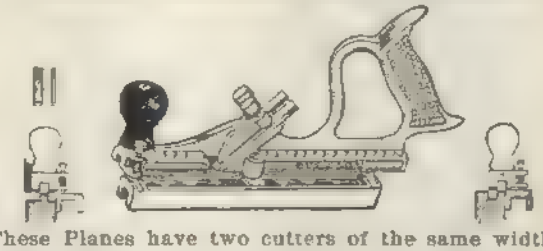
No. 146—Cuts ⅛ in Groove on ⅜ to ½ in. Boards, Centers on ⅜ in., Weight Each 1½ Lbs **$4 00**

No. 147—Cuts ¼ in. Groove on ½ to ⅝ in. Boards, Centers on ⅝ in., Weight Each 1⅞ Lbs **4 25**

No. 148—Cuts ½ in. Groove on ¾ to 1 in. Boards, Centers on ⅞ in., Weight Each 2⅜ Lbs..... **4.50**

One in a Box.

STANLEY SWINGING FENCE MATCHING



These Planes have two cutters of the same width, and one extra wide cutter. The fence in one setting exposes two cutters for cutting the tongue, and, when reversed, leaves only one exposed for cutting the groove. On thicker boards than the plane works on center, the extra wide cutter is used when cutting the tongue.

Each

No. 48—Cuts ⅜ in. Groove on Boards ¾ to 1¾ in., Centers on ⅞ in., Weight Each 3¾ Lbs..... **$5 30**

No. 49—Cuts ⅛ in. Groove on Boards ⅛ to ¾ in Centers on ½ in., Weight Each 2⅜ Lbs..... **5.30**

One in a Box.

STANLEY DOVETAIL TONGUE AND GROOVE

The Only Plane Manufactured That Will Cut a Dovetail.

Each

No. 444—9 in Long, Nickel Plated, Wt. Each 6 Lbs..**$10.95**

It will cut any size grooves and tongues to fit with sides at flare of 20 degrees, where the width of the neck is more than one-quarter of an inch and the depth of groove not more than three-quarters of an inch. The tongue and groove are cut separately and can be made with parallel or tapering sides

Its compactness is shown in the illustration, where the cut on the left shows the plane assembled for cutting the tongue, and that on the right for cutting the groove. A circular containing complete instructions for assembling and operating is packed with each tool.

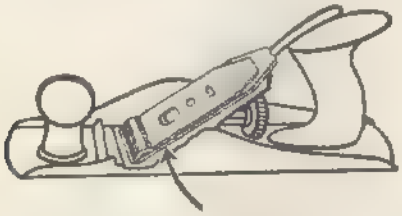
One in a Box

READY EDGE PLANE BLADES

STANLEY

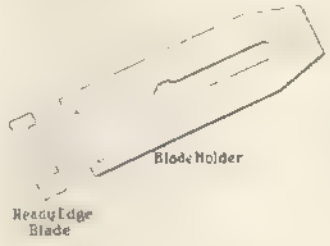
These Blades assure a sharp cutting edge. Whenever an old blade becomes dull a new one can be quickly substituted.

Stanley Ready Edge Blades are furnished with Special Double Plane Irons in the 1¾, 2 and 2⅜ in. sizes for use on the regular Stanley Bailey, Bed Rock and Aluminum Planes



Ready Edge Blade and Double Iron in Position.

Stanley Ready Edge Blades are attached by screws to specially constructed blade holders. A plane iron cap of special design fits over this and is held in place by a cap screw. Thus assembled it can be applied for use in the Regular Stanley Bailey, Bed Rock and Aluminum Planes.



Display Carton

Size 6½ in. Long, 7 in Wide. Contains 6 Individual Boxes Four of 2 in. Size, One Each 1¾ in. and 2⅜ in. Sizes.

Individual Box (2 in Size), 6 in. Long, 2⅛ in. Wide.
Contains 1 Double Iron Blade and 5 Small Cutters

Small Package of 5 Blades Contained in Each Ready Edge Double Iron Box.

	Each
Display Carton—Containing 6 Blades and 6 Sets of Ready Edges	$12.00
	Per Set
Individual Boxes—Containing 1 Blade and 1 Set of Ready Edges, Furnished 1¾, 2 or 2⅜ in. Wide for Use on Regular Stanley or Bed Rock Planes	$2.00
Ready Edge Blades—5 Edges for Use with Patent Blade Holder, Furnished 1¾, 2 or 2⅜ in. Wide.	.85

These Ready Edge Plane Bits save time and money for the mechanic. A sharp edge is always ready for use.

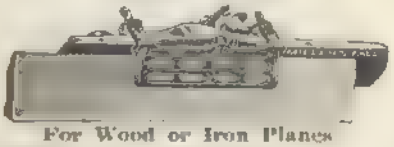
One Dozen in a Box

JOINTER GAUGES

MILLERS FALLS



For Wood or Iron Planes

Black Enameled Iron, Flat Surface Nickel Plated

Each

No. 88—9 in. Long, Weight Each 2¼ Lbs. $2 30

Adjustable to any bevel. Can be attached to any wood or iron Jack, Fore or Jointer Plane, and enables the operator to accurately plane bevels of any desired angle or to make even joints without using a Try Square or Bevel

One in a Box

STANLEY

Enables the workman to plane bevels of any angle between 30 and 90 degrees or to square up the edges of boards with extreme accuracy. A Hole is bored in each end of the Gauge so that a Wood Face of any desired size may be attached, thus providing a bearing surface longer or wider than the face of the gauge itself

Each

No. 386—For Iron Planes, Iron and Steel Construction, Nickel Plated, Weight Each 2¼ Lbs. $2 35

One in a Box

CHISEL GRINDERS

STANLEY

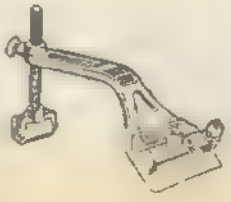
For Grinding Cutters and Chisels

Tools may be ground to any desired bevel. The tool to be sharpened is rigidly held in the grinder by thumb screws.

Each

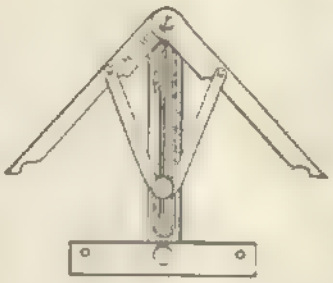
No. 200 — All Metal, Nickel Plated, Weight Each 1⅝ Lbs. $1 60

One in a Box



ANGLE DIVIDERS

STANLEY



Iron Body, Pressed Steel Arms, Full Nickel Plated

Each

No. 30—Length Over All 7⅝ in., Length of Arms 6 in., Length of T Head 4 in., Weight Each 1½ Lbs $2.20

Designed for bisecting or dividing any angle, and for fitting mouldings or other woodwork into odd angles.

One in a Box

SLIDING T BEVELS

STAIR GAUGE FIXTURES

STARRETT

For Use with Carpenters Steel Squares

A pair of these fixtures can be readily clamped to a carpenter's steel square to form a gauge for various uses. Sketch A shows the gauge as applied for laying out a stair stringer; Sketch B, laying off hexagon angles; Sketch C as used as a Center Gauge or in quartering a circle. These fixtures are light, neat, efficient and low priced.

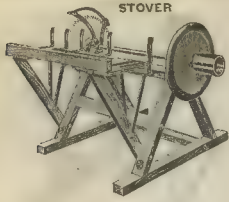
WOOD SAWING MACHINES



Wood Frame With Tilting Table.

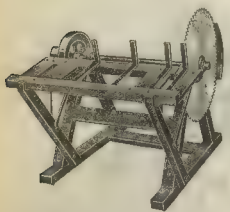
Seasoned hardwood frame, mortised, bolted and firmly braced. Lathe turned steel mandrel, 4 feet, 4 inches long and 1½ inches diameter. 1⅜ inches for the saw blade and to 1⅞ inches for the balance wheel, pulley and boxes, ball and socket type boxes, babbitted, dust proof, non-heating and self adjusting. Tilting table has roller at one end to accomodate long poles. Interchangeable balance wheel and pulley. Frame equipped with a saw guard.

Frame is arranged to receive blade to left of operator, but if so ordered it can be arranged without extra charge to receive the blade to the right of the operator.

Each

No. 2—Without blade; takes blades from 20 to 30 ins diam; pulley 6x6 ins; speed 1000 to 1500 R. P. M.; electric motor; distance between balance wheel and blade 3 ft., 6 ins **$79 50**

Shipping wt 274 lbs.



Hardwood frame, uprights and swinging table, painted red; 1 7/16 inch cold rolled steel mandrel 49 inches long fitted for saw with 1⅝ inch arbor. Accurately machined and balanced, fly wheel 15½ inches in diameter. Self aligning bearings, lubricated by hard oilers inner sleeves lined with high grade babbitt. Frame equipped with four pole and and one saw guide.

Standard size pulley 6x6 inches.

Each

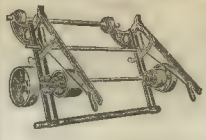
No. 700—Without Saw; floor space required 46x49 ins; height frame 31 ins **$61 50**

Crated, K. D.; wt each 250 lbs.

Note—For circular saw blades see Dept. 1.

Wood sawing machines are wonderful labor saving devices, especially on the Farm. Sell them to your trade from this catalog.

LAY PORTA POWER



An implement which transforms any make of automobile into a portable power plant. Most commonly used on Ford cars, developing 6 or 7 horse power. Attachment for operating wood saw, grinding mill, hay press, pump, corn sheller, etc.

After car is backed into suitable position. Lay Porta Power is pushed beneath rear of car as shown in illustration (Fig 1), one foot resting on base.

(Fig. 1)

(Fig 2)

Hand clasps control quadrant, and handles pushed down. This jacks the car up and pulls it back until tires make contact with rollers. It is locked in this position. (See Fig. 2)

Rear of car is now off the ground, axle resting securely in pockets on the end of each handle of attachment (See Fig. 3). Everything is firmly held in place and outfit now ready for belt application.

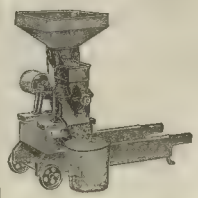
(Fig. 3)

Each

No. LP100—Size pulleys 6x4 and 10x6 ins ..... ✤**$76 50**

Shipping wt each 180 lbs.

MILLS



Designed to run with Lay Porta Power. Duplex type, having two sets of 6 inch burrs, with genuine shear cutting construction. Normal speed 600 revolutions per minute. Complete with necessary belting.

Each

No. PM20—Capacity 20 to 25 bushels of ground grain per hour; 6x6 in. pulley ..... ✤**$76 50**

Shipping wt each 275 lbs.

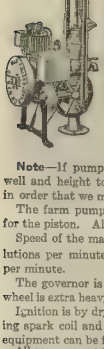
FARM PUMP ENGINES

FULLER & JOHNSON



Complete equipment consists of clamps, gearing, steel connecting rods and cross head for connecting to the ordianry windmill pump standard. Includes steel battery box, batteries, coil switch and connecting wires, wrench, oiler, grease cups and accessories (**no pulley**).

No.	500
Revoliutions per min. engine shaft	500
Speed of intermediate shaft	150
Pump strokes per minute	35
Length stroke, ins	5,7½,10
Shipping wt, lbs	335
Each	✣$210 00

Crated.

Note—If pump is ordered with engine, specify depth of well and height to which water is to be lifted above pump, in order that we may determine size of cylinder required.

The farm pumping engine has an automatic oiling system for the piston. All bearings are lubricated with hard oil.

Speed of the main shaft is adjustable from 500 to 600 revolutions per minute. Speed of jack shaft is 31 to 35 strokes per minute.

The governor is on the inside of the fly-wheel and the fly-wheel is extra heavy turned and then carefully balanced.

Ignition is by dry cells working through a high grade vibrating spark coil and regular automobile spark plug. Magneto equipment can be furnished if desired.

All gears except the two operating the pump rod are machine cut and mesh perfectly and are enclosed in the crank case. The stroke of the pump can be 5, 7½ or 10 inches.

The pump can be used in winter or summer out of doors. The engine is air cooled and cannot freeze.

Pumping Capacity. The farm pump engine will pump any ordinary well as follows: Total head and corresponding size and capacity of pump cylinders at 35, 5 inch strokes per minute.

Total lift of water, Ft	Diam of Cylinder Ins	Water deliver-ed, Gal. Per Hour
500	1⅜	65
400	1¾	95
275	2½	170
200	2¾	240
175	3	290
125	3½	400
100	4	550
65	5	800
45	6	1150

If the water in the well is not as far from the surface or is not to be raised as high, so that the total lift is less than given in table, a stroke longer than 5 in. may be used, and the amount of water will be correspondingly increased, provided the work done is within the capacity of the engine. For exampie, if the cylinder used is 4 inch diameter and the total lift only 50 ft., the 10 inch stroke may be used and the capacity would be increased to 1100 gallon per hour.

Pulleys. If pulley is desired, give size and specify whether flat or crown face is wanted.

Flat belt pulley for intermediate or slow speed shaft, ins.	These pulleys fit on in place of the cap on outside of fly-wheel.	
	Flat belt pulley, ins	Round belt pulley, Diam, ins
3x2¼	3x3	2
4x2¼	4x3	4
5x2¼	5x3	6
6x2¼	6x3	8
	8x3

WOOD SAWING MACHINES

STOVER

Wood Frame with Sliding Table.

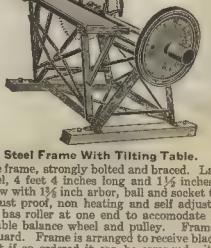
Seasoned hardwood frame, mortised, bolted and braced. The saw arbor or shaft is a piece of lathe turned steel 4ft. 4 in. long and 1½ inches diameter. It is turned down to 1⅝ inches for the saw blade, and to 1⅞ inches for the balance wheel pulley and boxes. Boxes are swivel type, well babbitted, dust proof, non-heating, self-adjusting to compensate for wear or shrinkage, and have large oil chambers.

The table has anti-friction iron rollers on the under side, which permit it to slide easily and with minimum friction over a metal track that is bolted to the frame. A roller at one end of the table is a great help in handling long poles. Frame equipped with a saw guard. Each

No. 7—Without blade, takes blades from 20 to 30 ins in diam; pulley 5x6 ins; speed 1000 to 1500 R. P. M., power required to operate 2 H. P. gasoline engine or electric motor; distance between balance wheel and blade 3 ft 6 ins ✣$85 05

Shipping wt each 851 lbs.

APPLETON



Steel Frame With Tilting Table.

Steel angle frame, strongly bolted and braced. Lathe turned steel mandrel, 4 feet 4 inches long and 1⅝ inches diameter. Fitted for saw with 1⅝ inch arbor, ball and socket type boxes, babbitted, dust proof, non heating and self adjusting. The tilting table has roller at one end to accomodate long poles. Interchangeable balance wheel and pulley. Frame equipped with a saw guard. Frame is arranged to receive blade to left of operator, but if so ordered it can be arranged without extra charge to receive blade to right of operator. Each

No. 1—Without blade; takes blades from 20 to 30; ins diam; pulley 5x6 ins; speed 1000 to 1500 R. P. M. power required to operate 2 H. P. gasoline engine or electric motor; distance between balance wheel and blade 3 ft. 6 ins $84 00

Shipping wt each 265 lbs.

Note—For circular saw blades see Dept. 1.

This modern building is proof of the profit in making New Orleans a Studebaker town

$1000 Capital Grew to $600,000 Business in 11 Studebaker Years

IN 1915, the Capital City Auto Company, Studebaker dealer in Baton Rouge, opened another Studebaker business in New Orleans with $1000 capital. Only 2700 feet of floor space was needed for salesroom, parts and service.

In 1927, the Capital City Auto Company fills 75,000 square feet with a busy Studebaker-Erskine business, conservatively valued at $600,000!

Fred Perkins, president, says, "I hope our profitable experience will convince any dealer who is slow to change his business or cautious in selecting another line. The results we obtained by using business judgment and following the factory's progressive policy will be duplicated in any city or, relatively, in any small community with the now doubly valuable Studebaker-Erskine franchise."

This valuable Studebaker-Erskine franchise may be inadequately represented in your territory—or not at all. Wire or write *today* for complete and confidential information. Address Department 53, The Studebaker Corporation of America, South Bend, Indiana.

In 1915, the Capital City Auto Company learned the quickest way of proving Studebaker goodness was to get a prospect at the wheel

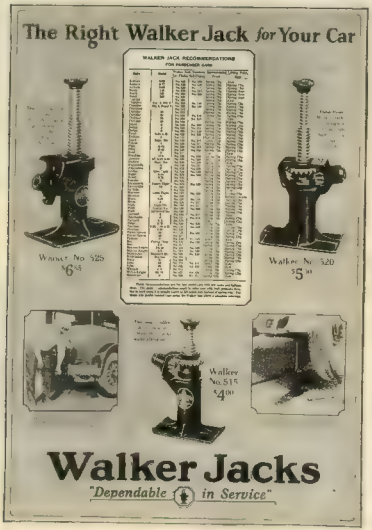
This Chart on Your Wall Will Put New Life in Your Jack Sales! It's The Biggest Thing That Ever Happened for Balloon Tire Jacks!



THIS Recommendation Chart, printed in colors and in wall hanger size, is packed with a striking Counter Card in every Walker Sampler—the new carton containing one each of the three Walker balloon tire jacks that will service every car. The Chart takes all guess work out of jack selling and the Sampler gives you a complete stock at an investment of only a few dollars. This combination is making money for dealers everywhere. Phone your jobber to send out a Walker Sampler.

WALKER MANUFACTURING COMPANY, Racine, Wisconsin

Why Safety Glass "all around"

MOTOR CARS - motor cars. Millions of motor cars scurrying over the roads of the country. Millions of drivers at their wheels—careful drivers reckless drivers—sometimes drunken drivers. Responsible owners and irresponsible owners. Sensible men and show-offs.

Amongst them, your car, your family, you. Precious lives. Exposed, despite your watchfulness, to the incompetence, the carelessness, the foolhardiness of others.

Is it right to withhold from them and from yourself any available protection, any procurable security?

The New Safety Stutz *alone* provides maximum defense. Just one of its safety features, Protex Safety Glass, costs the makers an extra quarter million dollars a year.

Yet all this surpassing security is plus value plus the ultra-low smartness of line, plus the road-smoothing riding-ease, plus the easy-as-wishing control, plus the dogged dependability and the marvelous performance.

STUTZ MOTOR CAR COMPANY of AMERICA, Inc.
Indianapolis

A complete line of standard, de luxe and custom-built body styles, meeting every possible requirement of style, body appointments and price. The choice of 40 lively colors and upholstery combinations in many of the models.

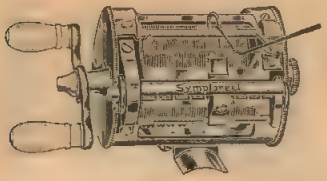
FISHING REELS

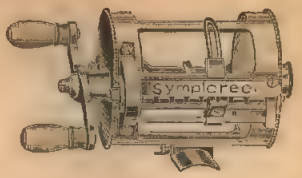


SYMPLOREEL

ANTI-BACK LASH LEVEL WINDING

Non Back Lash, Level Winder, double handle. A casting reel that combines simplicity and strength with the swift, silent running qualities of the plain reel. The only level winding reel with adjustable reciprocating shaft bearing, improved adjustable Non-Back-Lash feature, which prevents a snarled reel and makes it especially desirable for night fishing, the simplest take down reel made, quadruple nickel plated frame, nickel silver spool, phosphor bronze bearings with capillary oil well lubrication, balanced double handle. All beautifully finished and packed in special anti-tarnish jeweler's bag.

No. C257—Capacity 100 yards.....each *$12.50*



SYMPLOREEL

LEVEL WINDING

The light, smooth delicate action of this reel will please the most sensitive touch; its sturdy simple construction will withstand the roughest usage.

The frame is made of special hard drawn metal; quadruple nickel plate; spool flanges of nickel silver are accurately turned and the spool trued to a perfect balance. Phosphor bronze bearings with capillary oil well lubrication eliminates wear; the rear plate end bearing is adjustable; click spring is made of high-grade tool steel.

The level winding feature is well and strongly designed and of positive operation.

No. C252—Capacity 100 yards.....,each *$10.00*

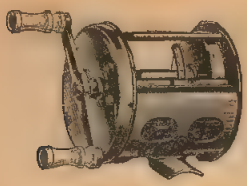
Capacity, 100 yards of average size silk casting line.

Length of pool 1⅞ in., diameter of spool 1⅛ in., w't 7¼ oz.

No. C700—Each *$6.00*

PACKED ONE IN A DISPLAY BOX

REELS



THE BRONSON "MODERN" LEVEL WINDING REEL

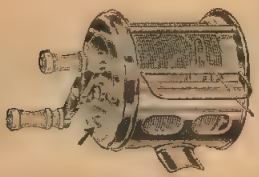
There are no irregular and unsightly attachments, and by including many parts into one or two pieces, a stronger reel of more pleasing proportions has been designed. Fewer parts make less chance for trouble; Finest tempered gears, transverse screw and pawl of a special alloy to give best service, bushings of both screw and spool of same material used in the most expensive reels, perfectly balanced crank handle with ivoroid grips, slightly more than quadruple multiplying. Radiant Nickel finish.

Simplicity in any mechanical device means fewer parts to get out of order and consequently less trouble. The "Modern" reel is the last word in this respect. There are only four loose parts when the reel is entirely taken apart. The removal of two screws accomplishes this result and makes every part available for oiling and cleaning. It cannot—It will not—go wrong.

Guaranteed to the fullest extent as to design, material and workmanship.

No. C100—Capacity 100 yds., diam. 2¼ in., pillar 1⅝ in., w't each 8 oz. ..... each *$3.50*

ONE IN A BOX



BRONSON "MODERN" LEVEL WINDING ANTI-BACK LASH

Nickel finish with scribed panels in head and tail plates. Equipped with perfectly balanced crank handle with two ivoroid grips, tempered gears, transverse screw and line carriage of special alloy to give best service, bushings of both screw and spool made of metals best suited for this purpose and generally used in much higher priced reels. A. B. L. drag lever made of nickel silver alloy to afford strength and prevent rusting and corrosion. A. B. L. drag lever adjusting spring is of the finest tempered bronze to withstand corrosion and maintain quick and reliable action in the A. B. L. mechanism. Click and drag combined in one member.

No. C500 A. B. L.—Capacity 100 yds. of average size silk casting line. Length of spool 1⅝ in., diam. of spool 1¾ in., w't each 7¼ oz. ..... each *$5.00*

Ted Ray Wood Clubs

Steel Shaft

Drivers—Brassies—Spoons

Ted Ray, the famous British professional winner of the British Open in 1912 and the American Open in 1920, needs no introduction to golfers. His tour of America in 1920 has made him a firm favorite.

Ted Ray drivers, brassies and spoons are clubs built to meet the demand for popular priced steel shafted clubs

These clubs are made with plain face and Wilson bell top tapered calfskin grips. The Union Hardware Company patented seamless steel shafts are made from drawn steel which has no joints or seams to open, producing a far more durable shaft. Made in men's right and left hand and women's left hand models.

No. 11R274. Driver. Each **4.00**
No. 11R275. Brassie. Each **4.00**
No. 11R276. Spoon. Each **4.00**

Macdonald Smith

Steel Shaft

Drivers, Brassies, Spoons

Macdonald Smith, considered one of the world's most brilliant players, has made two sensational bids for the British Open Championship, won the Metropolitan Open in 1924 and 1926 and tied with his brother for the U. S. Open in 1910.

Macdonald Smith Autographed Drivers, Brassies and Spoons are the exact duplicates of this Champion's own clubs. They have broad, deep faces with slight bulge and fairly large heads. Hammered steel driving face. Bell top, link olive green grips. Made with the improved new Union Hardware Co patented seamless shafts. Made of drawn steel these new shafts have no joints to open, insure greater strength and perfect uniformity giving the club just the right feel and balance.

Steel Shaft

No. 11R266. Driver. Each **7.15**
No. 11R268. Brassie. Each **7.15**
No. 11R270. Spoon. Each **7.15**

If left handed models are wanted put an X after catalog number.

Thus: 11R266X.

Walker Cup Golf Clubs

Steel Shaft Drivers, Brassies, Spoons

Walker Cup models are exclusive Wilson creations possessing several features of design which have made these clubs an international choice. They are complete in every detail.

Walker Cup Drivers, Brassies and Spoons are perfectly matched as to weight —balance—feel—lie—torsion—and resilience. Head especially designed, fairly large and slightly bulged, natural wood finish. Fancy metal lock screw face. Cannot chip or crack from climatic conditions. Face colors differ on driver, brassie and spoon. Alumo metal backs, combination alumo and brass sole plate. Bell top link treated leather grips.

All woods registered. May be purchased singly, in pairs, or matched sets of three. Finest hickory or bamboo finished steel shafts. For men or women

No.		Each

11R278.	Brassie..	10.00
11R279.	Spoon ...	10.00

The Wilson Sharpshooter Putter is considered one of the most attractive putters made. The head of this model is of highly polished Alumo Metal and the dual faces are inlaid with solid brass. Great accuracy is made possible through the use of this club as it is constructed on the center shafted principle which makes for perfect balance. Can be used by right or left hand player.

No. 11R271. Sharpshooter (Hickory Shaft). Each..... 4.25

The Amby-Dex Putter is a center-shafted wood head club with dual faces of brass. It is exceptionally well balanced. Can be used by right or left hand player.

No. 11R272. Each..... 4.75

The Kelley-Klub is ideal for putting. It has a "feel"—an indefinable balance which inspires confidence in sinking the long as well as the short ones. This club has achieved unusual popularity. Can be supplied in right hand model only.

No. 11R273. Each..... 4.75

Size of box 8x8 inches Packed ¼ dozen, not broken..... Per doz. 12.00

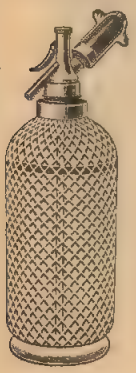
YOUR OWN SODA FOUNTAIN AT HOME

THE SPARKLET SYPHON

For Carbonating, Softening and Sterilizing Water and Other Beverages

The enormous consumption of beverages has established a waiting market for the soda fountain in the home as well as for the sportsman, camper, tourist and hundreds of thousands who travel The entire family can enjoy when wanted the kinds of beverages they prefer, made absolutely pure and sparkling by using a Sparklet Syphon.

The Sparklet Syphon makes it easy to carbonate all fruit flavors and other beverages for the entire family at a cost less than half the price of a glass of soda water. Sparklet Syphons are convenient for the use of dietists, convalescents, children, elderly people and those who desire pure, refreshing sparkling water with milk and other beverages. Easy to use. A sparker, which contains just enough carbon dioxide to charge one quart of liquid (one quart is designated by red line on bottle—never put in more, is placed in handle or bulb holder, the bulb holder is screwed on, the bulb is pierced and contents charged. (Follow directions packed with each bottle.) Because of their low cost, where Sparklet Syphons are introduced, there is a steady demand for Sparkers. Repeat orders are profitable to dealers too.



Just picture in your own mind! A hot, sultry day—a drive out in the country with the family—the foresight to take along a Sparklet Syphon, and extra sparkers—A couple of Thermos Bottles or Jugs filled with ice cold water brought along from home—your favorite fruit juice—RESULT—a nice cold soda fountain drink far away from the sweltering town or city. OH BOY!

SPARKLET SYPHONS

Made of a special Bohemian glass, doubly annealed, conferring the maximum toughness and minimum brittleness and are covered with a protective rustless steel wire plaited basket covering. Bottle will stand a pressure of, from 450 to 600 lbs. per square inch, whereas in actual use the pressure on piercing the bulb in the Syphon is only 180 lbs. per square inch, and even this is reduced by the absorption of the gas by the water during the process of shaking to 60 lbs. per square inch—the pressure necessary to discharge the contents of the Syphon.

One Quart Size (one quart is designated by a red line on bottle—never put in more). Height 13¾ in., width 4¾ in., aluminum fittings.

No. C30—Sparklet Syphons only, not equipped with bulbs..... .....per dozen $106.65

ONE IN A CARTON

EXTRA SPARKERS OR SPARKLET BULBS

Made of the best quality steel the world produces, specially rolled for Sparklet manufacture they are solid drawn in this steel, and are tested and guaranteed to resist a hydraulic pressure of from 9/10,000 lb. per square inch, or about 9 to 10 times the pressure to which they are subjected in use. Contents 8½ grammes.

ANVILS.

One Piece Semi-steel, Tempered.

This is a first class anvil for general farm use. It does not have a welded steel but is one piece of a special mixture of steel and iron

NOS.	50	70	100
Weight each, lbs	50	70	100
Net each	$5.40	$7.40	$10.50

Made only in above sizes.

VULCAN.

Not a Blacksmith's Anvil.

The face of this anvil is one solid piece of English tool steel, thoroughly welded to the body of the anvil by a patented process. It is then accurately ground and tempered, so it will stand the most severe test

The horn is covered with, and its extremity made, entirely of tough, untempered steel

The body of the anvil is made of the best **Lake Superior Charcoal Iron,** and being much more solid than wrought iron, the work being forged receives the full force of the blow The face of the anvil will remain perfectly true after years of service

TEN-PIN TINKER

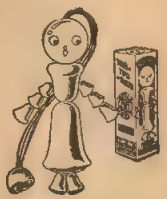
Each pin is 1 in. in diameter and 4½ in. high. Balls are 1⅜-in. diameter All permanently enameled in the colors shown. Ten pins and three balls packed in a sliding box that can be opened for inspection or display. Box size, 11×6×9½ inches. Each set weighs 12 oz. Case containing 1 dozen sets ready for shipment weighs 10¼ lbs.

No. C43—Per dozen.....$12.00

SIREN TINKER

offers an added choice among the Tinker "Doll" family. The balls are loose on the cord, which enables them to slide from end to end. The enameled colors are bright and attractive and safe for the child. Siren stands 8¼ inches high, exclusive of string and hand ball. Box size 2½×2½×8¾ inches. Packed singly, 12 boxes to the case. W't per doz. 4 lbs.

No. C38—Per dozen.....$6.00



BELLE TINKER

has established a well earned place as a staple selling item. Belle is packed in an attractive box, 2¾ inches square and 8¾ inches high, one dozen to the shipping case. W't per doz. 4¾ lbs.

No. C130—Per dozen.....$6.00

ROWLY BOAT TINKER

No assembling is necessary, each toy is a complete unit ready to operate when taken from the box and each toy is tested for successful operation before leaving the factory. The action is perfect, body, arms, legs and oars all move in rhythm. Self-demonstrating when pulled by the string. Made of wood, brightly enameled, and rust-proofed steel Has a strong appeal to imaginative childhood. Packed in colored box, size 11×2¾×3¾ inches. One dozen to the case. W't per doz. 7 lbs.

No. C35—Per dozen.....$12.00

7 IN 1 TINKER

A very strong construction toy on wheels, makes seven or more models by interchanging the wood blocks on a metal chassis, locking permanently together with one snap hook. Metal is rust-proof, wood wheels are enameled bright red, blocks of natural hard wood without paint or varnish. A counter display of seven varying models attracts immediate sales. Length, 10 inches. Box size, 3¾×4¼×10 inches. One dozen in shipping case. W't per case 19¼ lbs.

No. C71—Per dozen.....$12.00

TINKERTOY

After eleven years it still remains the king of toys and has become a staple in every household. Tinkertoy is painstakingly made of the finest selected New England white birch. Each set is packed in a strong laminated mailing tube, three inches in diameter and twelve inches in height, which can be mailed with or without wrapper at the two pound parcel post rate. Packed twelve toys in a fibre case, w't per doz., 14 lbs.

No. C51—Per dozen $9.00

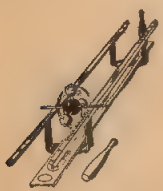
The value of attractive exhibits cannot be too strongly displayed. Tinker Toys, because of their form, color and motion lend themselves especially well to window and counter display. Tinker Toys are not seasonable toys.

TINKER TOYS

DRAG-ON TINKER

The axles pivot on center. Toy can be thrown around in the roughest manner and will invariably right itself. The movements of a crawling animal are reproduced by the use of a rubber backbone, the life of the rubber being over three years and can be easily replaced any time. The toy is enameled in prime colors of beautiful and durable finish. Approximate length 12 inches. Box size 2×4×12 inches. Packed 1 dozen to the case, W't per doz. 6¾ lbs.

No. C36—Per dozen.....*$10.20*



THE NEW TINKER-PINS

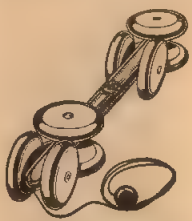
Many buyers will remember the former Tinkerpin game made by The Toy Tinkers and discontinued on account of size, the necessity for assembling and the amount of demonstration required. All of these difficulties have been overcome and a game second to none in the field is the present result. Convenient in size (24 inches long), no assembling. Any clerk can instantly understand and explain the operation. Rules governing the play are printed on each box. Construction is all metal, plated and lithographed, except the governor balls and pins, which are hard wood brightly enameled. Classified not as a toy, but a scientific game of skill for everyone over the age of seven years. Interest in the play is sustained indefinitely. Box size, 3×3¼×24 inches. Weight per case of one dozen, 18¾ lbs.

No. C39—Per dozen.....*$18.00*

CLOWN TINKER

A joy for the kiddies and a relief for mothers. This toy rights itself at the slightest pull of the cord. Unique in design,, popular in price. Unbreakable and finished in attractive enamels as shown. Individually packed in a box 4×6 inches. W't 8 oz. 1 dozen packed in a case ready for shipment weighs 7 lbs.

No. C145—Per dozen *$7.20*



FOLLOW-ME TINKER

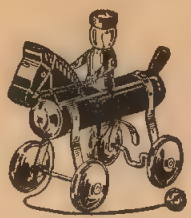
rolls on any side. Size is 10½ inches long with 2½ inch diameter wheels, enameled in eight colors. All wood construction. Boxed individually, w't per doz. 7½ lbs.

No. C132—Per dozen.....*$7.20*

TOM TINKER

Infants wear and gift shops have found Tom a particularly good selling number. Tom is packed in an attractive box 2⅞ in. square and 8¼ in. long, one dozen to the shipping case. W't per dozen, 4½ lbs.

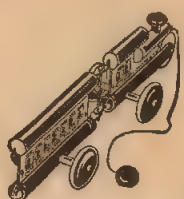
No. C25—Per dozen.....*$7.20*



PONY TINKER

One of the most attractive items from the shops of The Toy Tinkers. The rider posts up and down when the horse is pulled along by the halter. Constructed of wood and steel, beautifully enameled in colors. Metal parts are rust-proof. Strong and durable. Size, 8¼ inches wide, 6 inches high and 8 inches long Decorative box to fit. One dozen to the case, w't 11¼ lbs.

No. C34—Per dozen *$25.00*



CHOO-CHOO TINKER

The novelty and safety of the design, together with quick turning and not easily capsizable featurees bring absolute satisfaction in the use of this toy on the part of the child. Made of steel and wood, beautifully enameled and finished throughout. Over-all length, 14 inches. Furnished with cord and hand ball. Box size, 3¼×3¼×14 inches. Packed 1 dozen to the case, w't per doz. 12 lbs.

No. C42—Per dozen.....*$12.00*

Attractive exhibits properly shown attract patronage every day in the year.

Houses Built on Sand

built-easy summer profits for live Bilt-E-Z dealers

We saw it last June. . . . A show window filled with sand. . . . Shovels, buckets, the usual sand toys. . . . A "mirror lake." . . . A bright new Bilt-E-Z cottage!

That window drew children like a magnet. It gave them a new play idea. It gave the dealer a new record in Bilt-E-Z summer sales.

Another merchant fixes up a miniature garden around a Bilt-E-Z house and sets it on a low table in his toy department. It suggests the double fun of building a house, then playing with it out of doors. It appeals to parents as a practical toy buy. It sells Bilt-E-Z sets and units—at an interesting profit!

Work out a summer display for yourself. We'll furnish the houses, set-up, without extra charge. They'll boost sales throughout the whole department!

If you aren't already a Bilt-E-Z booster, ask for details of this year 'round profit-maker at once. Phone, wire or write to

REGISTERED TRADE MARK

CHEMCRAFT

THE CHEMICAL OUTFIT

CHEMCRAFT is more than a toy. It combines amusement, education and entertainment for young and old. CHEMCRAFT is the original and best chemistry set on the market and offers the utmost in dollars and cents value to the youngster or his parents. CHEMCRAFT is being constantly advertised in the leading Boys' Magazines and Popular Science Publications.

CHEMCRAFT is a complete chemical laboratory. With these sets boys and girls can work hundreds of wonderful experiments and each experiment can be repeated many times with the liberal quantities of chemicals furnished.

CHEMCRAFT is used in Chemistry classes in many schools and is endorsed by teachers, professors, chemical experts, and government officials. The outfits contain no dangerous chemicals.

This year CHEMCRAFT outfits have been greatly improved. The outfits pictured here are much superior to any you have ever seen before. New box labels improve their outside attractiveness. Improved interior arrangements show the contents to better advantage. Larger quantities of chemicals make these outfits more practical and enable the boys and girls to get more real value and make their fun last longer.

It's easier, more satisfactory for you and your customer, sells quicker and earns sure profits.

Here are six popular sets to retail from $1.00 to $12.00. Make up your order so you will have a representative stock and be prepared to say "we have it!" when the boys ask for CHEMCRAFT.

Now Ready To Supply The Demand For

A Smaller, Lower Priced PONEY-BIKE!

New, Greatly Improved, Easy Running Models of The Most Appealing Wheel Toy In Many Seasons

There is now a Poney-Bike for every child, from little tots of 2 years right up to 9. Smaller models No. 0 and No. 1 ready for shipment in August; other sizes ready for immediate shipment.

The construction on every model has been greatly refined and improved. They now have curved handlebars, real leather ears, and a new patented feature which enables the rider to gallop or run stationary by the mere turn of a nut. Ball-bearings under each hoof and in every wheel make possible real speed with amazing little effort. Strikingly finished in Dapple Grey, Tan and Dark Brown.

See for yourself the beauty, durability and ingenuity of the Poney-Bike, with all the advantages of the ordinary velocipede PLUS an exhilarating GALLOPING MOTION. Write today!

Poney-Bike Mfg. Corp.

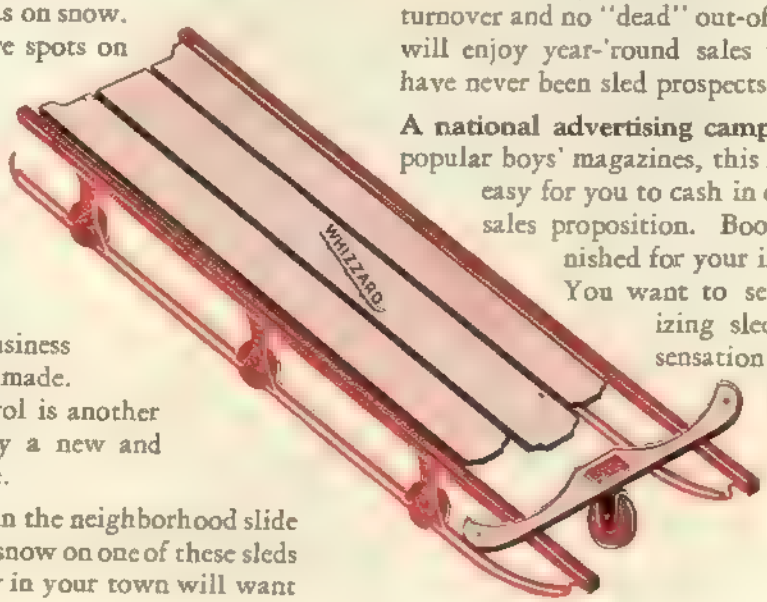
SENSATION

WHIZZARD, the Sled that knows no Seasons—

Coasts in Winter and Summer alike

Small wheels and runners combined carry WHIZZARD lightly over bare ground with the same cyclone speed as on snow. It whizzes over bare spots on the slide. Will coast the whole year 'round in any climate. . . This one feature makes the WHIZZARD the most revolutionary development in the sled and coaster business since sleds were first made. . . . Absolute control is another feature provided by a new and easy steering device.

Let one boy or girl in the neighborhood slide down a hill bare of snow on one of these sleds and every youngster in your town will want a WHIZZARD!



Increase your yearly profits with a staple item that sells every month in the year. A quicker turnover and no "dead" out-of-season stock. You will enjoy year-'round sales to customers who have never been sled prospects before.

A national advertising campaign in the most popular boys' magazines, this Fall, will make it easy for you to cash in on this remarkable sales proposition. Booklets will be furnished for your imprint.

You want to see this revolutionizing sled. It will make a sensation in your store. Send for sample to-day.

NEVERLEAK TIRE FLUID

By injecting a four ounce tube of Neverleak Tire Fluid into a bicycle tire, it will be made leakproof. The moment a tire containing "Neverleak" is punctured, the air pressure within forces the fluid into the aperture, and exposure to the outer air coagulated it and instantly closes the vent.

The thread end of the opening of the tube is exactly the right size to screw into the valve stem.

Per Doz

No. 4T—4 ounce tubes $6 90

One doz tubes in paper counter display case. We do not break pkg.

TIP TOP GROSS LOT DEAL

Special Price, Double Certificates.

The Tip Top deal consists of one gross of 4 oz. tubes, accompanied by double certificates (24 instead of 12). Below are a few examples of the valuable premiums to be secured with the certificates, as shown on circulars packed in each case.

For 10 certificates a beautiful gold clock or 4 solid leather handle screw drivers. For 12 certificates a solid brass business sign, 12x15 inches. For 20 certificates a 42 piece fine quality decorated dinner set. For 24 certificates a genuine Sessions regulator clock. The dealer is also entitled to received on application to the factory, one complete window display outfit. This deal cannot be broken. These certificates must be sent direct to The Buffalo Specialty Co., Buffalo, N. Y., to secure premiums. Per Gro

Loud Speakers and Head Sets

Utah Cone Speaker

The famous Utah unit is now available in a Cone type Speaker, which has free edge, stands 15 in. high, including base, and is 13 in. wide. The excellent tone qualities are unsurpassed and the speaker will handle any power output without distortion. Each in box.

No. 1R54. Each. 6.00

Utah Superflex Speaker

The Utah Superflex Speaker is noted for its remarkable clear reproduction. It will bring out high and low notes equally well and is capable of handling any volume. Stands 8½ in. high and 6 in. wide. Each in box.

No. 1R55. Each..... 6.00

Thorola Junior 12. It is extremely sensitive to faint signals, and the unique method of control is responsible for the Junior Model's excellent tone quality, making it ideal for small apartments. Each in box.

No. 1R51. Each..... 9.00

Thorola 4 Speaker. The standard of loud speaker reproduction. Controlled Mica diaphragm and powerful magnet build the faintest radio impulse into giant sound with all the true tone qualities of the broadcasting station itself. Each in box.

No. 1R33. Each..... 15.00

The Thorola Cone is a beautiful work of art, harmonizing with any furnishings. Finished in rich walnut and old gold. Powerful two-coil vibrating reed unit. Correctly adjusted at factory. Perfect reproduction. Size 14½ in. wide, 17¼ inches high, including stand. Each in box.

No. 1R52. Each..... 12.00

LittleTattler Head Set

The features of these phones are their light weight. The double head set weighs only ten ounces. Receiver case is aluminum. Ear caps are rubber. One-piece magnet of extra size. Each in box.

Per dozen sets.. 15.00
Per set 1.35

FROST FONES

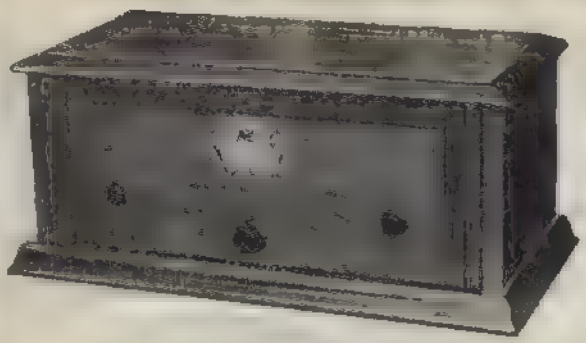
Frost Fones hold their dominant position in the radio world because they are made right and sold at the right price. For those who wish the economies made possible by the aluminum shell type of construction, having highly polished drawn shells and composition caps. Each in box.

No. 1R18. 2,000-ohm headset.
Per set..... 1.85

No. 1R19. 3,000-ohm headset.
Per set..... 2.25

Naxon Radio Receiver

Six Tube, Illuminated, One Dial Control



This set employs a standard tuned radio-frequency circuit, with two stages of radio-frequency, one stage of detection and three stages of audio-frequency. The wiring is practically all concealed. Because of the patented toroidal coils, the set is capable of getting great distance and the selectivity is especially good for a single dial controlled receiver.

Represents the latest development in radio design. The front panel is made of metal, finished in natural wood grain.

Combination switch turns on and off batteries and illuminates dial as well. This feature is usually found only on the more expensive sets.

Set comes in beautiful cabinet, with dull luster walnut finish. Each in carton.

No. 1R84. each..... $39.50

Accessories Needed to Complete this Receiver

Superior Soft Drinks

"Not how cheap, but how good" has been our slogan in the preparation of our "Superior" brand of soft drink powders and liquid flavors.

Before adopting the "Superior" brand, and placing it on the market, all items listed were subjected to a most rigid test by expert chemists, who reported that all powders and liquids submitted were far superior in every detail to all others.

"Superior" Soft Drink Powders, an artificial flavored product—composed of a citrus base, flavored with true Italian flavors, and artificially colored. A delicious drink suggesting the rich fruit flavor of the true fruit itself is obtained by using "Superior" powders.

There is 85c profit on every dollar taken in

"Delicious"

"Superior" Soft Drink Powders and Liquid Flavors are prepared especially for us. We guarantee these products to be made from the very best materials. We have had them analysed by chemists and they comply fully with all pure food laws. By using "Superior" soft drink powders and flavors you will double your sales

Superior Liquid Flavors in Bottles

"Superior" Liquid Flavors are produced from the highest quality ingredients obtainable. Our idea of putting them up in bottles is the handy way of making soft drinks rapidly. Always use glass or earthenware containers when mixing or dispensing, as drinks should never come in contact with metal.

A tablespoon of "Superior" liquid flavor mixed with sugar and water will make a gallon. Makes excellent Sherbets, Ices, Frappes and other delicious concoctions. Soda dispensers will find it ideal for Soda and Sundae syrups.

Each bottle contains 4 oz. and will make 10 gal. of liquid. Made in the four artificial flavors as listed below.

All Drink Powders and Flavors Comply Fully with all Pure Food Laws

Artificial Raspberry 4 oz. bottle makes 10 gal. or about 300 glasses
No. A8074. Bottle .75

A Splendid Showing of "Verona" Aquariums as Unusual Gifts

Aquariums are very popular in the homes today. Folk seem to enjoy a pet hobby such as this and they appreciate the decorative scheme it lends to home surroundings. This large showing permits a most satisfactory selection to be made, at prices exceedingly low, considering the superior quality prevailing.

FACTORY GUARANTEE

"Verona" products are Nationally advertised and fully Guaranteed The makers of Verona artistic metal furniture guarantee every piece to be free from defects—perfect in design and workmanship. They will replace any broken metal parts—caused by faulty materials, workmanship or other causes. This warranty cannot, of course, cover breakage of parts made of glass.

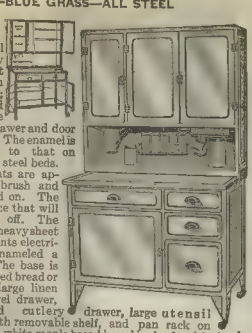
KITCHEN CABINETS

—BLUE GRASS—ALL STEEL



White Enameled. The structural frame is of heavy angle steel, cut and formed on special machines; securely welded into proper shape causing every drawer and door to fit perfectly. The enamel is applied similar to that on white-enameled steel beds. A number of coats are applied by an air brush and each coat baked on. The result is, a surface that will not chip or peel off. The entire body is of heavy sheet steel with all joints electrically welded, enameled a snow white. The base is fitted with tin lined bread or cake box, one large linen drawer, one towel drawer, one partitioned cutlery drawer, large utensil compartment with removable shelf, and pan rack on inside of door. A white maple bread board is also furnished.

The top contains a tilting flour bin with flour sifter, glass sugar container, seven crystal glass spice jars and a crystal glass measuring cup.

Height over all 70 inches; width 40 inches; top 40½x26 inches; extending to 37 inches when drawn out.

WRENCHES

WALDEN SPEED WRENCHES

Long shank brace socket wrenches are used as speed tools in assembling and dismantling cars. Are most efficient when used on a series of the same sized nuts as on cylinder heads. To gain the most time in removing nuts first release the nut with an offset socket wrench, then spin nut off with Brace or Speed Wrench. These tools are big time savers, and are considered indispensable in garages where they have been tried.

No.	Size, in.	Each.

GARAGE EQUIPMENT

WEAVER TRUCK AMBULANCES

Easily applied to rear axle, to which it can be chained, if necessary.

Designed to answer the demand for a quicker, easier and safer means to tow in disabled trucks, busses and other commercial cars, and unusually heavy passenger cars, which on account of their weight and size cannot be handled with the ordinary equipment available. It is needed by every shop servicing commerical cars, including public garages, truck dealers, owners of truck and bus fleets, state and municipal garages, etc. The Ambulance can easily be applied to front or rear axle, as illustrated The saddles are off-set to the side, so that by interchanging them the width between them can be varied from 19¼ to 28¾ inches, and obstructions avoided. Saddles are also off-set to front or rear (depending on position in which yoke is turned) so that the weight of the load can be thrown to the front or rear of the Ambulance axle as the Ambulance is attached to the front or rear axle of the car, to avoid accident in case tongue accidentally becomes disengaged from towing car. Extremely strong and simple in construction. Load is supported by 2½ in. steel dead axle. Each wheel is supported on axle by two sets of heavy ball bearings, which take both radial and thrust strains. The heavy solid rubber double tires are vulcanized to steel rim pressed onto wheel.

No. WB14 Diameter of wheels, 16 inches; width of wheels, 3½ inches; extreme width of Ambulance, 43¾ inches; telescoping pole adjusts from 7 to 13 feet. Shipping weight, 580 lbs. .....Each, **$300.00**

WEAVER AUTO HOISTS

Single Suspension for Light Work

Will give 100 per cent hoisting service in handling either touring cars or limousines both inside and outside of the shop. The Auto Hoist requires only 12 to 16 inches on each side of the car and can thus be operated under very cramped conditions. When not in use it can be run astride a car, thus occupying practically no more space than the car itself.

The frame of the hoist can easily be elevated by its own power, from 7 feet 6 inches to 9 feet 2 inches. Sufficient elevation is thus afforded to handle limousines without difficulty. The minimum elevation allows the hoist to be run through the average garage door and handle work outside of the shop. The worm drive mechanism makes it impossible to release the load accidentally. Light work can best be handled by a single chain over the center roller; heavy work, by two chains over corners of frame; capacity, 3,000 primarily of 5-inch channel steel.

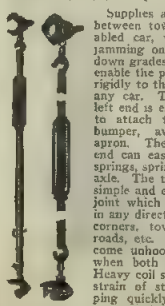
No. 464-WG10 Shipping weight, 577 lbs. . . . . .Each, **$120.00**

WEAVER TRUCK HOISTS

For truck use the Weaver Truck Hoist is recommended. It is heavily constructed of I-beam stock. It also has compound lifting leverage; capacity, single suspension, 4,000 pounds; double suspension, 6,000 pounds.

No. 464-WG11 Width between frames, 8 feet 4 inches; height, minimum, 8 feet 4 inches, maximum 10 feet. Shipping weight, 294 lbs. .....Each, **$30.00**

MODEL D WEAVER TOWING POLES



Supplies a rigid connection between towing car and disabled car, which prevents jamming on sudden stops or down grades The two clamps enable the pole to be clamped rigidly to the front or rear of any car. The clamp on the left end is especially designed to attach to front axle or bumper, avoiding splash apron. The clamp on right end can easily be applied to springs, spring shackle or rear axle. The two hooks form a simple and effective universal joint which allow ample play in any direction when turning corners, towing over rough roads, etc. They cannot become unhooked in towing when both are fastened. Heavy coil springs absorb the strain of starting and stopping quickly and in towing over rough roads. Pole is of double strength steel tubing in two sections, one telescoping within the other.

No. WC10 Length of pole, adjustable 5 feet 6 inches to 8 feet. Shipping weight, 45 lbs. .....Each, **$15.00**

WEAVER SERVICE RACKS

Running Boards on Each Side of Rack

Furnishes an easy, safe means for elevating cars to a convenient height for crank case service, lubrication, inspection, etc.

Lower ends of incline are spread, allowing wheels to enter easily. Sides of treads are high and curled over to prevent damage to tires. End bumpers are amply high to prevent accident.

The gate, an exclusive feature, provides a quicker and unobstructed way for workman to get under car. Rack can be assembled to locate gate on either side. When open, end of gate forms stop that prevents car from backing off accidentally. When closed, the gate locks automatically.

Pressed steel running boards are located on each side for the convenience of the mechanic

Extra incline to permit car to be driven forward off rack can easily be attached by unbolting bumpers.

Constructed of pressed steel, securely riveted to cross members and braced to insure rigidity

No. WL10 Length of horizontal treads, 14 feet; length inclined treads, 12 feet; height, 26 inches. Shipping weight, 900 lbs. . . . . .Each, **$105.00**

EXTRA INCLINES

No. WL11 Length, 12 feet. Shipping weight, 294 lbs. .....Each, **$30.00**

WEAVER VALVELESS BUCKET PUMPS

Is a great time and labor saver in handling lubricants in the garage because of the following three distinct methods of operation possible, an exclusive feature

(1) Lubricant can be forced out of bucket pump and into differential, transmission housing, etc. (2) Old grease or oil can be sucked out. (3) Cylinder of bucket pump can be sucked full of lubricant from different container and discharged without disturbing contents of pump

Thus old lubricant can be drawn from differential, oil pumped into clean gears and drawn out and differential filled with new lubricant while customer waits.

Bucket pump can be conveniently operated from cramped position by auxiliary handle, or from standing position by plunger. Self-measuring. One cylinder full of lubricant weighs 1 pound. Ten full strokes lever handle discharge one quart. Flexible metal hose reaches any opening and is impervious to grease.

No. WE10 Capacity, 25 lbs. Shipping weight, 25 lbs. ....Each, **$13.50**

GARAGE EQUIPMENT

MODEL E WEAVER UNIVERSAL TIRE CHANGERS

Goose-Neck for Removing Tires From Wire and Disc Wheels and Solid Rims

Developed to meet the demand for a quick, safe and convenient means for changing tires not only on all types of split and solid detachable rims but also on wire and disc wheels

To remove tire from wire or disc wheel or solid rim, rim is firmly held by expanding jaws against it and using adjustable goose-neck to force tire down off rim. Tires are easily removed from split rims by contracting rim by means of the double handled crank sufficiently to allow tires to be lifted off. Tires are easily remounted by reversing this operation. Changer is shipped set up for use. It requires 42x42 inches floor space.

No. WF10 Tire Changer. Shipping weight, 250 lbs. . . . . Each, **$58.00**

WEAVER RIM ANVILS

Is designed to save time and labor in straightening kinks in rims of every type and size, including wire wheels, which can be handled in either vertical or horizontal position

It can be used to advantage in riveting brake bands. Two hand tools for opening grooves are supplied.

No. WF13 Rim Anvil. Shipping weight, 20 lbs. . . . . Each, **$6.50**

WEAVER MOTOR SERVICE PRESSES

Is designed to supply in one compact unit a convenient means of handling light pressure and straightening work, fitting connecting rod assemblies complete, including aligning, straightening and bronzing, relining brake bands and disc clutches and innumerable other jobs

Specifications

Capacity over one-inch plate, 10 inches. Floor space, 18x22½ inches. Rack and pinion leverage, 40 to 1. Pressure up to 10,000 pounds can be exerted with screw.

No. WD14 Press Complete, with Standard Reliner. Weight, 328 lbs. . . . . Each, **$140.00**

No. WD35 Press Complete, with Ford Transmission Reliner. Weight, 319 lbs. . . . . Each, **$132.00**

No. WD15 With Pressure Plate, Test Block and One Arbor. Weight, 180 lbs. . . . . Each, **$85.00**

No. WD16 Base . . . . . Each, **18.00**

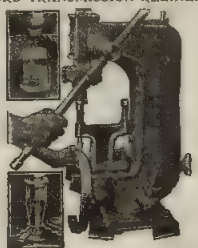
No. WD17 Brake Reliner. . Each, **20.00**

No. WD18 Straightening Fixture. Weight, 31 lbs. . . . . Each, **87.00**

No. WD19 Dial Gauge . . Each, **10.00**

Extra Arbors . . . Each, **5.00**

FORD TRANSMISSION RELINERS



Especially designed for use with Weaver motor service press to reline Ford transmission bands. Reliner has two plungers, one for forcing band down on knife to shear off old rivets and remove old lining, the other to insert split rivets and countersink them into lining.

No. WD32 Transmission Reliner . . . . . Each, **$12.00**

MODEL I WEAVER TIRE SPREADERS

For Balloon and High Pressure Tires

Saves time and labor in locating any break or other injury and enables the repair man to show customers the interior of their tires, which helps sell profitable vicanizing jobs and new tires.

The outstanding feature of the new model is its instantaneous adjustment to handle either balloon or high pressure tires by merely raising or lowering a hand lever.

For inspection, tire is placed on spreader with spreader hooks over beads, the tire resting on four rollers which facilitate revolving tire to inspect new portion. Pressure on foot lever draws rollers down flush with buffing plate and spreads tiré over plate. When break is located, tire can be held permanently spread by four hooks in buffing plate and removed to bench for repairs. Spreader can be moved about shop as desired.

No. WF14 Tire Spreader Model I. Shipping weight, 78 lbs. . . . . Each, **$28.00**

No. WF15 Extra Buffing Plate. . . . . Each, **$3.50**

For High Pressure Tires Only

This tire spreader is similar to WF14 but is built to handle high pressure tires only.

No. WF11 Tire Spreader. Weight, 57 lbs. with extra buffing plates, 72 lbs. . . . . Each, **$22.50**

No. WF12 Extra Buffing Plates. . . . . Each, **$3.00**

CHRISTY SAFETY RAZOR WITH MASSAGE BAR

Christy Razors and Blades are made by the makers of the Celebrated Enders Razors and Blades which have enjoyed immense popularity for many years.

The Christy Double-Action Safety Razor is mechanically perfect. The stationary massage bar, exclusive to the Christy, is a wonderful invention. It smooths and draws the skin immediately in advance of the blade edge, giving a taut surface for the blade when it comes in contact with the beard.

No. C325—Christy Double-Action Safety Razor with Stationary massage Bar, contains: highly polished nickel silver head, comb guard with stationary massage bar, handle is made of special steel and is nicely knurled and nickel plated, six Christy Blades, put up in a purple plush lined black leatherette case with glove snap fastener, size of case when closed 1×2×4¾ in., per dozen $17.75

WESTCLOX COUNTER DISPLAY CASE

Dealers Can Double Their Westclox Sales with Very Little Trouble and Trifling Expense by Installing a Westclox Department

Occupies less than a sq. ft. of space on dealers show case counter or window.

Will more than pay for itself in increased sales the first three months dealer puts same in use.

The ideal method of selling Westclox.

A Silent Salesman that does "HIS STUFF" while dealer is occupied in another direction.

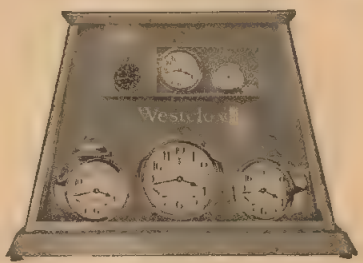
To display Alarm Clocks is to sell them.

Alarm clocks are not easy to display. Too often they get in the corner of case or under the counter where they are not seen.

This attractive case gets them out where people see them, consequently, twice as many people buy Westclox than ever have before.

This case is offered at about one-half its actual cost.

It Is Not Necessary to Purchase Any Particular Assortment of Clocks to Secure Same at the Price Named



FOR FACTORY SHIPMENT—CHARGES PREPAID

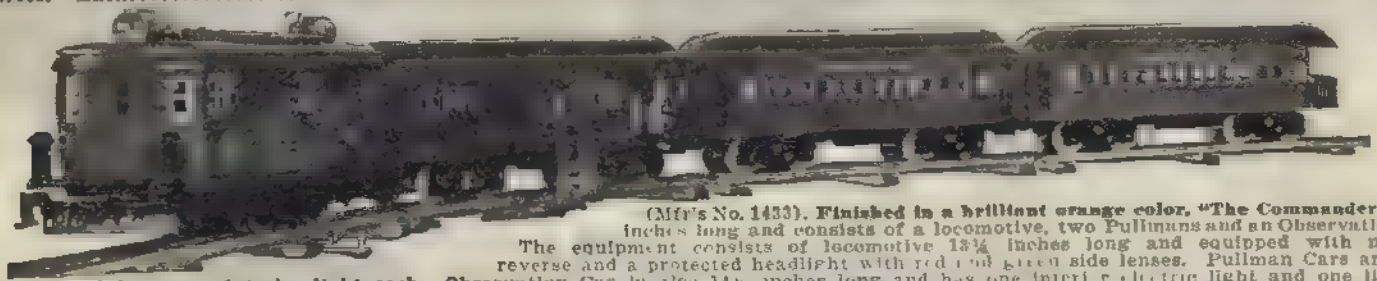
(Mfr's No. 1422). **This train is finished in brilliant** thistle green with red and black trimmings. The equipment consists of the locomotive 13¾ inches long, and is equipped with manual reverse and a protected headlight with red and green side lenses. The Pullman car is 14½ inches long and has one interior electric light. Observation car is also 14½ inches long (not including couplers). It has polished solid brass platform railing. Car carries one interior light and one platform dome light.

Track equipment consists of 8 pieces curved track and 2 pieces straight track together with necessary track binding clips and track terminal connection, making an oval 150 inches in circumference. Complete train set tightly packed in single carton.

No. 39N403. Each..... **14.07**

(Mfr's No. 1261). **An Eighteen Speed Transformer** with half-volt steps of 100-watt capacity for use on 110-volt A.C. only. Recommend for satisfactory operation on all wide gauge trains

No. 39N129. Each..... **3.80**



(Mfr's No. 1433). **Finished in a brilliant orange color, "The Commander"** is 61 inches long and consists of a locomotive, two Pullmans and an Observation car. The equipment consists of locomotive 13¾ inches long and equipped with manual reverse and a protected headlight with red and green side lenses. Pullman Cars are 14½ inches long and have one interior light each. Observation Car is also 14½ inches long and has one interior electric light and one light in observation platform dome. The car sides are lithographed and show a wealth of detail such as rivets, car names, numbers, steel plates, etc.

The track equipment forms a 184-inch oval and consists of eight pieces curve and four pieces straight track together with the necessary track binding clips and track terminal connection.

Complete train set securely packed in a single carton.

No. 39N128. Each..... **20.58**

(Mfr's No. 1466). **This train,** consisting of locomotive, combination Mail and Baggage car, Pullman and Observation cars, is 80 inches long.

The equipment consists of Locomotive No. 4687—new twelve-wheel Triple Action Remote Control Type. It is 30 inches long, the famous Twin Reversible Headlights, bell, hand rails and ladders, all of which are finished in hand buffed nickel. The journal boxes and air tanks are brass.

Combination Baggage and Mail car is equipped with a detachable automatic mail bag catcher and bags. Car has four sliding doors and 2 interior electric lights.

Pullman car features swinging vestibule doors that close automatically, vestibule diaphragms and three interior electric lights

Observation car, with its polished brass railing, has an illuminated platform train sign with its name, "The President's Special." It also has two interior electric lights and a platform dome light that illuminates the platform and the red and green rear and side lights.

Cars have correctly designed six-wheel trucks. They are elaborately decorated with solid brass journal boxes, battery boxes and air tanks. The overall length of these cars is 21 inches or 19½ inches not including automatic couplers.

Track equipment consists of 10 pieces straight track and 8 pieces curved, track terminal connection and track clips, forming a large oval 22 feet in circumference. Complete train set securely packed in a single carton

Each..... **2.33**

Don't Remove Interfering Parts
WORK AROUND THEM

ON 'most every car there are a certain number of awkwardly placed nuts. Ordinary wrenches won't reach or turn them unless interfering parts are first removed. But Williams' new Obstruction "Superrench" will. Its narrow, pointed jaws and 75° head angles are specially designed for just such jobs.

Around the carburetor, manifold, shackles, steering gear and transmission, and in a dozen other places where clearance is limited, the new Obstruction wrench makes rapid, efficient service possible. Like all Chrome-Molybdenum "Superrenches," it is positively guaranteed against breakage. And because the heads are both on the same side of the handle, these wrenches always offer a comfortable working grip. A mighty good buy, either for use or resale.

Furnished in a great variety of sizes for all popular U. S. and S. A. E. standard nuts and cap screws. Singly, in sets or on attractive Display Boards.

FLOODLIGHTING PROJECTORS

X-RAY

For Use with 250 Watt G-30 Mazda "C" Flood Lighting Lamp

Used for protection lighting and for facilitating night operations in large spaces, both inside and outside. The unit is weatherproof, properly ventilated and not affected by heat, cold, rain, snow or ice. Is furnished with swivel and tilting base, for bolting to supporting surface. The No. 800 Reflector furnished with the No. 51C unit, is designed to concentrate the light into a powerful beam. The No. 810 Reflector furnished with the No. 51E unit, gives a wide distribution of light approximately 40 degrees. The lamp used is a "250 Watt Mazda 'C' G-30 Floodlighting lamp, medium screw base." For color lighting special heat-resisting pigment cover glass in Red, Blue, Green or Amber can be furnished at a slight additional cost. Furnished without lamp. Standard finish gray. Size of base, 2x4 inches, with ½ inch holes 2⅝ inches on centers.

SLEEVE EXTENSION

No. 10265 Sleeve extension with clamping band, for adapting No. 51 Projector to Standard 200 Watt PS30 Mazda "C" Lamp.....Each, $4.00

No. 60

For Use with 500 Watt G40 Mazda "C" Flood Lighting Lamp

Projector is of medium size. It is constructed throughout of heavy gauge galvanized steel and finished in a neutral gray enamel. It is properly ventilated and not affected by unusual conditions and changes in the weather. It is adapted to a wide variety of uses, having three designs of reflectors that will allow for practically any distribution of light. The No. 835 Reflector, which is regularly supplied and shipped with the No. 60 Projector, produces a beam of 25 degrees divergence with lamp at focus. The No. 840 Reflector, supplied with the No. 60 Projector when specified, produces a 10-degree beam with lamp at focus. The No. 845 Reflector, supplied when specified, produces a wide beam of 50 degrees. The lamp used is a "500 Watt Mazda 'C' G-40 Floodlighting lamp, mogul screw base." A swivel and tilting base supplied with unit for bolting to supporting surface. Furnished without lamp. Standard finish gray. Size of base, 5 inches.

NOTE: Number 62 series is the same as No. 60 except is supplied with heavy iron stand mounting.

SHOW WINDOW FOOTLIGHTS

X-RAY

Portable

Designed to bring all details of the display into sharp relief and eliminate the shadows ordinarily present with only overhead lighting. Small Portable Footlights are made in sections 4, 8 or 16 feet long, for 60, 100 or 150 watt lamps on 12-inch centers. This can be used independently of or in conjunction with other lighting equipment for variable effects. The housing containing the specially designed X-Ray Reflectors is solidly constructed of light metal with the outside finished in olive green, or if preferred a Dark Bronze, Gold Bronze or Ivory. Inner surface is always finished in Aluminum Bronze. This small housing can be used to support panel name plates, monograms, etc. It can also be used as a portable footlight for small Auditoriums, Lodge Rooms, etc. All footlights furnished unassembled and no wire or lamps are included.

No.	Length, Feet	Number of Reflectors	Height, Inches	No. Lamps	Each

SCOOPETTE AND HOODETTE INSTALLATION DATA

Complete Display Case Lighting Outfits

The table printed below tells what it costs to buy a complete outfit for lighting different sized show cases. The prices are for square end cases; the cost increases, of course, with longer cases, and those that have to be lighted more brightly; Scoopettes and Hoodettes, though not used for the same kind of cases, cost the same. The complete outfit includes a special insulating joint, a push button switch, a special switch box, all tubing, elbows, T fittings, Scoopettes (or Hoodettes), straps or brackets for supporting tubing, cap for end of tubing and enough special flexible No. 18 stranded wire for the entire case. Prices do not include assembling, wiring, installing or lamps

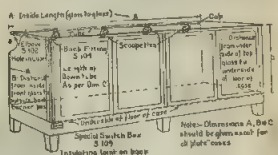
TABLE OF PRICES FOR COMPLETE OUTFITS

One Equipment is a Standard Package

Furnished complete for regular wood frame or all-glass show cases with square ends. Add $2.50 if one round end, $3.25 if two. Add 20% for wiring and assembling.

Length of Cases	Number of Scoopettes per Case 2	3	4	5	6	7	8	9	10
3 to 5 Feet	$24.85	30.75	36.70						
5 to 7 Feet	25.85	31.70	37.60	43.50					
7 to 9 Feet		32.65	38.55	44.55	50.45	56.35			
9 to 11 Feet			39.50	45.40	51.30	57.20	63.10	69.00	74.90
11 to 13 Feet				46.35	52.25	58.15	64.05	69.95	75.85
13 to 16 Feet					53.20	59.10	65.00	70.90	76.80

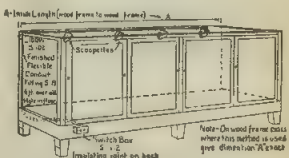
METHOD OF INSTALLING SCOOPETTES



A-Inside Length (glass to glass)
Scoopettes
Special Switch Box
Insulating joint on back
Flexible Conduit—underneath floor of case
Note—Dimensions A, B & C should be given exactly for all-plate cases

Back Entrance Method, for All-Plate Glass Cases

Feed wires are brought up through tubing at one of the back corner posts; then across the case at the top at one end, through an elbow. The wires are then carried through front length of tubing to Scoopette Units.



A-Inside Length (wood frame to wood frame)
Scoopettes
Special Switch Box
Insulating joint on back
Flexible Conduit—underneath floor of case
Note—On wood frame cases where this method is used give dimension A exact

Floor Entrance Method for Wood Frame Cases

The feed wires enter from underneath the floor of case, extending up through the flexible conduit, which is concealed back of one of the front corner posts. If the show cases in which the Scoopette equipment is to be installed do not conform with the standard sizes given in our tables, send for the special dimension blank so as to give us exact information. This is very necessary to insure that the equipment will exactly fit the case.

BENCH DRILL VISES

YANKEE

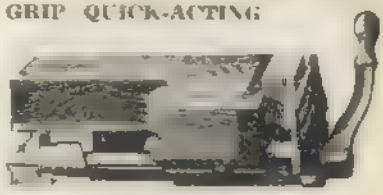
No. 430-2—Jaws 10 in. Wide and 5 in. Deep, Open 12 in., Weight Each 42 Lbs. .. 10.80

LIGHTNING GRIP QUICK-ACTING

Simple, Quick-Acting and Durable



The operation of this vise is very simple. When the handle is in an upright position the cam (H) allows the dog (L) to disengage the rack (E). This allows the front jaw to be moved freely and adjusted to the work. By moving the handle a quarter turn to the right, the cam forces the dog to engage in the rack and lock securely.

Each

No. 17—Width of Jaws 9 in., Opens 12 in., Weight Each 47 Lbs. $12.00
No. 19—Width of Jaws 7 in., Open 7 in., Weight Each 29 Lbs. 10.00

Packed loose; wt per doz ¼ lbs.

ALUMINUM WARE
—BLUE GRASS—

Blue Grass aluminum ware is 99⅞ pure aluminum of good, heavy stock—each article shaped of one solid hard piece of metal—highly polished outside and in.

Fruit acids have no effect on Blue Grass aluminum ware. It will stand a heat of 1,100 degrees Fahrenheit and will not break by dropping. There is nothing to rust, corrode and no seams to let loose.

COFFEE POTS

Polish finish; welded spout; detachable handle; nickel plated brass hinge.

	Per Doz
No. 171—Length over all 36 ins; wt with handle 4½ lbs	$89 85

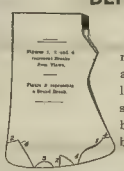
Half doz in wood box, heads enclosed, handles projecting, well burlapped.

OUR AXE HANDLING DEPARTMENT

Our Axe Handling Department, by years of experience, has reduced the handling of Axes to a science. Not only is each handle correctly gauged but it is driven and wedged with such accuracy as to insure a correct setting of the axe and to prevent its becoming loose on the handle.

All our handled axes are packed one dozen assorted weights in a crate. The heads are enclosed in a strong wood box and are held firmly and securely in place in such a manner as to prevent rubbing and scratching the finish. The handles are entirely covered with a strong cotton sack made especially for this purpose and tied securely, protecting them from dust, dirt and damage in shipping and storage. (See illustration.)

DEFECTIVE AXES



Necessarily the cutting edge of an axe must be high carbon and high temper, and for this reason a good axe is more likely to break than a poor one, as soft steel or steel in which the temper has been drawn by heating on a stone will bend before it will break.

Breaks from Flaws are known by being angular in form.

Sound Breaks, which show no fault in manufacture, are always circular in form.

Axes (except **Mohawk and Cyclone**) are guaranteed against breaks from flaws shown in Figures 1, 2 and 4, but not against sound breaks shown in Figure 3.

Kewpieville

By ROSE O'NEILL

Here it is the Fourth again! And the Kewpies all aglow over it. Johnny McKewp had the bright idea of teaching the birds to sing "My country 'tis." But oh, do look at the window above!

This young rabbit was surprised and delighted to hear about George Washington.

Uncle Hob wasn't ape to feel patriotic enough to suit the Kewpies. They resorted to every means to get him properly warmed up. (Johnny's faithful hop-toad, Towzer, was good at the drum.)

And they got him so warm and cozy at last that they had him reading the Declaration of Independence on the top of the Castle.

The Baby Tourist read Johnny and Kary O'Kewp pages and pages of United States history, and she said, "Why, I believe this is the liveliest story I ever read! It certainly ought to be a 'Best Seller.'"

KIDDIE KOLT NO. 625

Pat. Pending

FOR CHILD OF 2 to 4 YEARS

SPECIFICATIONS:

Length 23", Width 14", Seat from floor 12½", Height overall 17½", Weight approximately 4½ lbs., Spring is 1½" x 3/16" Carbon Spring Steel, adjustable Foot-rest. Wrapped individually, K. D., six to carton.
F. O. B., Anoka, Minnesota.

KIDDIE KOLT NO. 1250, Pat. Pending

FOR CHILD OF 3 to 6 YEARS

SPECIFICATIONS:

Length 28", Width 17½", Seat from floor 17", Height overall 21", Weight approximately 8½ lbs., Spring is 1¾" x ¼" Carbon Spring Steel. Adjustable Foot-rest. Wrapped individually, K. D., packed six in carton. F. O. B., Anoka, Minnesota.

SUGGESTED LIST
PRICE $4.99

Because of the shape of the springs on above Kiddie Kolts, there is NO strain or stress at the point where they are bolted to the base, therefore, they will NOT break at this point. The stress or strain is not concentrated at any given point throughout the entire spring. All edges and cornered woodwork is rounded, finished in three coats of lacquer. Base and seats red, face, white trimmed in black, spring and foot rest, Royal blue. We are sure you will agree that the Kiddie Kolts have action, sturdiness, and an appealing color combination.
